

Cheshire East Council has undergone a local government re-organisation since its inauguration in 2009, with responsibility for some buildings and services being transferred to local Town Councils, and Trusts.

As a result of the re-organisation, some services have been transferred to other existing sites, and some to purpose built centres.

No buildings or services have been closed as a direct result of Government cuts. Where a facility or service has been closed, this is usually a result of low levels of demand. Decisions to close will be based on improved financial housekeeping within the organisation.
