Assembly Instructions for MAGLEV FLATBED

Contents: 19 parts:

Maglev base construction:

PARTS:

6x gussets

2x side panels

2 x Maglev sides

2 x Maglev base

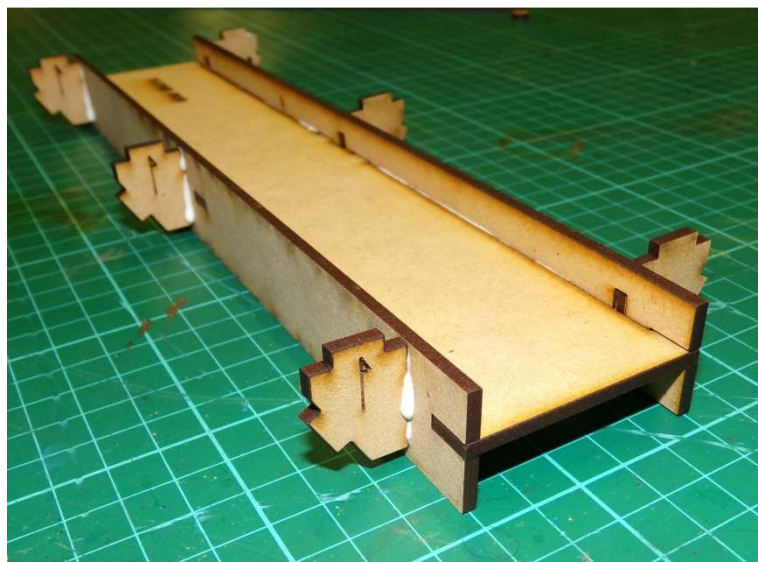

1 x Maglev tender floor

Assemble the core with the arrows on the upright panels to the rear.

Take the 6 gussets and glue into the side panels with the arrows pointing up.

Glue the maglev tray to the Maglev tender floor

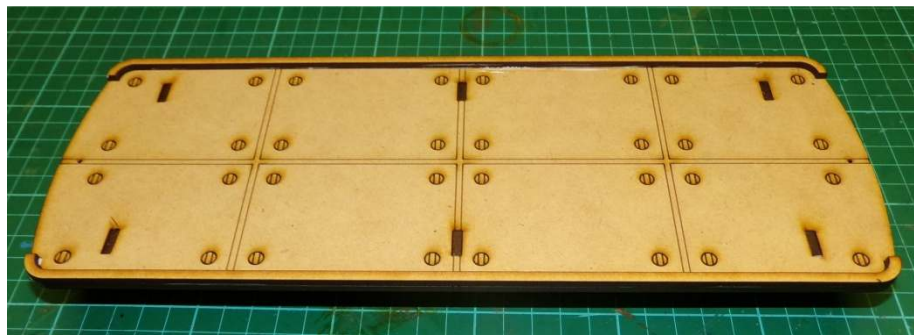

Glue the maglev sides to the gussets, the correct orientation of the sides is shown, with the long engraved grid panel facing to the front of the Flatbed.

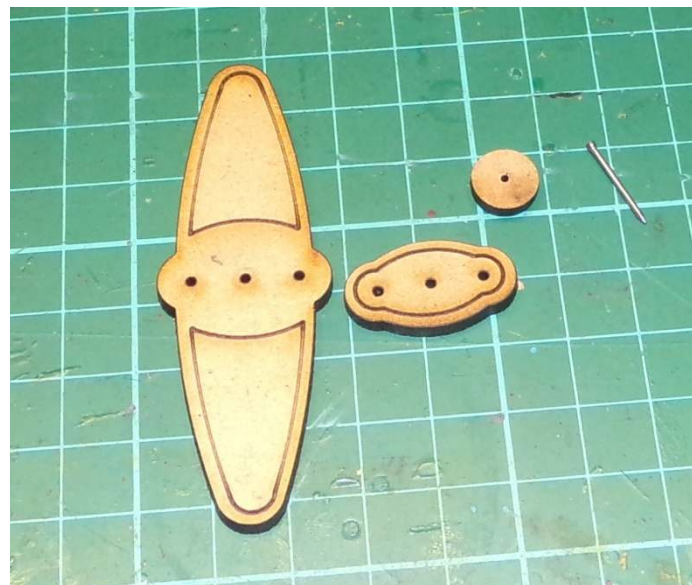

Attach the front and rear panels.

Glue the flatbed strakes to the Flatbed, using the engraved lines as a guide.

Coupling: x 2 sets

Glue the small connector onto the main coupling, using the pin, locate the circular plate into the centre.

Using the second pin, secure the coupler to the tender for gluing.

The third pin is used to locate and connect the next carriage/ flatbed.
