

# REGROW RECEDING GUMS

Get back your gums naturally in few weeks.

The main causes of receding gums are bacteria and 'brushing too hard'. If you would like to put a stop to your receding gums, make sure you are brushing REALLY, REALLY gently (especially around the gum line) and do the hard work for you by killing the bacteria.

The doctor strongly recommends Dental Pro 7, and it is trusted by Patients around the world. This liquid magic is an excellent decoction of natural herbs especially combined to improve gum growth.
