

MULTI USE BUILDING (Garage, Fire Station, Warehouse)

Contents: (Parts Count This Kit 70)

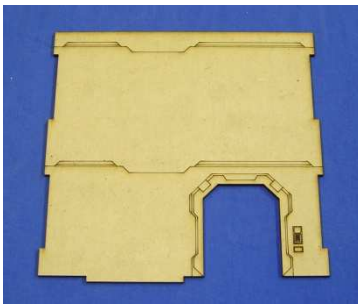

Sidewalk x1

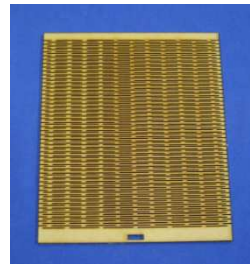

Back Wall x1

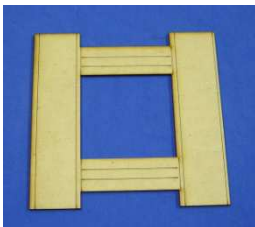

Front Wall x1

Side Wall x2

Garage Doors x2

Vehicle Lift x2

Inner Guide Rail x4

Upper Guide Rail x4

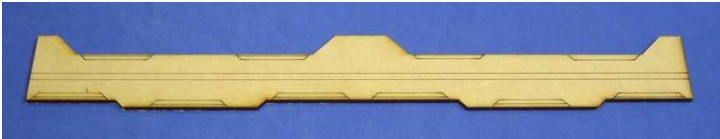

Main Guide Rail Support x4

Lower Curved Guide Rail x4

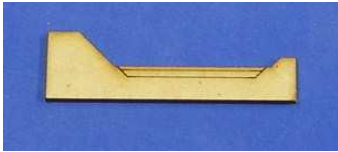

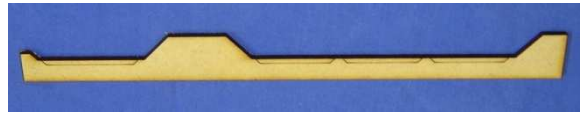

Front and Back Top Wall Decoration x2

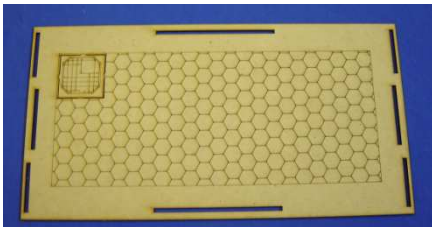

Back Wall Centre Decoration x1

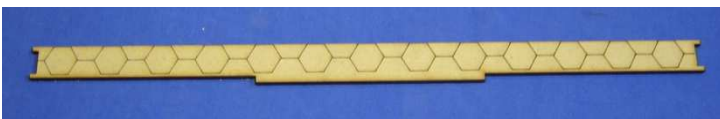

Back Wall Bottom Decoration x1

Side Wall Bottom Decoration x2 (Left and Right Hand Versions)

Roof x1

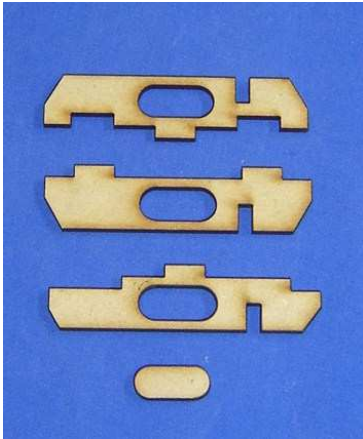

Long Roof balcony x2

Short Roof Balcony x2

Roof Clip x2

Side Decorations Female x8

Side Decorations Male x8

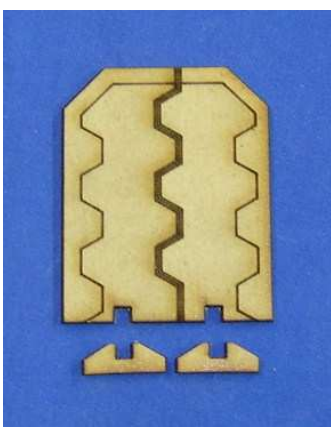

Wall Centre Decorations x3

Gribbly Bit x1

Sliding Door Handle x2

Roller Door Top Plate Guide x 4

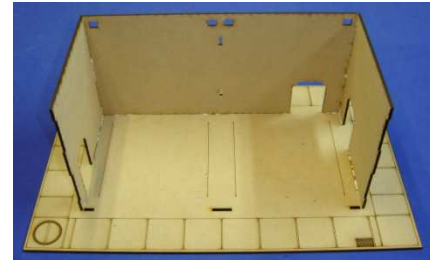

Door x2

Door Supports x4

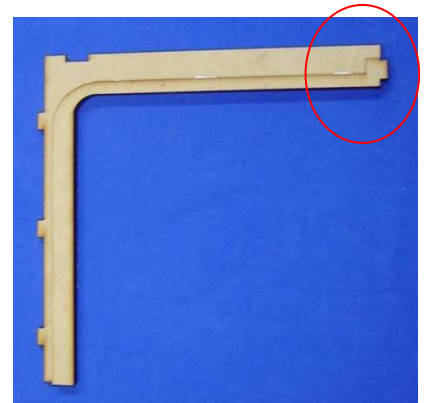

Assembly Instructions:

We recommend using PVA (or white) glue and that some parts are best painted **PRIOR** to gluing the building together.

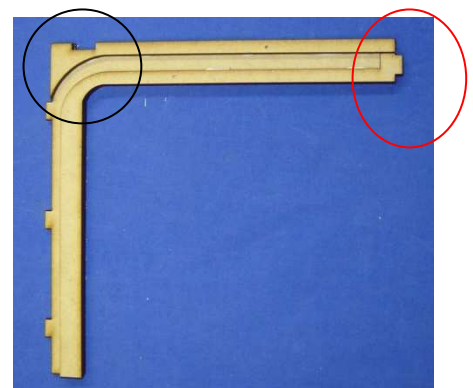

1. Glue along rear edge and tabs of **Back Wall** and insert into corresponding slots on long side of the **Sidewalk**. Glue edges and tabs of **Side Walls** and glue into corresponding tabs, making sure the external decorations face outwards.

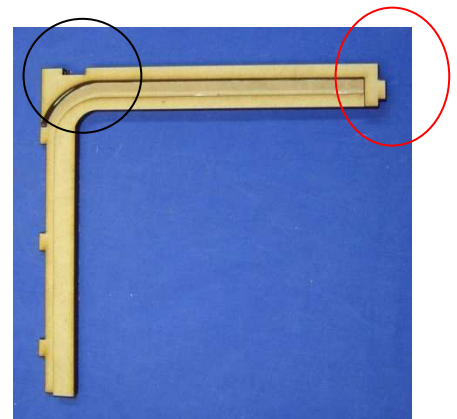

2. Glue **Lower Curved Guide Rail** to **Main Guide Rail Support** as shown. Aligning rear tabs circled in **Red**.

3. Glue **Inner Guide Rail** to top of **Main Guide Rail Support** as shown. Again, aligning with rear tab circled in **Red** and with top tab, circled in **Black**.

4. Glue **Upper Guide Rail** to **Inner Guide Rail** as shown, align as in previous steps, with rear tab circled in **Red** and with top tab, circled in **Black**.

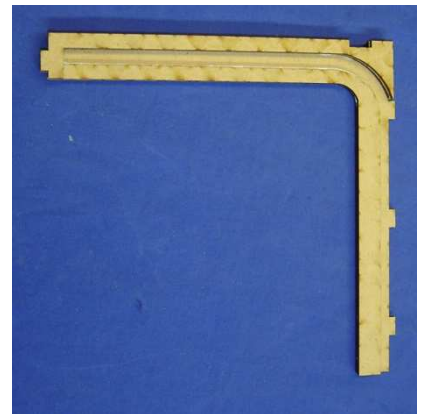

5. Glue the **Roller Door Top Plate Guide** into the top Tab of completed **Garage Door Guide Rails** as shown.

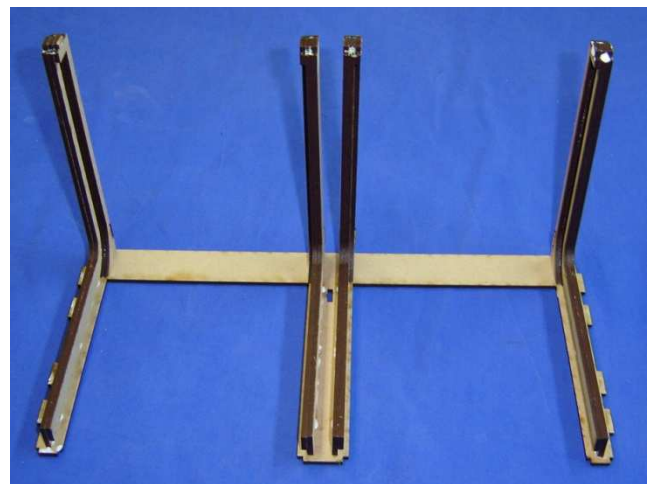

6. Repeat Steps 2 to 5 to make an identical copy of the **Garage Door Guide Rails**.

7. Following steps 2 to 5. Make two **Garage Door Guide Rails** that are a **MIRROR** image of the previous **Garage Door Guide Rails**, as shown.

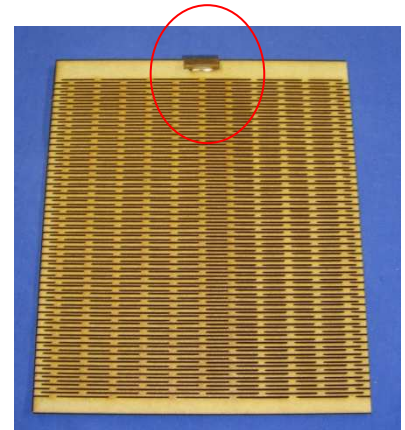

8. Glue along edge and tabs of **Garage Door Guide Rails** and insert into corresponding locating slots on rear of **Front Wall**, as shown.

Side view

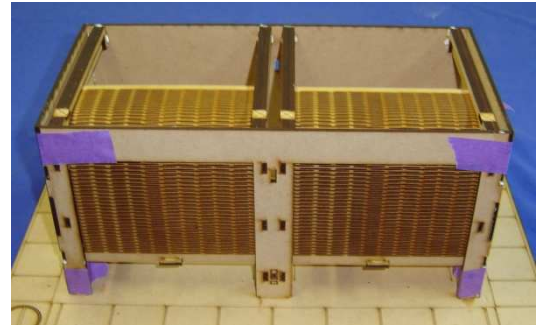

9. Glue the **Garage Door Handle** to the tab in the **Garage Doors**, as shown.

10. With the **Front Wall** facing downwards, insert **Garage Doors** into **Guide Rails**. The **Garage Door Handles** face outwards, along with the darker cut surface of the **Garage Door**.

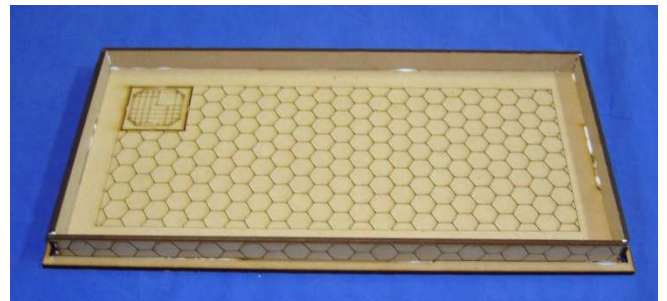

11. Glue along edge and tabs of **Front Wall** and insert into corresponding locating slots on **Side Walls** and **Sidewalk**. Align and glue the 9mm square tabs on the upper section of the **Guide Rails** with the 9mm square holes near the top of the **Back Wall**.

Hint: low-tack masking tape to secure the edges whilst the glue dries is handy at this point.

12. Glue the **Long Roof Balcony** and **Short Roof Balcony** pieces into the corresponding slots as shown.

13. Glue the **Roof Clips** into the slots on the short side of the **Roof** as shown.

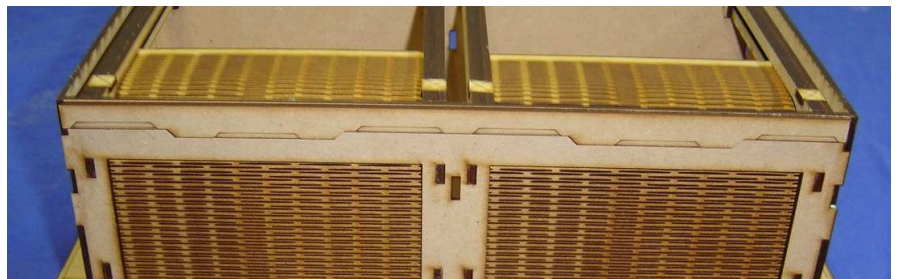

14. Glue the **Top Wall Decoration, Back Wall Centre Decoration** and **Back Wall Bottom Decoration** to the **Back Wall** as shown.

15. Glue the **Side Wall Bottom Decorations** to the **Side Walls** as shown, taking note of the orientation of Right and Left Handed Versions of this part.

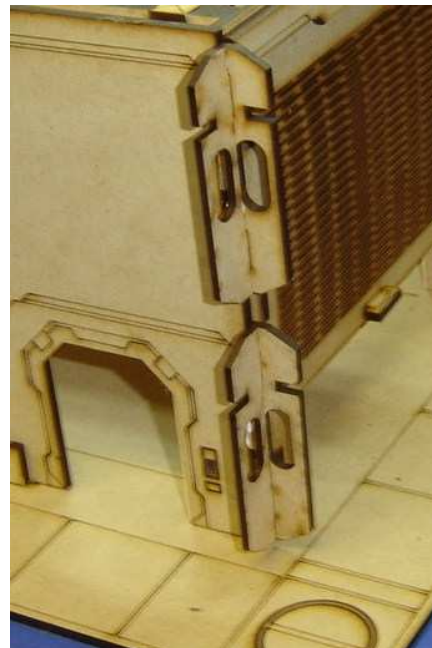

16. Glue the remaining **Top Wall Decoration** to the top of the **Front Wall** as shown.

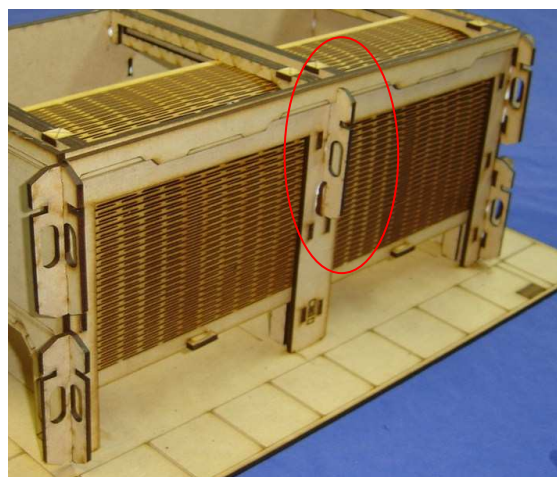

17. Glue the **Side Decorations Male and Female** together as shown to make left and right handed versions.

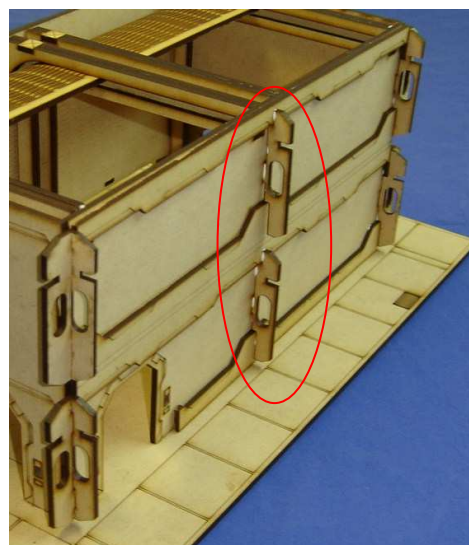

18. Glue the **Side Decorations** to the corresponding slots in the join between **Front and Back Walls** and **Side Walls**. The 3mm notch in the **Side Decorations** goes uppermost. Ensure the **Side Decorations** sit flush with the walls.

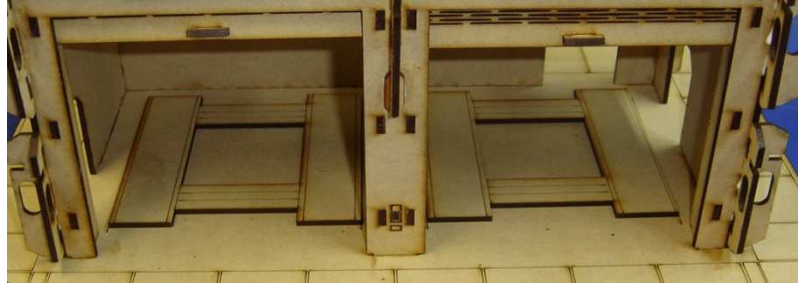

19. Glue the **Wall Centre Decoration** into the slot on the centre beam of the **Front Wall**, with the upper part covering the **Top Wall Decoration** and the bottom part covering the **Gribbly Bit**.

20. Glue the **Wall Centre Decoration** into the slots in the centre of the **Back Wall**, with the upper part covering the **Top Wall Decoration** and the bottom part covering the **Back Wall Centre Decoration** and **Back Wall Bottom Decoration**.

21. Glue or the **Vehicle Lift** to the **Sidewalk** inside the M.U.B as shown. Leave this part out if using the M.U.B for another purpose building.

Hint: The Vehicle Lifts are best painted prior to gluing them to The floor.

22. Glue the **Door Supports** into the corresponding notches in the **Door** bottom edge.
