

LANDSCAPE PHOTOGRAPHY

Research, Plan, Accomplish

Presented by Darren Stones

Join Darren Stones at the Essendon Camera Club to be part of an interactive discussion about how you can improve your landscape photography. Darren will guide guests through a process in how to research, plan and accomplish a series of photographs with the purpose of sharing them in various ways.

Darren will discuss how choosing a favourite landscape location can accelerate the learning process and lead to a photographer improving their technique, style and motivation. Guests will be encouraged to share their thoughts and experiences and ask questions. Visitors welcome.
