

PATIENTS FOR **AFFORDABLE DRUGS**™

February 28, 2019

Mr. James Greenwood
President and CEO
Biotechnology Innovation Organization
1201 Maryland Avenue, SW Suite 900
Washington, DC 20024

Dear Mr. Greenwood,

You have an opportunity to disavow price gouging and exploitation of unrestrained market power by your member companies: publicly denounce Catalyst Pharmaceuticals. The case against Catalyst and its predatory pricing for the drug Firdapse could not be clearer.

For twenty years, patients with [Lambert-Eaton myasthenic syndrome](#) (LEMS) were able to obtain the same drug – known as 3,4-DAP – for free from Jacobus Pharmaceutical under the Food and Drug Administration’s compassionate use program. Now, Catalyst has licensed the drug in the U.S. and received exclusive rights to market Firdapse for seven years under the FDA’s orphan drug designation. It set the list price at [\\$375,000 per year](#), with a net price of more than \$300,000 per year including rebates to insurers and other discounts.

Worse, LEMS patients are now blocked from getting the free version. People who received an essential drug at no cost now face a price of \$300,000. Can you put yourself in their shoes?

Bhanu Patel, who lives with LEMS, [said](#) "Without this medication, you just can't even move. It's like your body is totally like a sweet potato." Unable to afford the drug's new price, according to [news reports](#), she has been rationing her last three month's supply of pills. "The words that I can use is I can't believe this is happening, to be honest."

Catalyst says it will offer payment assistance to patients. But private insurance or government programs will still foot the bill for the bulk of the cost—meaning higher premiums and higher taxes for the patients and all Americans. Moreover, patients must now live in fear that Catalyst will change or eliminate its support program thus making Firdapse unavailable to them.

There is no possible moral justification for this move by your member, Catalyst. This is abuse of our laws and regulatory framework to exploit patients, consumers, and taxpayers. To add insult to injury, Catalyst is receiving taxpayer-financed benefits that come with Orphan Drug approval, including tax credits and reduced user fees worth millions of dollars, along with extended exclusivity.

Your organization claims high prices are necessary to reward risk for expensive innovation. It is clear on its face that Catalyst did not engage in research leading to innovation—it simply acquired an existing compound and performed the steps necessary to receive approval from the FDA. Two clinical trials of 64 patients did not cost the \$2.6 billion that drug companies frequently

PATIENTS FOR AFFORDABLE DRUGS™

claim is the cost to bring an innovative drug to market. In fact, Catalyst itself says it spent “millions,” not billions on Firdapse.

On February 22, 2019, Patients For Affordable Drugs launched a petition engaging patients around Catalyst Pharmaceuticals’ actions in price gouging for Firdapse.

1,760 people signed the petition calling on you to denounce Catalyst and to rescind its membership in BIO. If you really believe in innovation to benefit patients and finding the right balance with pricing, this is not even a close call. We eagerly await your answer.

Sincerely,

David Mitchell

PETITION

1,760 people signed on to the following petition.

Catalyst Pharmaceuticals is responsible for taking a formerly free drug and remarketing it as Firdapse, a \$375,000 per year drug. Patients with Lambert-Eaton myasthenic syndrome (LEMS) depend on Firdapse, but many have been left scrambling to cover the astronomical new price tag.

We need to take action and put a stop to this blatant greed. That's why we're asking James Greenwood, the CEO of BIO to publicly denounce Catalyst's actions and rescind their membership from the trade organization.

TELL BIO TO DENOUNCE CATALYST PHARMACEUTICALS.
