

WE SOLVE BUSINESS

With expertise and resources that guarantee results

Product Lab is a full digital product services agency.

We build solutions at every level and scale to solve your business needs.

Our DNA is rooted in over 20 years of architecting innovation to improve business and solve its complex challenges in an ever-changing landscape.

50+ expert engineers, designers and specialists have successfully solved hundreds of projects across enterprise, IoT, mobile and web, and bring their know-how and expertise to every client on every project.

- **Development Environments** – React, Vue, React Native, Native iOS, Native Android, Node.js, Go, Python
- **Databases & Providers** – Mongo, PostgreSQL, MSSQL, Neo4j, DynamoDB, BigQuery, DataLakes, Redis
- **Blockchain** – Hyperledger Frameworks: Fabric, Burrow, Indy, Sawtooth, Iroha, Quilt, Transact
- **Cloud Infrastructure & Tools** – Amazon, Azure, IBM, Google, Heroku, CloudFoundry, Docker, Kubernetes, Serverless/AWS Lambda, CircleCI
- **Integration Partners** – Stripe, Dwolla, Plaid, Twilio, Sendgrid

Operating as an innovation laboratory, we introduce each client challenge into our lab and innovate solutions through design, data modeling and expert application development.

Our Magic

Diversity in solution resolution is our expertise.

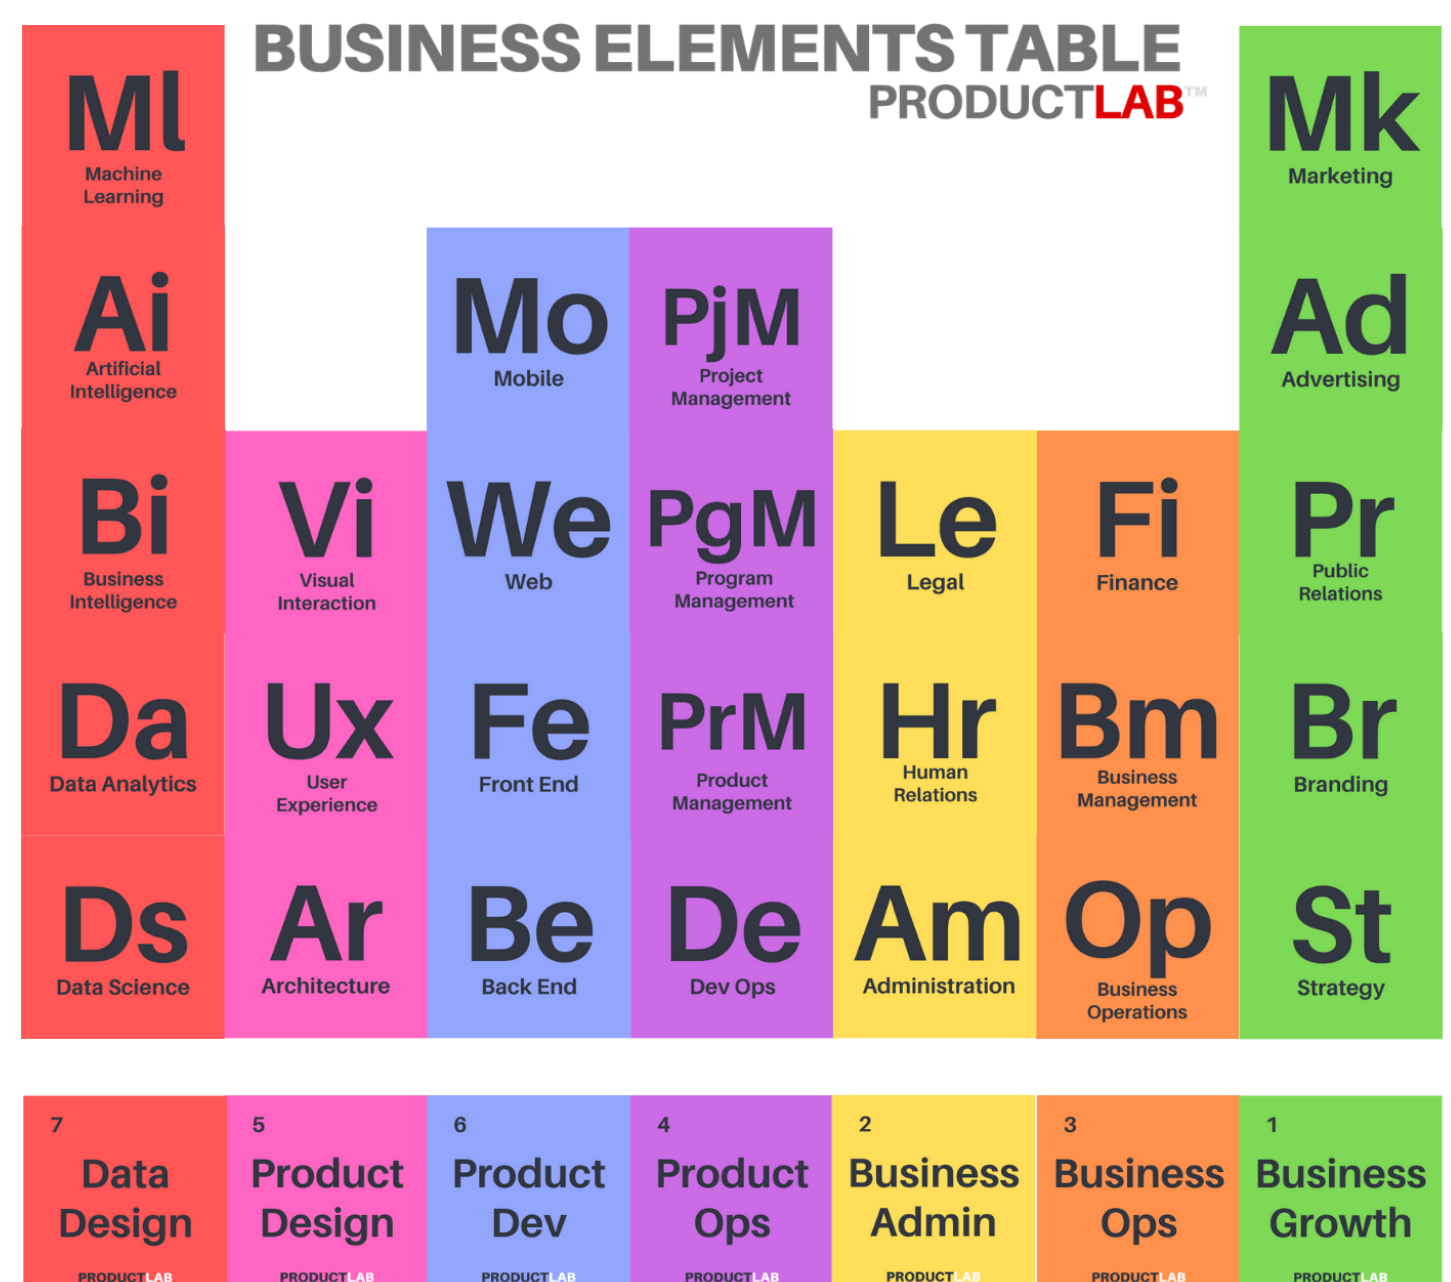

We solve each project through a process of cross-discipline solution services, bringing the wealth of resources we have into optimizing every outcome.

We know each project is different, and so are client demands. By experience, we've found no single agency solves every problem. However every problem does surrender to the competency of talent in resolving it, especially as a diverse collective of ideas.

We're also not a one-and-done partner for our clients.

Our goal is to not only solve your current needs, but continue to do so well into the future.

Our Product Elements are the bedrock of our success, and Product Lab is ready to put them to use for you.

90 Day Prototype-Beta Guarantee

Our #1 objective is your 100% satisfaction.

In the real world of digital product services, choosing an agency typically comes down to deciding if they can deliver on these three qualifying considerations:

- Time
- Money
- Results

Add to that knowing you are hiring a great team with strong and positive leadership, and with both Product and Project Management you can count on to get the job done and results you need.

Product Lab can and does deliver on all of it.

Our teams have delivered on over \$25 million in over 100 projects, and our leadership has years of success in solving and scaling process to get results.

Which is why for any agency to be successful, it must prove it can deliver. Hence Product Lab's guarantee of **first prototype or beta at 90 days** from a completed blueprint for every client.

We believe client satisfaction on time, money and results are required for project success, which is why we stand behind our guarantee of that success.

Our 4-Step Process to Client Satisfaction

1 **HOMEWORK**

First, we dig in and find out everything about the problem during a thorough process of research, evaluation and analysis. We formalize results into a Statement of Work - time, costs and resources, and collaboratively review and finalize to your satisfaction, and kick-off your project with fireworks.

2 **BLUEPRINT**

Second, a master blueprint to build the solution is key to timely product delivery. As a rule of thumb, Agile is iterative at around 20% planning and 80% execution, so we focus on user journeys, data flows and architecture to provide for the fastest, most effective path to quality development..

3 **BUILD**

Third, production is now triggered, in a rapid yet methodical process across all required disciplines. From mobile to web and AI to blockchain, designated project resources including a client-focused Project Manager are activated to ensure deadlines are met and milestones are achieved.

4 **DELIVER**

Finally, we focus on delivery of the first client Prototype or Beta version of the product **within 90 days**. This is one of our strongest guarantees, and company leadership stands behind ensuring this happens. This is then followed through on to final deployment of the entire project to full client satisfaction.
