Are YIFY and YTS the same?

One of the foremost common queries among the audience is – Are YIFY and YTS the same? Let's draw an end to that question.

YIFY Torrents was named after its founder Yiftach Swery. The location wants to provide free downloadable content on its platform.

After being banned by authorities within the UK, it came up with another website named yify-torrents.im, thus allowing users to access YIFY.

However, in 2014, when Yiftach decided to step down from YIFY, the location was renamed/rebranded as YTS (an abbreviation from YIFY Torrent Solutions).

Hence, to answer that question, YTS and YIFY are an equivalent.

YTS went down – Why?

It is fair to mention that **YTS** gained tons of recognition among BitTorrent sites up until 2015 when the movie Association of America filed a lawsuit against it for "facilitating and inspiring massive copyright infringement".

The site's popularity started plummeting and was eventually taken down. However, YTS browser or YIFY browser continues to work under a variety of names, and lots of fans have deemed those as the new YIFY.
