Dear Mrs. Kramer:

Thank you for your letter to the Centers for Disease Control and Prevention (CDC) expressing concerns regarding the American College of Medical Toxicology (ACMT). Your message was shared with the appropriate CDC subject matter experts for review and forwarded to my office for a response.

All eligible applications for federal grants are objectively reviewed, scored, and ranked based on established evaluation criteria published in the announcement. During the objective review process, CDC thoroughly and consistently examines applications to ensure selections best meet the needs of the respective public health program.

Thank you again for sharing your concerns and for your support of CDC's public health mission.

Sincerely,
