You won't know until you start growing up and learn all different things and learn as much as you can and learn everything you can

Train you brain to learn as much as you can and be quick thinking and level headed

You can start now in your brain by think you are and believing you are smart

You have so much to learn and lots of time to do it but never ever forget to be what you are at the moment a child

So the different things that you try and do you will find in yourself what you are best at

**Note:**

**Bryan was told by God that demons are in the computer and web and this is true it is amon ra or jezebel and you are tempted say when a filth site (sex) pops up now if your heart is lifted up then it is sin in you and the demon doing it and from then on you are always being tempted more and more.**

**It simply amazes me the amount of crime shows on the TV you are pleasing the beast within.**

Paul Vincent Cleary

Because you are a threat and people must know your conversation with me and people in fb maybe also, if they stop you then what support do I have then remember what God told you and how dare you have that attitude towards me about God you should not get angry with me or God

12:44pm

People are not listening to me to support me now you have had a vision and can say it to be 100% true and if people will listen to you then they will support me, now if I win satan is destroyed and he will do anything or use anybody to stop it and that includes to even threaten you because you threaten him

Try and using tools on the web to see if your computer internet security is good enough I have the following and I have yet to be stopped or interfered with.

Latest Norton's Internet Security and always up to date

Malwarebytes it is free or you can pay for the better version \$20

Advanced System Care 6 with internet and malware security it is free or \$20 for the better version

And most importantly and most people don't know about is on your computer under programs is Windows Defender and it is normally never set up right by the owner of the computer
