Hmmmm? No more posts seething with scary, threatening lies, Courthouse Gang Members? Did you know that cyberstalking of an advocate for the sick and dying in furtherance of court personnel aided hate crimes against the environmentally disabled via falsification of court records (in litigations over the first public writing of how it became a fraud in policy that it was scientifically proven by a Big Tobacco scientist, et al, that moldy buildings do not harm) is criminal and punishable by jail time? You might want to look at exhibits 6 thru 11; and then you might want to consider issuing a public apology to me and to all those injured and dying from water damaged buildings, continuing directly because of the criminal actions of officers of the CA courts and employees of the AOC aiding and abetting Kelman et al with the science fraud being able to remain in policy - and used to fraudulently sell doubt of causation of illness and death; via court aided malicious litigations.

Court personnel cyberstalking is now part of the court record. I only make this public post so that if something should happen to me for daring to write of billions of dollars worth of fraud and hate crimes in policy aided to continue by criminal actions of the courts themselves, the cyberstalking "Courthouse Gang" would be considered in the equation.

&gt; Yea, I'd be pretty nervous, too, if I was the "Courthouse Group".

&gt; Falsifying court documents and public records is criminal,

&gt; particularly when they are aiding and abetting billions of dollars

&gt; Please remind the rest of the gang that there is no statute of

&gt; limitations on fraud. Thanks, Sharon

&gt;

&gt; BTW: the Courthouse Gang Member cyber stalking is now part of the

&gt; record. See ContemptOfCourtFor.Me

&gt;

&gt; Its just a matter of time.
