

The Growing Hazard of Mold Litigation

Papers commissioned by the U.S. Chamber Institute for Legal Reform and the Center for Legal Policy at The Manhattan Institute

Released July 17, 2003

About The Authors

Dr. Bryan D Hardin GLOBALTOX

Bryan D. Hardin, Ph.D., holds positions as a senior consultant with GlobalTox and Adjunct Assistant Professor at the Rollins School of Public Health, Emory University. He was commissioned into the US Public Health Service and began his public health career with the National Institute for Occupational Safety and Health (NIOSH) in 1972, where he served in research, policy, and management roles, culminating as Deputy Director of NIOSH and Assistant Surgeon General in the Public Health Service.

Dr. Hardin holds a Ph.D. in Environment Health Sciences from the University of Cincinnati. Dr. Hardin is a full member of the American Association for the Advancement of Science, the American Industrial Hygiene Association, the American Public Health Association, and the Teratology Society. He has served on working groups of the World Health Organization, the International Labor Office, and the International Agency for Research on Cancer.

Coreen A. Robbins, Ph.D., C.I.H. GLOBALTOX

Coreen A. Robbins, M.H.S., Ph.D., CIH, holds a position with GlobalTox, Inc. as a consulting Industrial Hygienist for projects in field investigations and in litigation support activity. She has approximately 13 years of experience in industrial hygiene and has served as a consultant in many investigations throughout the U.S.

Dr. Robbins holds a master's degree in Occupational Safety and Health (1989), and a Ph.D. (1995) in Environmental Science from the Johns Hopkins University. Dr. Robbins is also a Certified Industrial Hygienist (CIH). Dr. Robbins has extensive practical experience in conducting industrial hygiene surveys in areas including indoor air quality, mold, asbestos and man-made mineral fibers, chemical exposure assessment and industrial noise exposure. Dr. Robbins is a full member of the American Academy of Industrial Hygiene and the American Industrial Hygiene Association (AIHA), and an affiliate member of the American Conference of Governmental Industrial Hygienists. She is currently serving on the AIHA's Task Force on Microbial Growth as the representative for the AIHA Toxicology Committee.

Andrew Saxon

Chief, Division of Clinical Immunology and Allergy
UCLA School of Medicine

Andrew Saxon, MD, is a professor and Chief of the Division of Clinical Immunology and Allergy at the UCLA School of Medicine. Dr. Saxon has over 25 years of experience in immunology, he has published approximately 165 peer-reviewed research articles, and he has three patents in the immunology field. Since 1999, Dr. Saxon has served as editor-in-chief of the journal *Clinical Immunology*.

Dr. Saxon received his MD from Harvard Medical School. He is board-certified in Internal Medicine, Allergy and Immunology, and Diagnostic Laboratory Immunology. He is a member of the American Academy of Allergy and Immunology, where he serves on the Research Awards Committee, the Nominating Committee, the Primary Immunodeficiency Disease Committee and the Clinical and Diagnostic Immunology Committee; and where has served in the past as Chairman of the Basic and Clinical Immunology Section.

Dr. Bruce J. Kelman

GLOBALTOX

Bruce J. Kelman, Ph.D., D.A.B.T., holds positions as Principal and President of GlobalTox, Inc. Dr. Kelman has approximately 25 years experience in toxicology and has served as a consultant and expert in numerous investigations across North America. He has evaluated numerous claims of personal injury and health impacts from many chemicals and drugs, and has presented a variety of health risk concepts to policy makers, government regulators, citizen groups, and individuals involved in all aspects of the legal process.

Dr. Kelman holds a Ph.D. from the University of Illinois (1975) and is certified in toxicology by the American Board of Toxicology (original certification in 1980 with recertifications in 1985, 1990, 1995 and 2000). Dr. Kelman is a member of the Society of Toxicology, American College of Occupational and Environmental Medicine, American College of Toxicology, American Society for Experimental Pharmacology and Therapeutics, Society for Experimental Biology and Medicine, and Teratology Society.

A SCIENTIFIC VIEW OF THE HEALTH EFFECTS OF MOLD

Nevertheless, except for persons with severely impaired immune systems, indoor mold is not a source of fungal infections, and current scientific evidence does not support the idea that human health has been adversely affected by inhaled mold toxins in home, school, or office environments. Thus, the notion that “toxic mold” is an insidious, secret “killer,” as so many media reports and trial lawyers would claim, is “junk science” unsupported by actual scientific study.

U.S. Chamber Institute for Legal Reform

The U.S. Chamber Institute for Legal Reform was founded in 1998 as a 501(c)(6) tax-exempt, separately incorporated affiliate of the U.S. Chamber of Commerce. The mission of ILR is simple: to make America's legal system simpler, fairer and faster for everyone. ILR's multi-faceted program seeks to promote civil justice reform through legislative, political, judicial and educational activities at the national, state and local levels.

Center for Legal Policy at the Manhattan Institute

The Center for Legal Policy at the Manhattan Institute is a leading voice for reform of America's civil justice system. The Center's mission is to communicate thoughtful ideas on civil justice reform to real decision-makers through books, publications, conferences and public or media appearances. Founded in 1986, hundreds of news reports have cited the Center's work, with The Washington Post going so far as to call Senior Fellows Peter Huber and Walter Olson the "intellectual gurus of tort reform."
