Primarily an oil painting class, the goal is to equip you with the skills necessary to fulfill your artistic vision. This class is taught with the individual artist in mind, teaching principles of visual language without smothering artistic vision. In a progressive and comprehensive manner, you will be trained to look, see and think in a way that will equip you to make art completely yours. True artistic freedom comes when you have developed the skills to convey, on a two-dimensional surface, what your vision has led you to paint. This class is devoted to teaching fundamental principles of design and technique to empower you.
