Installation Checklist

Trading name:

Address:

County

Nature of Business

Contact Name

Telephone:

Mobile:

Email:

Electrical supply:

13 Amp Plug for the coffee grinder within 1 meter of the proposed coffee machine?

16-20 Amp Is there an isolated surface mounted 16/20 amp switch?
Hard wire: (Connect directly to the circuit breaker via separate switch)

Water supply:

Do you have a mains water supply for the coffee machine terminating in a 3/4 inch connection?
I.e. washing machine connection? This has to be available exclusively for the coffee machine water hose.

Does the water pressure on site have normal operating pressure (1-10 bar (15-150psi))

Water waste:

Do you have a waste pipe set exclusively aside for the coffee machine?
If you don't have the waste pipe set up you could a waste bucket temporarily.

Coffee counter:

Does the counter have all necessary holes predrilled?
It may not be necessary for any counter drilling but if you do need this, it needs to be done before the engineer arrives on the site

Please ensure that all works are completed before any engineer is sent out.

The engineer is paid at an hourly rate and you are allocated a set amount of time. Should the engineer have to wait or carry out additional works there will be an additional charge

Warranty

Your 1 year factory warranty covers any material fault found on the machine. Any faulty parts are replaced within the stated Warranty period. Labour charges may be extra depending on the warranty.

You will be asked to state the nature of the problem over the phone and an engineer will be sent out as soon as possible to rectify the problem.

3 Year extended warranty:

When you use Caffé Agust coffee exclusively we extend the manufactures warranty, by an extra 2 years to give you unrivalled peace of mind.

Just buy our coffee and change the water every filters 6-12 months

Your factory warranty does not cover the following:

- Poor water quality.
- Lime scale gypsum, or chalk damage.
- Very high/low water pressure.
- Faults that occur due to failure to clean machine or change water filter.
- Coffee grinder adjustments.
- Milk frother adjustments.
- Coffee programme adjustments.

All our coffee machines come fitted with a Brita water filter. This prevents lime scale damage and you will have cleaner water, no after taste from the chlorine, no build up of sediment and no costly call outs.

Installation

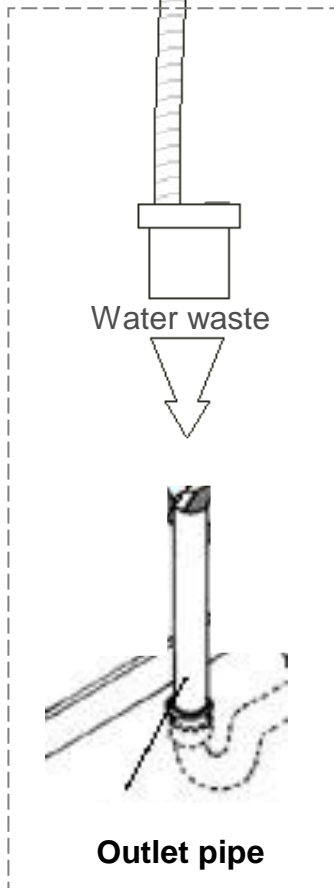

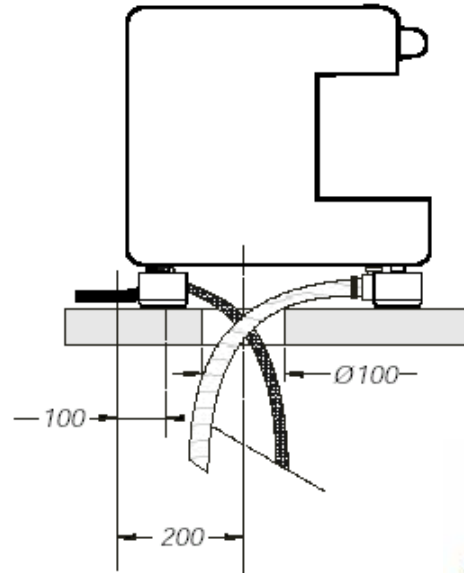

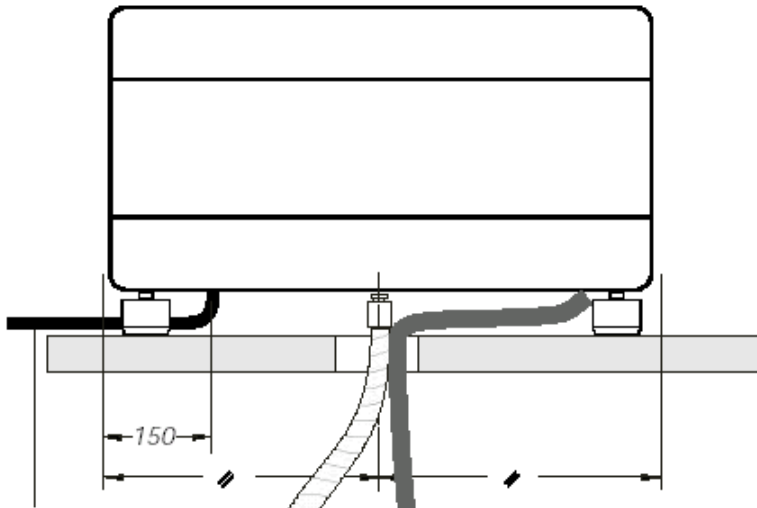

Your coffee machine comes with the following as standard:

- 1 x Delivery – Delivered by courier days proceeding or by engineer on the day.
- 1 x Training module – Full training session available after installation – Please have key staff on site.
- 1 x Installation- Installation will be carried out by a trained technician. Please ensure site is ready as extra cost may be incurred by delays. Allow up to 1 hour for the installation.

If you are unable to attend training on the appointed time an additional training module may be purchased and can be made by appointment.

1. INSTALLATION CONDITIONS FOR A NEW ESPRESSO COFFEE MACHINE

- ◆ **All connection elements** should be positioned no more than 1 metre away from the machine.
- ◆ **The water inlet** must have an individual stop tap, near to the machine.
- ◆ **The outlet pipe** must have a minimum diameter of 40 mm.
- ◆ **The electricity supply** must be adapted to the machine's specifications, and must be equipped with a linear protection device and a differential device which comply with current regulations.

Brita Water system

! If your water is hard then you need to install a water filter

! We recommend that you always install a water softener.

Water inlet tap

! Must have an individual $\frac{3}{4}$ stop tap 1 meter from coffee machine.
