

## MACHINE QUILTING PRICING

Pricing for machine quilting is determined by the size of the quilt and the amount of space between quilting in the pattern chosen.

Our pricing is very competitive and begins at just 1 ¢ per square inch. For this price you are able to choose from over a dozen patterns and can expect no more than 4-6 inches between quilting.

Most of our patterns are priced at 1 ½ ¢ per square inch and can be expected to deliver approximately 2-4 inches between quilting.

Patterns with less than 2" between quilting are priced at 2¢ per square inch. This would include our very popular "tight stipple".

We charge additional ½ ¢ per square inch to trim appliqué work on baby quilts, and to avoid 3D embellishments. All other trimming will increase your cost by 1¢ per square inch.

Custom quilting starts at 4¢ per square inch.

If you are considering us for your machine quilting needs, please visit our blog for some important information on preparing your quilt top for machine quilting.
