* - A basic survey on Google, produces a figure of 2.2 Billion Christians. While I know it is impossible for us to know how many Christians there are, I am working on an estimate here. So if I break down this number, I find (included within this figure) 1.2 Billion Catholics, 85 Million Baptists (officially stated there are 100 Million, but understand that there are 30 Million in the USA, now we are told that half that number believe Christ sinned, so we have 15 million left in the USA), 15 Million Mormons, 18 Million Seventh-Day Adventists, 8 Million Jehovahs' Witnesses, so if we add all these numbers and subtract the given information we have 944 Million but if we surmise that many of these are playing church and/or not genuinely saved that bearing a liberal numbering let's suppose there are 900, 000, 000 (900 Million) Christians.

** - A basic estimated count is thus: estimated 230 cruise ships, capable of carrying approximately 50,000 each = 11.5 Million; Estimated Shipping, Cargo and Tanker Ships: 13,559 with approximately 25 each = 338,975 bringing an estimated total of an estimated 11.8 Million.

*** - Battle area - Valley of Jehoshaphat (600 feet wide at top / 20 miles long). The Kedron Brook flows through the valley and is on average 3 feet wide (we will round up and say 5 feet) Average height of a horse 14.2 hands (or 4 feet 10 inches - we will round up to 5 feet); Flowing blood 180 miles or 950,400 feet; Amount of blood in human body 6 quarts or 1.5 gallons. Nw this would give us (Minimum width using Kedron Brook) length (flowing blood) 950,400 feet x depth (horses bridle) 5 feet x width (Kedron Brook) 5 feet x 7.48 (Convert cubic foot to gallons) / 1.5 (Gallons in human body) = Death toll of 118,483,200 or we round to 119 Million.
