

A SCIENTIFIC VIEW OF THE HEALTH EFFECTS OF MOLD

Nevertheless, except for persons with severely impaired immune systems, indoor mold is not a source of fungal infections, and current scientific evidence does not support the idea that human health has been adversely affected by inhaled mold toxins in home, school, or office environments. Thus, the notion that “toxic mold” is an insidious, secret “killer,” as so many media reports and trial lawyers would claim, is “junk science” unsupported by actual scientific study.

U.S. Chamber Institute for Legal Reform

The U.S. Chamber Institute for Legal Reform was founded in 1998 as a 501(c)(6) tax-exempt, separately incorporated affiliate of the U.S. Chamber of Commerce. The mission of ILR is simple: to make America's legal system simpler, fairer and faster for everyone. ILR's multi-faceted program seeks to promote civil justice reform through legislative, political, judicial and educational activities at the national, state and local levels.

Center for Legal Policy at the Manhattan Institute

The Center for Legal Policy at the Manhattan Institute is a leading voice for reform of America's civil justice system. The Center's mission is to communicate thoughtful ideas on civil justice reform to real decision-makers through books, publications, conferences and public or media appearances. Founded in 1986, hundreds of news reports have cited the Center's work, with The Washington Post going so far as to call Senior Fellows Peter Huber and Walter Olson the "intellectual gurus of tort reform."
