

Renfrewshire Council

Response:

I can confirm that Renfrewshire Council has in the past and continues to look at its asset portfolio, to determine how it can improve the portfolio and ensure that the assets are fit for purpose for service delivery. While this has resulted in the closure of a number of facilities, this realignment of resources is as a result of the Corporate Property Asset Management Strategy along with other Asset Strategies rather than budget cuts.

Therefore I can advise that the Council does not hold any information matching the criteria in the request above.
