RE: A Vote to Bomb Syria for Citizen Poisonings is a SLAPP in the Face to Me & to U.S.
Environmentally Disabled & Dying

Honorable Senator Feinstein & Senator Boxer,

The American public is tired of feeling manipulated, including to start wars in the Middle East. Evidence that any new governors of Syria would be any more kind to the people than the current government is non-existent. Evidence that thousands more will be harmed in the region should the U.S. ignite the flame via a bomb strike, is strong.

Bombing Syria at this point in time may not be the wisest battle to pick in the best interest of the American public to stop government endorsed poisonings. In fact, it is a slap in the face to the American public and to me personally that the U.S. government would bomb for alleged chemical poisonings in another country. I and the citizens of this country have been begging our leaders for years to stop the scientific fraud in U.S. policy that it is proven the toxins of mold could never reach a level to poison us. Do you even realize how many people are being poisoned here at home because the U.S. Senate HELP chose to turn a blind eye to federal contractors publishing scientific fraud on behalf of the U.S. Chamber of Commerce in 2003 to influence policy and courts? I think you do.¹

I have met with your legislative assistants on numerous occasions over the years. As you are well aware I was jailed last year, coram non judice, in California with documents falsified by the courts themselves to try to conceal the scientific fraud in policy. I.e. The U.S. government, its private sector contractors and influential lobbyists have been using a never vetted risk assessment model to claim false proof of safe levels of biocontaminants in water damaged buildings (WDB). This is to stave off liability for causation of illness and death from debilitating poisonings by biocontaminants in WDB -- by the use of the mass marketed, U.S. Congress backed, scientific fraud.

¹ July 2013 letter faxed to Senators Boxer & Feinstein et al, regarding US Senate & California Court willful concealment of scientific fraud in U.S. environmental public health policies on behalf of the U.S. Chamber <http://freepdfhosting.com/98a65b9bc6.pdf>

As you are aware, along with the Senate turning a blind eye to mass marketed scientific fraud endorsed by members of Congress; falsified court documents -- used to frame me for libel in California Strategic Litigation Against Public Participation (SLAPP) to make me falsely appear to be a liar for daring to expose in 2005 of how the scientific fraud became policy -- aid the slow poisoning of U.S. citizens to continue and to remain concealed from public light.

As you know, the California courts falsified documents to conceal that a retired U.S. Assistant Surgeon General, Bryan Hardin, was an undisclosed party to the eight years of malicious litigations. They concealed that his business partner in VeriTox, Inc., Bruce Kelman, committed perjury to manufacture a needed reason for my alleged maliciousness of exposing the fraud -- while collusively framing me to defraud the public.

As you know, Veritox and their principals are federal contractors with Mr. Hardin and Mr. Kelman being the authors of the scientific fraud. Last year, the California courts along with Veritox's "legal" counsel were trying to terrorize me into signing a false confession of being guilty of libel for a sentence I never even wrote – to conceal that they KNOW how many U.S. people are being slowly poisoned by the collusive corruption of government and its contractors via the usage of Veritox's never vetted science in U.S. policy and U.S. courts.

As you know, when I refused to be coerced to sign a false confession of being guilty of libel, I was incarcerated in San Diego, physically harmed and given a false FBI record to conceal the true reason I was jailed, all coram non judice. That is a felony committed against me by those whose sole function is to assure laws are upheld.

As you are aware, not one judiciary or clerk or US DOJ contractor or federal lobbyist has been punished for the defrauding of the U.S. public by felonious means – as U.S. citizens continue to be debilitated and poisoned by the microbial toxins to this very day. It is not just the mold issue in which the scientific fraud is being employed. Never vetted assumptive extrapolations are being allowed to be used to claim false proof of safety of chemicals by many factions of the U.S. government.²

As my elected U.S. Senators how can you, in good conscience, endorse bombing Syria for poisoning its people when the U.S. government's private sector contractors have been permitted to resort to criminal means in the U.S. to conceal that people here at home are being slowly poisoned? It does not make sense that you could be so altruistically concerned of a corrupt government causing fourteen hundred chemical poisonings in the Middle East; yet be so callous to show no concern for thousands of people who are being poisoned in the United States and that it is being concealed by criminal acts of the courts in your home state of California, at the highest level.

² 8/14/13 NRDC Switchboard "USFDA Allows Chemicals in Food Despite Lack of Toxicity Testing" http://switchboard.nrdc.org/blogs/jsass/usfdaAllows_chemicals_in_food.html

So please, do not insult me and the environmentally disabled in the U.S. by encouraging the public to become enraged at a government who allegedly used criminal means to poison its people, to sway U.S. public opinion toward the need to bomb -- unless you are also intending to advocate bombing those who have employed criminal means in the U.S. to conceal government aided slow poisonings right here at home.

Rather than Syria, a more effective strategic strike for the greater benefit of the U.S. public to stop criminals in government causing poisonings would be 455 Golden Gate Avenue, San Francisco, CA. In the public's best interest, I suggest that you bomb your home state court leaders with demands for production of the (impossible) evidence that they are not concealing falsified material court documents in SLAPP. This is aiding the scientific fraud of the U.S. Chamber and U.S. Department of Justice toxic tort expert defense witnesses, Veritox, Inc., to continue to stealthily poison thousands in the U.S.

Please let me know when the bombing of demands for production of documents from California Chief Justice Cantil-Sayauke, the California Judicial Council (JC), the Administration of the Courts (AOC) and the Commission on Judicial Performance (CJP) are set to commence at 455 Golden Gate Avenue. I feel certain that you will meet with no public resistance to commence this bombing to stop government backed poisonings. No U.N. authorization or other country endorsement is required for you to act. Only troops of lawyers will need to be deployed to California. (and while you are at it, please ask the California court leaders what happened to the missing \$500M in court construction funds)

The United States President and Congress have the power and the moral responsibility to the American public to immediately put an end to the government poison of never vetted science being used to deny causation of environmental illnesses and deaths, concealed by criminal acts in the California courts. On behalf of the American public, I thank you in advance for your prompt and properly directed strategic strike at 455 Golden Gave Avenue, SF, CA to stop a government's criminal acts of poisoning its people.

Sincerely,

Mrs. Sharon Noonan Kramer
