New York, NY 10036

December 18, 2015

Dear Healthcare Provider,

Given recent media coverage, you may have concerns regarding the continued availability of Daraprim® (pyrimethamine).

**We are writing to assure you that Daraprim remains available and is unaffected by these events.**

Turing Pharmaceuticals is committed to ensuring patient access and affordability for Daraprim and has pledged that no patient needing Daraprim will ever be denied access. Our Daraprim Direct program continues to provide physicians and their patients with multiple assistance options.

We would like to reiterate the programs intended to ensure accessibility and affordability of treatment to patients.

- Uninsured patients who meet eligibility criteria have access to Daraprim for no out-of-pocket cost through Daraprim's patient assistance program.
- Patients with Commercial insurance are not obligated to pay more than \$10 out-of-pocket for their prescription.
- Patients with Medicare Part D insurance coverage have access to a charitable foundation, which Turing donates to, to assist with affordability for their disease treatment.

All of these programs are attainable by contacting the Daraprim Direct program at 1-800-222-4991. Daraprim and its patient access programs are only available through Daraprim Direct. Any questions related to accessing Daraprim can be sent to [daraprim@turingpharma.com](mailto:daraprim@turingpharma.com)

As a research-based pharmaceutical company, we are committed to discovering, developing and improving lifesaving and life-enhancing medicines for severe conditions and neglected diseases. We are firm in our commitments to the medical community and the patients they serve.

Sincerely,

Nancy Retzlaff  
Chief Commercial Officer  
Turing Pharmaceuticals
