(Left) x1  
Roof Clips x2  
Floor Plate x1(Engraved "2<sup>nd</sup> STOREY")

Side Decorations Male x4

Side Decorations Female x4

Door x1

Door Supports x2

## Assembly Instructions:

We recommend using PVA (or white) glue and that some parts are best painted **PRIOR** to gluing the building together.

1. Glue along bottom and side edge and tabs of **Wall with Doors and Windows** and **Side Wall** and insert into corresponding slots as shown. **Note:** The **Wall with Door and Window** will only fit into one position on the **Floor Plate**.

2. Glue along bottom and side edge and tabs of **Wall with Windows** and **Side Wall** and insert into corresponding slots as shown.

3. Using the following Pictures as a guide, glue the **Top and Bottom Wall Decoration Pieces** and **Wall with Doors Bottom Decoration (Left)** (circled in **RED**) to the walls as shown.

Front Wall with Doors and Windows

Back Wall with Windows

4. Glue **Roof Clips** into slots in **Floor Plate** on **Side Wall** as shown here circled in **RED**. Repeat this step for the other **Side Wall**.

Side Wall

Roof Clips

Note: There are NO **Top Wall Decorations** on the **Side Walls**. This is to allow for the **Roof** or subsequent floors to be fitted.

5. Glue the **Side Decorations Male and Female** together as shown to make left and right handed versions.

5. Glue the **Side Decorations** to the corresponding slots in the join between **Front and Back Walls** and **Side Walls**. The 3mm notch in the **Side Decorations** goes uppermost. Ensure the **Side Decorations** sit flush with the walls.
