Benefit coverage change notice:
Please talk with your doctor
about your prescription.

Dear [REDACTED]

We want you to know about an important change coming to your prescription drug coverage on **10/15/2014**. As of this date, your prescription benefit will no longer cover prescriptions for compounded medications containing the following:

BUDESONIDE MICRONIZED POWDER

BASE, PCCA LOXASPERSE POWD

VANCOMYCIN HCL POWDER

Why your coverage is changing

The U.S. Food and Drug Administration (FDA) defines a compound medication as one that requires a licensed pharmacist to combine, mix or alter the ingredients of a medication when filling a prescription.

The active ingredients within these compounds are FDA approved, but the FDA does not approve the quality, safety and efficacy of the compound medications. When the above ingredients are mixed into a compound medication, they are no longer FDA approved. Since your prescription plan does not cover investigational, experimental or non FDA approved products, this compounded medication is no longer covered by your plan.

To avoid paying the full cost of your medication, you should:

- Ask your doctor for a new prescription for an FDA-approved drug *before your next fill*.
- Be aware that this new prescription may still require further review and/or approval to be covered under your plan.

Please understand that because the medication you're currently taking will no longer be covered under your plan, you could pay the full cost if you continue taking it. So, it's important that you ask your doctor for a new prescription before 10/15/2014. For any questions, please call the number on your member ID card.

Sincerely,

Andrew R. Behm

Andrew R. Behm, Doctor of Pharmacy
