Bottom Wall Decoration x2

Roof Clips x2

Side Decorations Male x4

Side Decorations Female x4

Wall Centre Decorations x2

Door x1

Door Supports x2

Assembly Instructions:

We recommend using PVA (or white) glue and that some parts are best painted **PRIOR** to gluing the building together.

1. Glue along bottom and side edge and tabs of **Wall with Doors and Windows** and **Side Wall** and insert into corresponding slots as shown.

2. Using the following Pictures as a guide, glue the **Top and Bottom Wall Decoration Pieces** and **Wall with Doors Bottom Decoration (Left)** (circled in **RED**) to the walls as shown.

Front Wall with Windows

Back Wall with Windows

3. Glue **Roof Clips** into slots in **Floor Plate** on **Side Wall** as shown here circled in **RED**. Repeat this step for the other **Side Wall**.

Side Wall

Roof Clips

Note: There are NO **Top Wall Decorations** on the **Side Walls**. This is to allow for the **Roof** or subsequent floors to be fitted.

4. Glue the **Side Decorations Male and Female** together as shown to make left and right handed versions.

5. Glue the **Side Decorations** to the corresponding slots in the join between **Front and Back Walls** and **Side Walls**. The 3mm notch in the **Side Decorations** goes uppermost. Ensure the **Side Decorations** sit flush with the walls.

6. Glue the **Wall Centre Decoration** into the slot on the centre beam of the **Back Wall**, with the upper part covering the Top **Wall Decoration** and the bottom part covering the **Bottom Wall decoration**. Repeat this process for **Front** and **Back Walls**.

7. Glue or place the internal wall where appropriate.
