JACK CANFIELD

AMERICA'S #1 SUCCESS COACH

November 5, 2008

Kenneth Lesser
1370 Tennyson St.
Denver, CO 80204

Dear Ken,

I keep a Comfort Technology Clock next to my bed and another one on the credenza behind my desk in my office. What I have noticed at home is that I sleep more soundly, have better dreams, remember more of my dreams and awaken very refreshed. In my office I notice that I am able to stay calm, focused and sustain my energy for long periods of time no matter what chaos may be going on around me.

I also keep a Comfort Technology Clock on stage with me when I am conducting my Breakthrough to Success Seminars and Workshops. I know it helps keep me centered and energized during the long and intense days - especially when the workshops are in hotel ballrooms in large cities where there are so much EMFs to deal with.

I'm happy and appreciative that you're keeping me abreast of all these new technologies that enhance both my personal and professional life.

Sincerely,

Jack Canfield
CEO

International Spiritual Center

Comfort Technology Clocks offered by Advanced Living Technology are an example of the how science and spirituality work together to enhance life on the planet. I can testify to the energetic difference in both my home and office from using Ken's Comfort Technology Clock to neutralize the influence of electrical magnetic fields in the atmosphere and highly recommend his products to those who want to purify and uplift their environment.

Dannion Brinkley, New York Times Best Selling Author of *Saved by the Light*, founder of *Compassion In Action* for training hospice volunteers.

Dannion's testimonial from *News for the Soul* radio 12/22/03:

“Everybody I have a story. I’m knowledgeable of Ken and these products. I am very sensitive after being struck by lightning. You become very sensitive, and you’re always picking up mental thoughts of what people are going through because you become empathic is what’s happened to me. I use these products of Ken’s. I use the Bio Shield when I lecture, when I sit in front of the computer. I recently got the Comfort Technology Clock. And Ken made sure I got it promptly. I, like all of us, we have a lot on us. You know Compassion in Action and this television show and working on another movie and doing this radio show and finishing my book. **Been having a little trouble sleeping. I used the Comfort Technology Clock last night. I slept better than I have in the last two months because of using this product.** So I’d like everybody to realize that we are so bathed in this world of electrical interference. And our bodies are electrical, chemical machines. So as we listen about this product, **I can step forward unequivocally and say that these products not only work, but it’s literally a necessity in modern day life.** And I would like to support Ken in what he’s doing because these are tools that I have been using the Bio Shield for 5, almost 6 years and now this Comfort Technology Clock.

“One more thing about this product, Nicole. Everybody, when you feel tired. And we all feel tired, because we’re so stressed and we work really hard. I know Nicole does. And I know everyone else does. **This tiredness does not always come from us not getting our rest. It comes from picking up the electromagnetic interference, the magnetic radiation that comes from everything electrical, and it depletes our ability to absorb minerals, to digest our food, and it negatively affects our way of consciously keeping focused in what we’re doing. You will be amazed at what products like this will do for your everyday working environment as well as your mental health and spiritual attitude, which is very important in these times.**”

Dear Kenneth,

Thank you very much for sending me the Ultimate Comfort Technology Clock. I keep it by my bed and have found that I am sleeping much better these days.

Lynn Andrews, Author of the “Medicine Woman” Series

Ms. Andrews reports on her experiences with the Ultimate Comfort Technology Clock by sharing: “Its wonderful when something is beautiful, practical and healing. I am sleeping so much better and I can sense the change in the magnetic fields of the room.”

July 15, 2004

Dear Kenneth:

I've had Kenneth Lesser's Comfort Technology Clock on the table by my bedside for the past three months and, during that time; I've slept better than I have in years. I highly recommend it!

Thank you for such an easy way to bring more peace, harmony and blissful rest into our lives.

Gratefully,

Tony Burroughs,

Daniel Fanaberia
Film and Television Actor
<http://danielfanaberia.com>

Dear Kenneth,

First of all, I would like to congratulate you on bringing us a product that truly raises quality of life. My fiancée and I noticed a change in energy immediately after plugging in the Super Comfort Technology Clock in our bedroom. That night was the first night in a long time that I did NOT have a negative dream. I had been experiencing broken sleeping patterns with very distressing dreams, and I can say that I have not had a negative dream for almost two months now - the time that I have been living with my Super Comfort Technology Clock.

My two dogs, Billy and Becca, have also decided that the bedroom is a better place to be for them. My dogs find themselves spending more time in the bedroom, even the big screen television is on, when in the past the television usually had one of them escape the EMF's and leave the bedroom.

Finally, I would like to add that blind folded muscle-test experiments with the Super Comfort Technology lock on, and off, reassured me that my body was stronger and happier when the Super Comfort Technology Clock was plugged in!

All the best,

Daniel Fanaberia

[Eva M. Selhub, M.D. mini biography:](#) She is a passionate, articulate advocate of Mind/Body Medicine, enjoys a flourishing career as a speaker, teacher and media spokesperson as well as clinical success treating patients who have triumphed over serious medical conditions and destructive emotional patterns. A staff member of Harvard Medical School, Dr. Selhub served from 1999 until the end of 2007 as Medical Director of Mind/Body Medical Institute.

To whom it may concern:

As a medical doctor, the widespread lack of quality sleep is very concerning to me. Sadly over 50,000,000 Americans are suffering from the negative effects of insomnia and interrupted or inadequate rest. Research shows that even a slight improvement in a person's quality of sleep can have significant benefits for their overall health and wellbeing, particularly in regulating their stress response.

I became interested in this technology when my personal friend and renowned musician Steven Haplern raved about how much he liked having two of the Ultimate Comfort Technology Clocks. My own anecdotal findings are that I can enthusiastically report that I am sleeping better since I plugged in the Ultimate Comfort Technology Clock. I am delighted to recommend it and invite you to discover the benefits of this sleep enhancing Comfort Technology offered by Kenneth Lesser at AdvancedLiving.com.

Sincerely,

Eva Selhub, M.D.

RE: KENNETH LESSER

SUBJECT: COMFORT TECHNOLOGY CLOCK

It is my pleasure to endorse The Comfort Technology Clock as a useful and helpful aid in Environmental Support. I have used the Comfort Technology Clock and other BioEnergetic Technologies for several years to assist in creating a harmonious and supportive Energy Field in which I work and travel. Stress is frequently found to be a contributing factor to numerous serious diseases or health challenges. With typically many daily hours in front of the computers and also driving in my vehicle millions of others and I are exposed to sustained, high levels of constantly stressful EMF. With the stress relieving benefits of The Comfort Technology Clocks in my office, home and vehicle, I have less fatigue and more clarity in my activities. I recommend you experience these important products.

Thanks, Kenneth - and Thanks, Comfort Technology Clock!

Sincerely,

Enrico Melson, Executive Director, MD, MPH, FACPM, DAAPM, MHT, MBE

To Whom It May Concern:

We recently purchased two Ultimate Comfort Technology units from Ken Lesser. Since using them in our office, we have noticed an increase in energy levels with the staff and increased productivity. It is easier to work with patients, as they seem less stressed. Overall, I would say there is less stress in the whole office and a greater flow in the office. I was so pleased with these effects that I purchased some for my home.

Sincerely,

Scott R. McAdoo, D.D.S.

Dr. Susan Levy, D.C., author of the popular self-help book: "Your Body Can Talk" wrote the following dramatic clinical case study in the first few paragraphs of Chapter 8 of her book:

“Throughout her twenty-year broadcast writing and producing career, my co-author, Carol Lehr, has worked in television stations and production studios which emit incredible amounts of electromagnetic pollution. On a daily basis, errant energy from all manner of television broadcasting equipment, including TV monitors, video switcher panels, satellite dishes, computer editing and production units has whirred in Carol’s close proximity. This high concentration of electricity continually focused a great deal of electromagnetic pollution directly to Carol as she worked in the confines of these technical areas.

“In 1991, Carol began to experience mid-back and neck muscle spasms and other vague stress-related symptoms. Eventually, these became so severe that she considered giving up her profession. Instead, she chose to be evaluated by Clinical Kinesiology. Carol’s muscle tests consistently indicated electromagnetic and geopathic (invisible energies emanating from the Earth affecting the body) imbalances stemming from a heart imbalance.

“Treatment with acupuncture and magnets temporarily strengthened Carol’s Heart Meridian. However, returning, day after day to the same environment at the television station simply unbalanced her meridians once again. The decisive factor which eventually “cured” Carol’s heart imbalance and allowed her to continue her career, was the addition of an EMF-clearing device, from Advanced Living Technology, to her workspace.”

Dear Ken,

After using the Ultimate Comfort Technology Clock for three months I have noticed I go to sleep easier and feel less stress in general. I really like it for traveling as well.

Thank you,

To Whom It May Concern:

In Power Vs Force Dr. David Hawkins, M.D. asserts that “in an energy field of 600 or higher, anything can be healed.” For most of the 30-plus years I’ve worked in the healthcare field, I’ve intuitively known this to be true. There is much that contributes to the quality of the “healing field” in a healthcare office – the esthetic nature of the physical setting (colors, lighting, appointments, etc.), the naturalness of the systems and procedures and the consciousness and intention of the staff and practitioners.

One of the most valuable tools I’ve used to strengthen and enhance the healing field in my office has been the Comfort Technology units distributed by Mr. Ken Lesser. Since installing 7 of the Super Comfort Technology Clocks throughout the office, my staff and I have noticed a subtle but significant shift in the office’s atmosphere. Patients seem calmer and less stressed shortly after arriving in the office and appear to drop more quickly and easily than before into that inner place of peace and wholeness. One of my staff has also noticed a smoother transition through her monthly cycle; with less emotional and physical disruption than before the clocks were installed.

I wholeheartedly recommend the Comfort Technology Clocks to anyone who wants to increase the inner and outer peace, harmony and balance in their life!

Sincerely,

Steve Tashiro, M.S., D.C.

Dear Kenneth,

I am a very energy sensitive creature... I have to tell you that the minute I plugged in your Ultimate Comfort Technology Clock I could feel the difference in the energy of the room all through my body. The immediate difference was stunning! It was as if the energies within my surroundings snapped into balance. As the author of the international Best Seller, "The Children of Now" I have encountered thousands of children who are also extremely energy sensitive. I feel that your Comfort Technology will assist in relieving the children of energetic interference in their environments and perhaps even create more comfort for these sensitive kids... it sure has for me!

~ Meg Blackburn Losey. Ph.D.

JUBILEE

June 23, 2009

To Whom It May Concern:

Yes, I have seen the true benefits of the Comfort Technology Clock from Advanced Living, brought to us by Ken Lesser. I am a Naturopath who uses a lot of muscle testing in my practice, and some of my clients and I decided to test what would happen with the clock technology and their influences on our bodies. When we looked at how this Comfort Technology specifically worked for each of us in a large group, the results of my testing were very positive.

With the Comfort Technology activated, we found that these units did actually improve things in two key ways. Firstly, the Comfort Technology Clock cancelled out the distracting energies of the EMF (electro magnetic fields). Secondly and even more exciting for me as a Naturopath it created for us a POSITIVE effect. I have always said that it is being in the POSITIVE that really counts. While taking away the negative effects chaotic energies like EMF is helpful, it is not enough. Removing the negative is like putting money in an overdrawn checking account to get to a "Zero Balance." That is a step in the right direction, but not optimal. The way the Comfort Clock Technology affects us by putting things back in the black, not in the red – or even at zero. It is like having a positive balance in your body's functional bank account. Zero is not the goal; a supportive and POSITIVE functional process in the body speeds up the body's own healing process. In other words, it helps for faster healing.

To further explain... First we tested that the negative effects of the electromagnetic field in the room were cancelled out. With the Comfort Technology Clocks plugged in, the fluorescent lights, the machines in the room, etc., all registered back to 0% influence! Once we were certain these energy fields were harmonized, we then tested for our own physical function levels. With the Ultimate Comfort Technology Clock plugged in, we recorded some people in the group at up to 157% more function than what we had started at. Our potentials for functioning had increased! In other words, the Comfort Clock had made it possible for some to function higher with the clock technology as opposed to without it. The Comfort Technology Clock not only got rid of physical adversity, but it helped us surpass our own potentials physically.

My whole family and many of my clients can feel the difference - spiritually and physically. I can wholeheartedly recommend this Comfort Technology Clock to anyone who needs a boost and a shield from the bombardment of the world's negativity - electronically, physically and spiritually.

Most Sincerely,

M. Suzanne Weber, N.D.,
M.A., C.N.H.P., and CH

WHOLE HEALTHCARE FOR LIFE.

August 1, 2008

Dear Kenneth,

Our clinic at Pure Homeopathy is deeply appreciative of the Comfort Technology Clock. We are enjoying the many benefits of this amazing device. There is a feeling of peace and relaxation, and it has genuinely created space in all of us to take a deep breath and rest in each moment. What is incredible to witness, is how well behaved and calm the children have felt while sitting in the waiting room. Without a doubt, our patients and the staff seem to be calmer and have greater clarity and focus. The healing energies of this clock really enhance an individual's desire for wellness. Thank you for your dedication Kenneth, in continuing to find new ways to enrich and balance our lives in a safe and effective manner.

Sincerely,

To Whom It May Concern,

I have been a Doctor of Oriental Medicine for 25 years and my passion, joy and expertise is working with balancing energy in people's bodies for optimum health and well being.

I have had sleep problems over the years with trouble getting to sleep and many thoughts entering my mind at the end of the day. I am very sensitive to electromagnetic energies and have problems with flourescent lighting, microwave ovens and strange frequencies in general.

The first night I plugged in my Comfort Technology Clock, from Ken Lesser, I slept like a baby all night long and awakened feeling refreshed and rejuvenated like I feel after acupuncture or Reiki. I continue to feel wonderful using it and recommend it now to all my patients who have trouble sleeping or who feel stress of any kind at home or in the office. Ken even has products available for the car!

I highly recommend this Comfort Technology to anyone and Ken Lesser is a highly professional person in this new technology, offering a high level of customer service. He is great to work with and takes the time needed to explain all from A to Z.

I could not recommend these products more highly.

With highest regards,

Lisa Temple, O.M.D., L.Ac.

April 15, 2004

To Whom It May Concern:

I am writing to introduce you to Kenneth Lesser, CEO of Advanced Living Technology and the very important work he is doing to lighten our stress loads and support higher levels of health and well being. Almost 70 years ago, Dr. B. J. Palmer, D.C. wrote about the serious negative effects on the body from exposure to electromagnetic field (EMF) radiation, which now also comes from computers, cell phones and all the other electrical equipment.

When using my cell phone, my head would buzz, and I could feel the EMF giving me a hard time. With my BioElectric Shield that's a thing of the past. I've added the Shields to my practice and see them testing well on patient after patient.

Adding the Comfort Technology Clocks in my office resulted in an improvement in the functioning of my staff. Kenneth's high integrity and quality products are beyond reproach.

Sincerely,

Jack Stone, D.C.

10/14/09

Dear Ken,

Since having the Comfort Technology Clock (3+ months in two different environments) I have seen a change in my sleep patterns. For years I have been an "early waker" who could then not get a full night's sleep.

Now, though I still usually wake up early, I can also usually fall back asleep and have a full night's rest. I think the Comfort Technology Clock has had a direct, positive impact on my ability to focus as well. Thank you for introducing this great technology to our society!

November 27, 2009

To Whom It May Concern:

In a world of ambient and random electromagnetic energies in which we are swimming, the Comfort Technology Clock offers a safe haven from this potentially harmful electromagnetic chaos.

Every day, in my work helping people with injured or dysfunctional brains, I use extremely tiny doses of those same energies, in the Radio Frequency band, to bring relief and comfort. The method is explained in detail on my website: stonemountaincenter.com and in my book: [The Healing Power of Neurofeedback](#), about which Ken Lesser has graciously interviewed me.)

So it is no mystery to me that electromagnetic energies can have profound effects on living creatures, likewise the harmonizing of those energies by the revolutionary Comfort Technology can give our "energy bodies" a break from having to make sense from the cacophony of "voices" (electromagnetic chaos) to which we are exposed. It is a technology as useful in the workplace as in the home.

I highly recommend this useful and soothing instrument!

Stephen Larsen, Ph.D.

November 27, 2008

To Whom It May Concern:

The Comfort Technology Clock works well no matter the time. Its original purpose was to protect and alter the energy in our living spaces. It's like doing Feng Shui on our high-tech electric world.

It seems to calm down those around them and has several other positive aspects including decreasing the affect and effects of EMF radiation.

I am so glad we got them!

Many Blessings of Gratitude,

Report on the testing of the Comfort Technology (11/9/09)

The Comfort Clock – WOW what an understatement. Let me explain. A few weeks ago I received a call from Ken Lesser of AdvancedLiving.com. He asked if I would consider assisting in a new ad campaign and web site design for The Comfort Clock. I told him OK and to send me one and I would conduct a group test at the Huna World Convention 2009. The Comfort Clock arrived a few days later and I plugged it in. During the next few days before the convention I could notice the difference. I will explain later. The convention ran 7 days, Sunday Through Saturday. We arrived on Friday night so we could have plenty of time on Saturday to set up all the cameras and sound equipment and get everything set up logistics wise as we were in a brand new building. We were the first to use it. I took the CLOCK (MORE THAN A CLOCK) on the trip. The head of Huna Research Inc. is Vince Wingo and he is THE MAN putting on the convention. We stayed with Vince at his home. I did not tell Vince about the CLOCK. I wanted him to be unbiased. I plugged the CLOCK in every night. On Saturday, I left the CLOCK at Vince's place. Now at the convention site there were five of us and three of the site staff. We took four hours setting up the room. Remember this for later.

On Sunday morning, I brought the CLOCK in and turned it on. Each evening I took it home and brought it back in the next morning. I did this for five days. During those five days the attendees were learning to sense energy and healing practices of the Ancient Hawaiians. They had become experts at scanning each other's bodies and had become very accurate in sensing old injuries and current medical conditions.

On the afternoon of the fifth day we gave them the assignment for all 24 of them to walk around the room and sense the energy in the room. Everything except people. We then sent them outside for a break. When everyone was out of the room, we unplugged the CLOCK. Let me take a moment to describe the layout of the room. As you enter the room, the audiovisual equipment was to the left at the back of the room. One ceiling fan was running to the right at the front of the room and had been running for the entire week. Now as the people reentered the room, they immediately sensed a major change in the room and were making comments like: "It feels bad in here (with a frown on their face.)", "I don't like the negative energy do you feel it", "Something is wrong", "I feel sick". Some even took a few steps and stopped. When others bumped into them and asked what was happening, they simply said, "Something is wrong". We asked them to gather just inside the door. We explained to them that there had been a Disturbance In The Force. And as young Huna Jedi their assignment was to find the disturbance.

Huna Research Inc.
1760 Anna Street
Cape Girardeau, MO
573-334-3478

They began wondering around the room looking for (sensing for) the disturbance. We just watched and noted the pattern. Everyone covered the room on their own. About a third stopped in the back left of the room. Almost everyone stopped under the ceiling fan. Think about this. Almost everyone picked up the energy from the ceiling fan that had before gone unnoticed and a good number of them found the absence of energy where there had been some before. AND there is more.

Remember the setup day. I asked Vince who was unaware of the test UNTIL NOW, how the setup Saturday had gone (the base line for this test). He immediately said, "It took us four hours on Saturday to do a job that should have taken one hour. We were all (we and the Inn staff) bickering with each other and since THEN we have had harmony and coherence all week".

So on the 6th DAY the clock was left OFF. The group was given the assignment to work among themselves to establish food specialty leaders for a group lunch. Each leader would be responsible for a lunch specialty i.e. Pizza, Burgers, Subway, Chinese. That person would take the orders, the money and place the orders for delivery. Chaos ensued. As you can imagine, we were not surprised. It was amazing how long this simple task took. We plugged the CLOCK back in and it was like just as if you had planned a pleasant delightful lunch. We never told the class of this last action.

Now let me share my personal experience with THE COMFORT CLOCK. It is mislabeled as far as I am concerned. I live on 11 beautiful acres outside of town. I have a new tractor and all the implements to look after this and other acreage. Realize what it is like to have a large garden. I say this so that you will understand that I am outside a lot. There is not even a power line on the place as the power comes in underground from an old dairy next to me. Also I am very familiar with electronics as I was a Master Electronics Instructor and was a licensed engineer for Radio Stations years ago. I still teach harmonics in my seminars with energy demonstrations. THE COMFORT CLOCK is like the BOSE Noise Canceling technology for Electro Magnetic Radiation (EMR). It creates a resonance NULLING frequency for 60 cycle and other EMR frequencies in its environment. In my home and office I have a lot of Electrical and Electronic equipment from computers to HD LCD TVs to Audio and Video Duplication equipment. I could tell a difference immediately when I plugged in the device. As I am trained to notice differences, I could see the difference in family members and other visitors to our home. We have a great place here and many often make the observation of HOW GREAT it FEELS to be out on our deck overlooking the lake. Those comments have increased since we started using THE COMFORT CLOCK. Can you anticipate what it will be like for you?

Comfort Technology Clock Reduces EMF Effects as Shown by Kirlian Photography

These images are computer generated representations of the finger corona discharge patterns produced by high-voltage electrophotography taken with a Gas Discharge Visualization Camera (GDV). GDV is a Russian technology that assesses the subtle energy available for metabolic processes in the body. The larger the area of color around the body and the more filled in it is, the better the overall state of health.

The image on the left was taken before using a cordless phone, the one in the middle after using a phone and the one on the right was taken using a phone in the presence of the Comfort Technology Clock.

The area of the subtle energy field began at **24,029**.

After using a phone for five minutes, the biofield decreased to **20,519**

and when using the phone with the Comfort Technology Clock turned on, the area of the biofield rose to **25,067**.

The increase in the subtle energy field in the presence of the Comfort Technology Clock shows that the clock neutralizes the negative effects of a cordless phone. Furthermore, the increase in the biofield above baseline shows that the Comfort Technology Clock improves ones energetic field related to health and well being.

Clinical Trial Report for Comfort Clock

**Submitted by Lisa Tully, Ph.D.
Energy Medicine Research Institute
Boulder, CO
December 8, 2009**

Introduction: This report summarizes a pilot clinical trial conducted by the Energy Medicine Research Institute on the ability of the Comfort Technology Clock® to neutralize the deleterious health effects of a Digital Enhanced Cordless Technology (DECT) phone. The results of this pilot study indicate that the Comfort Technology Clock® remediates the negative physiological effects of a DECT phone and more work is needed to confirm this result.

DECT phones use a stronger transmission signal (from 900 megahertz to 2.4 gigahertz on average) and an improved antenna/receiver system to provide exceptionally clear communications. A major difference between the older cordless phone and the DECT cordless phones is that the DECT phone's base station continuously emits pulsing microwave radiation at full power as long as the base station/charger is plugged into the 240 VAC wall socket. This means that the base station is broadcasting regardless of whether the handset is charging in the base station cradle or being used 300 meters away. Evidence is mounting that these emissions are harmful to humans.

The Comfort Technology Clock® digital clock has a proprietary process based on cutting-edge principles in quantum physics.

The "software" is added to the micro-circuitry of the clock that enables it to emit an omni-directional field of soothing, stable, coherent subtle energies. The Comfort Technology Clock® is thought to reduce or eliminate the irritating stress of EMF pollution.

Heart Rate Variability (HRV) was used to monitor the subject's response to the DECT phone and whether the Comfort Technology Clock® neutralized any negative effects. One of the subjects had a pronounced negative effect of the phone, which was reversed by the Comfort Technology Clock®. Heart rate variability (HRV) refers to the beat-to-beat alterations in heart rate. It was developed over 40 years to monitor fetal distress and has the ability to predict survival after heart attack. Since HRV measures the relative balance of the two branches of the autonomic nervous system (ANS), which controls most physiological functions, it can be used to monitor stress. HRV has also been shown to decline with the aging process.

HRV is a useful assessment of the general health of an individual.

The Nerve Express (measurement equipment) has a high degree of sophistication and reliability in detecting the early signs of pathological developments or functional disorders. HRV is the best indicator of the functional integrity of all physiological processes in a human body. It is also the best indicator of one's general well-being. It provides a quantitative assessment of human physiological condition and fitness based on HRV analysis. physiological condition and fitness level based on HRV analysis. The system's assessment is based on an understanding of HRV wave pattern as a unique key to the deciphering of all fluctuating neural, autonomic, hormonal and other processes that occur in a human body.

Methods: The study utilized two healthy individuals, not on medications, one female and one male. A baseline measurement was taken, followed by a five minute exposure to a DECT phone. A subsequent measurement was made and the phone exposure was repeated with the Comfort Technology Clock® on. A final HRV measurement was made to determine the effect of the clock.

Methods: The study utilized two healthy individuals, not on medications, one female and one male. A baseline measurement was taken, followed by a five minute exposure to a DECT phone. A subsequent measurement was made and the phone exposure was repeated with the Comfort Technology Clock® on. A final HRV measurement was made to determine the effect of the clock.

Results: One subject had a dramatic shift in the HRV following DECT phone exposure. Figure 1 shows the baseline measurement for physical fitness level (8/5), which is in the normal zone. Figure 2 shows the HRV measurement after DECT phone exposure, which is reduced to a below normal physical fitness level (11/7). Exposure to the phone in the presence of the clock reversed the negative HRV response back to the normal physical fitness zone (9/5), as demonstrated in Figure 3.

Figure 1

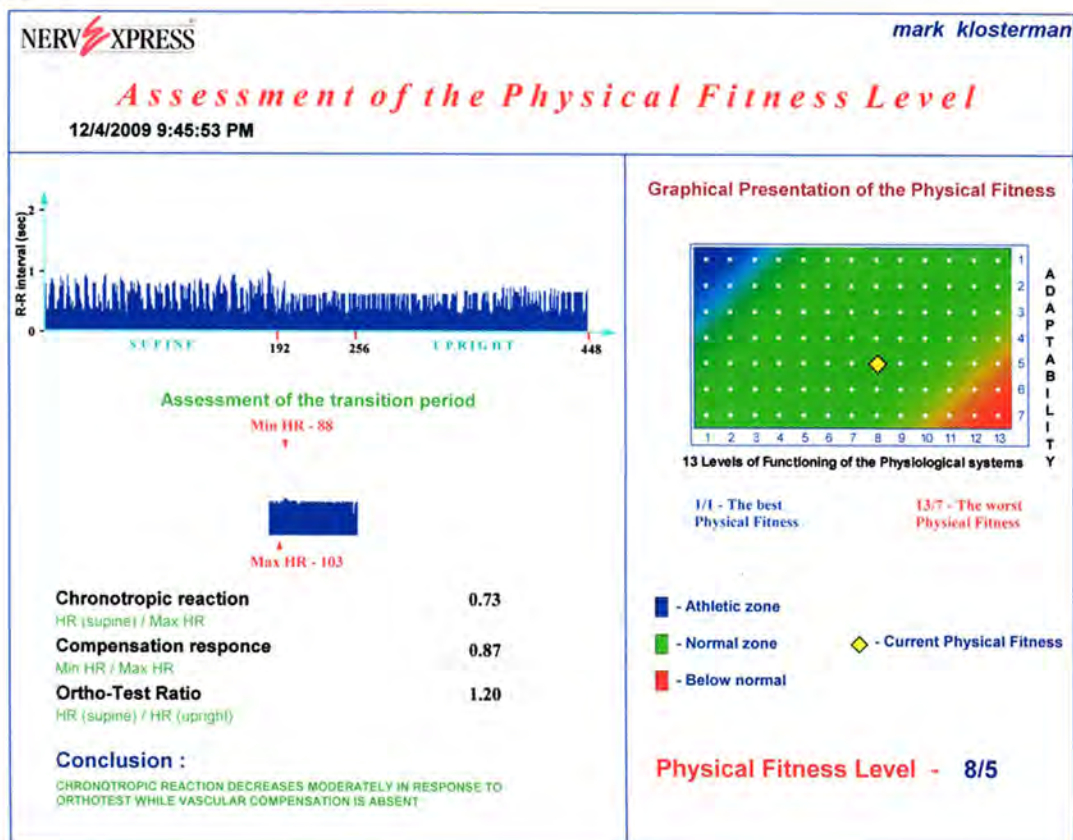

Figure 2

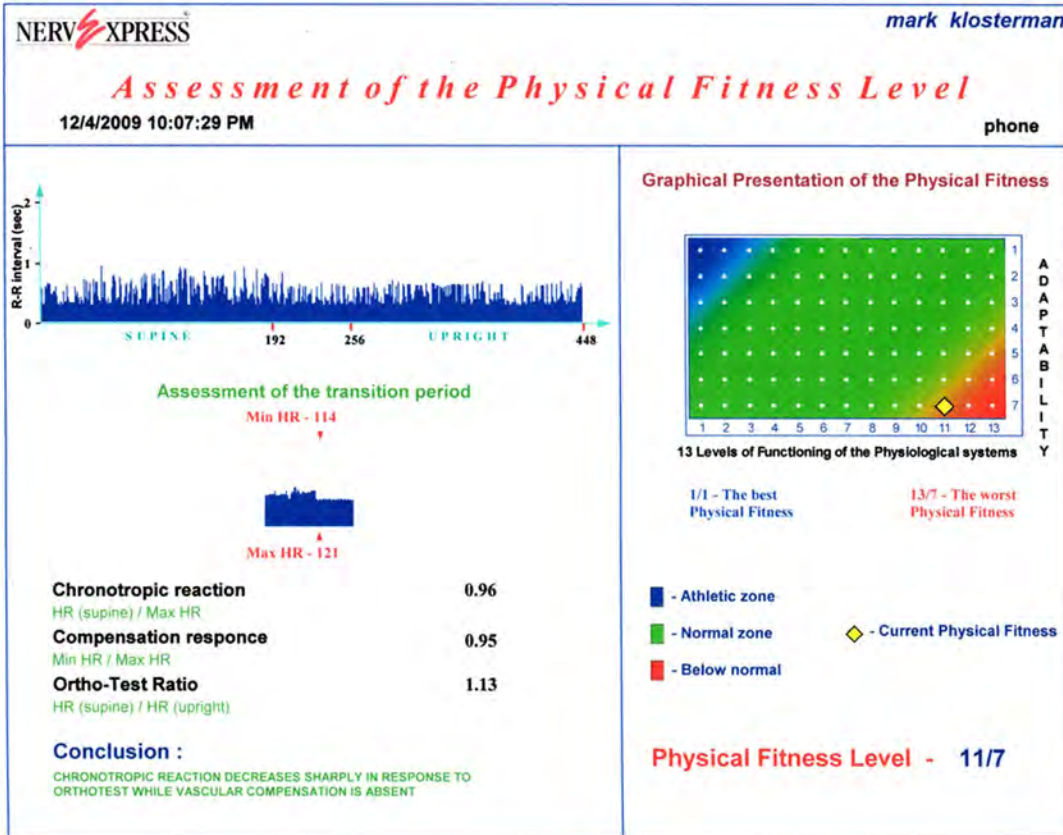

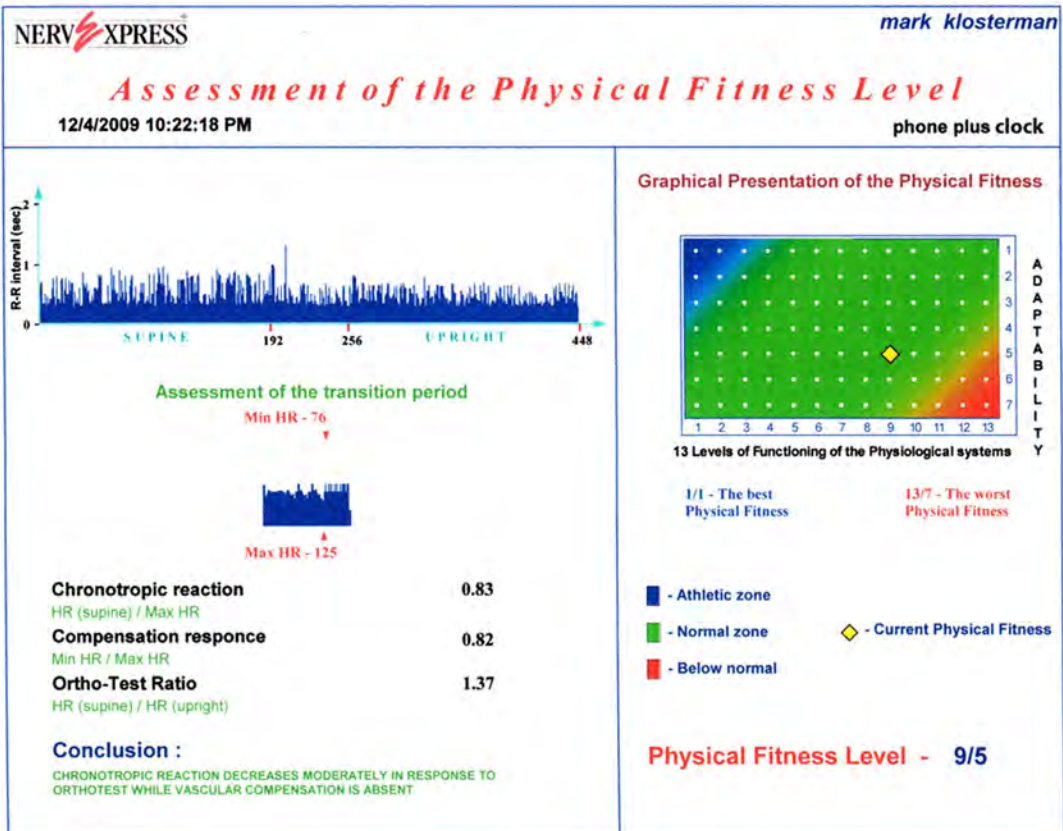

Figure 3

Conclusions: The Comfort Clock® neutralizes the negative effects of a DECT cordless phone on HRV in a healthy subject. More research is needed to further confirm this finding. If you would like to contribute to funding further testing, please contact us!

September 10, 2009

Dear Kenneth,

Thank you so much for the two Ultimate Comfort Technology Clocks you sent me, one for myself and one for my mother. I really appreciate it. By using the Comfort Technology by the bed it helps create better, more restful sleep.

I travel quite a bit and I always take my Ultimate Comfort Clock with me so I can get a good night's rest no matter where I am in the world. I know the dangers of electromagnetic field radiations, and I am very pleased the Comfort Technology helps "harmonize" these to reduce stress. I fully understand the importance of reducing stress to create a healthy lifestyle.

I am very happy to have this elegant technology to offer the students who come to my Living Foods Institute to restore and maintain optimum health. Since detoxification and stress reduction are keys to good health, it is a blessing to have the Comfort Technology as an aid.

I am so grateful to you, Kenneth, for introducing me to this wonderful Comfort Technology. It helps me rest better so I can think clearer and feel more refreshed.

Blessings and Love,

Brenda Cobb

We highly recommend the Comfort Technology Clock to improve the environment of your home. After we bought our first Ultimate Comfort unit, we noticed some subtle differences, feeling calmer, sleeping better, a general sense of wellbeing, etc. But it wasn't until after we purchased a second clock and put it in our bedroom that we really experienced a dramatic difference in our environment.

Matthew was no longer suffering from the intense headaches that would take him out for a full day. They gradually diminished over time and have almost completely disappeared the last few months. Orna experienced a dramatic decrease in her menstrual cramps and both of us have been sleeping much more deeply, more consistently and our meditation sits have been more focused with less "think-a-tating."

We make sure to take one of our Ultimate Comfort Technology units with us when we travel to improve the environment of any hotel room. You'll sleep like it's your own bed at home. Thanks Ken!

To Whom It May Concern:

In 1997 I was visiting my Chiropractor and, when he called me into his office, he said, "feel this"! Dr. Bloom unplugged a clock and I felt the energy vibration in the room become a bit rough or agitated. Dr. Bloom plugged the clock back in and the vibe smoothed and mellowed. I was amazed! I promptly took Ken's address and phone from the back of the Comfort Technology Clock and proceeded to buy 5 clocks.

Now I have 11 clocks, having recently purchased 6 of the newer Ultimate models. I use them in my home, business and my grown children use them in their homes. One Comfort Technology Clock has been my alarm clock for years! I have great sleeps! I want to express my appreciation to Ken, for making my work place and family's homes more stress free!

There is a lot more stress and EMF (electronic smog) pollution today. These newer, more powerful units are a huge upgrade. I have 2 older clocks running here in my home, and I don't get off on them like I do with the Ultimate unit. The difference is so significant that, even though I know the old units are still working, by comparison I would almost wonder if are they still functioning? When I plugged in one of the new Ultimate models of this technology in my home, wow, what a soothing vibe!! The energy changed noticeably. My entire body's energy within and without smoothed almost like an invigorating energy flush. My heart Chakra mellowed, and I am definitely in "Cruise-mode". I can feel my inner flow and the Earth energy flowing in thru my feet....

Whether you are a businessman or a family man, I highly recommend that you put the Ultimate Comfort Technology Clock technology to the test in your lives.

Sincerely,

Cam Ramsay, CEO

Ken Lesser's Comfort Technology Clocks are quite remarkable. I was having trouble sleeping in my new home due to all the noises I was not used to. After using the Comfort Technology only a few nights, my sleep improved immensely.

Thank you, Ken.

Andrea Adler

Founder of HolisticPR.com

January 24, 2009

Hi Ken,

I am really enjoying the Comfort Technology Clock. I see a big difference in my sleep patterns and I am able to sleep through the night, where as before I had the Comfort Technology Clock, I would wake up during the night; which I believed was due to stress.

I am now able to remember great marketing business ideas I see in my dreams, before having the clock in my presence I was barely able to remember my dreams after I opened my eyes. Also, during the day I am able to think and brainstorm with much more clarity.

Another thing I have noticed, is that I have been much more successful in my business endeavors. It seems that before the Comfort Technology Clock I was carrying a lot of stress around with me, which I believe sent out negativity into the universe, and now with the stress out of my mind I am sending out only positive vibes - which is opening many more doors for me.

I want to thank you for introducing me to the Comfort Technology Clock. I really appreciate the opportunity to help you promote this fantastic advanced technology.

Sincerely,

Dear Kenneth,

I wisely invested in 3 Ultimate Comfort Technology units. Two for the Cedar Lane Care Home I own and one for my home. My staff and I have witnessed several outstanding benefits since introducing the technology and fortunately these positive changes took effect very quickly!

One of the guests at our facility is my father who has Parkinson's. I am happy because with the Comfort Technology's stress relieving benefits he has gotten significant relief from the frequent itchy or tingling feelings that could result in an interruption in his much needed restful sleep. His mood and disposition are also improved.

In the past there were lots of occasions in which many of our guests would be clamoring for attention at the same time. Since putting 2 Ultimate Technology Units into my 5000 square foot Senior care center, I have noticed more stability in the environment and a greater sense of ease and peace for my guests, my staff and myself.

We like to encourage our residents to take daily walks, but had often encountered a lack of interest. Since we plugged-in the tiny Comfort Technology units my staff and I are noticing more residents are participating in the walks. Depression is often an issue for the elderly. With the Comfort Technology in place a resident, who was really depressed has perked up and shown great improvement.

We do many things to make our facility a wonderful place for our elderly residents to live. In all my years in this business I have never seen anything as easy to use that did so much to improve things so quickly. I highly recommend the Comfort Technology to anyone in the senior care industry. I can happily report that your slogan "No Muss...No Fuss...Just plug it in and your life gets better" is true.

Sincerely,
Yolanda Diaz, Owner
Cedar Lane Care Home

January 5, 2010

Hi, Kenneth,

“I have used Advanced Living products (i.e., the Comfort Technology and Shield) since 2001 and they have definitely improved my life. Robert Frey, an internationally renowned teacher of Tantra, had them and recommended I get them. I bought a silver Shield first and wear it often. It helps keep my energy field clear as I work with others and seems to increase awareness and presence with my clients. I love using the fabulous Comfort Technology Clocks at our events because it helps mellow out the mood and bring people into a place of more peace and presence. I don't know how his products work – I don't need to – I just know that they DO work. So when you want a more harmonious environment and/or want to explore deeper realms of intimacy and ecstasy I invite you to invest in the exquisite ambiance that comes with the Comfort Technology and the personal protection of the Shield.

Sincerely,

Jade Beaty, Owner

Dear Kenneth,

I am very grateful that you introduced me to the Comfort Technology Clocks. I am really impressed with how well they work. As you know now I own two of them; one, which resides in the center of my house and the other I keep in my office. I am quite sensitive to certain kinds of energy and I found the electrical current in my condo disturbing. Prior to owning a Comfort Technology Clock, I had the level of electricity throughout the house investigated through a meter and it was found that the electrical current was unusually high. After getting the Comfort Technology Clock I noticed that I slept better and actually feel better and more peaceful in my own condo. The energy doesn't feel as chaotic for me.

I performed an experiment and brought the Comfort Technology Clock in to my classroom on the second day of a workshop I was doing. I really feel that it contributed to a calmer class and the comprehension seemed to increase. I am very happy to have these Comfort Technology Clocks and feel that everyone who is concerned about their health, productivity and peace of mind should own some.

Testimonial

I use the Ultimate Comfort Technology Clock in both my home and my colon hydrotherapy office and have had amazing results in both places.

I used to wake up in the morning jittery and nervous and the Comfort Technology Clock allows me restful sleep and a calm awakening.

My clients have noticed a difference in the atmosphere in my office and feel more relaxed and safe, which allows more successful colon hydrotherapy sessions.

Sincerely,

Jane Guyette
 Color Hydrotherapist
 Inner Awakening Healing Center

March 15, 2009

To Whom It May Concern:

A few months ago I was introduced to a technology that has made a major positive impact on my life. Kenneth Lesser, CEO of Advanced Living, the company in Denver who manufactures and distributes Comfort Technology Clocks sent me a couple of the strongest "Ultimate" units. I did my research on this technology and read anything I could find on the Internet about the effects of EMF's and what we can do about them. I must admit I was skeptical at first.

I have been dealing with some very high stress factors over the past year or so, and in fact have had health care professionals tell me that I was experiencing Post Traumatic Stress Disorder. Gradually over time, since I strategically placed the Ultimate Comfort Technology Clocks in my home, I have noticed some major changes in how I feel. I have become more calm and peaceful, centered, better able to focus, and clearer in my thought processes. Instead of waking up feeling overwhelmed and filled with dread, I can honestly say that I feel happy again. It seems that I not only think more clearly, but am better able to communicate with others even in highly emotional situations. Although nothing has changed in my life externally, I see it all shifting gradually as I now have a different perception and way of handling all of my challenges. Because I have been trying a lot of different methods of coping and getting centered again, I wasn't sure at first if it was really the Comfort Technology Clocks that made the difference. Since I've had them in my home, I left town twice and did not take a clock with me as I had been advised. Even though I continued to take my supplements while traveling, and the trips were a nice break from the day-to-day stress factors in life, by the time I got back I was feeling emotionally off-balance, and overwhelmed again. After a few days back in my space with the Ultimate Comfort Technology Clocks however, I was back to feeling peaceful, centered, and in control. I do not know exactly how this proprietary technology works - I can only tell you what it has done for me.

If you'd like to learn more about how businesses as well as individuals have benefited from the Comfort Technology Clocks, please go to www.AdvancedLiving.com. There you'll find even more powerful testimonials from some very well respected doctors, healthcare professionals and spiritual mentors like Rev. Michael Beckwith, Jack Canfield, and Dannion Brinkley to name a few. In addition, there is a 90-day money back guarantee on the Comfort Clocks.

Investing in the elegantly supportive Comfort Technology was one of the wisest investments I've made. I strongly recommend that you consider putting some of this technology to the test in your life. You can call 303-284-8461 or email: ComfortClock@AdvancedLiving.com. If you know someone who might benefit from this amazing technology, please forward this info to them.

Regards,

Patricia A. Sommer
Littleton, CO

7/20/09

Dear Kenneth,

I have been using my Ultimate Comfort Technology unit for 50 days and have noticed several benefits! I used to have a terribly difficult time getting out of bed in the morning. This is an area that has negatively impacted my life for many years in fact. When I first started using the Comfort Technology I noticed immediately that my desire to press snooze daily literally disappeared! I have more energy as soon as I open my eyes and most days, when the alarm sounds, I'm up right away! This improvement alone is very significant and has contributed to the increase in my quality of life!

Having the Comfort Technology around keeps me in a positive frame of mind. Part of my struggle to get going in the morning was based on the negative mind chatter and disoriented feeling I would have for the first hour or two. When I did finally get up, I usually would have to make myself repeat positive affirmations to try to get through it and get my day started. What used to be my most demanding part of the day now flows smoothly. I am having better dreams at night and I can say with conviction and delight that my days start out much differently now!

I loaned the unit to my brother because he has a daughter who is almost one and rarely sleeps through the night. The next morning I asked if she had slept all night long and the answer was yes! I was at his house again recently, and I noticed after using my laptop 30 minutes that I felt some eyestrain and a slight headache. I took this as a cue that it was time to plug in the clock and those irritating symptoms went away within 5 minutes. This stuff really works and, of course, I take it everywhere with me! Thank you.

Additionally, this year my PMS symptoms have been off the chart nasty. During some of these times that create painful emotional imbalances, I had been feeling quite irrational, which resulted in chaos and discord between those around me and myself. This month I had the nicest transition into my cycle that I've had in months. I didn't feel the need to sabotage any relationships, the usual insecure feelings were not there and I was able to maintain and create consistent loving interactions.

The Comfort Technology has allowed me to sustain some major changes in my life. These changes have been in family, art, rest, work, free time, and making healthy decisions on a consistent basis. I am especially excited about the extra energy I have now to help me maintain a healthy balance. With all of the intense personal growth I have been doing, I appreciate things that don't require conscious energy. The Ultimate Comfort unit helps me focus, be more productive, communicate better, make healthy choices, feel more relaxed, sleep better and the list goes on.

I am finding it much easier to organize my thoughts and express my needs more clearly. I literally feel like I've raised my level of consciousness, which has led to more fun and more loving relationships. For me, most importantly having a number of the Comfort Technology Clocks has deepened and accelerated my spiritual practice, which has take my life to new heights.

I believe all people need to have access to this technology. Some people more than others but even people who believe their lives are working pretty well can still benefit by being protected from harmful EMF's. I recommend the Ultimate Comfort Technology to every person!

Thank you,

Shannon Buckley, CEO

June 23, 2008

Dear Kenneth:

I have owned my Ultimate Comfort Technology Clock for several months now and felt compelled to write and let you know how pleased I am with my purchase. I have been using the clock in my office at work. Since I am in front of the computer all day and going through extremely stressful personal challenges at this time, I wanted to try anything that might help me be less anxious and to feel less on the verge of having a panic attack at any moment. I noticed a difference almost immediately, feeling **I could more easily meet challenges because I was feeling more inner peace.**

The incredible thing is that the Ultimate Comfort Technology Clock not only helped me feel **more serenity**, but I also noticed a difference in my co-worker that shares a small office with me. They are a programmer, and I am used to them **kicking their chair or pounding their fist on their desk when they get frustrated** with the code not working. Since I brought in the stress relieving clock, they have been a different person, **much more at ease with any situation, particularly those that caused them to get so distraught previously.**

Using the Ultimate Comfort Technology Clock at home has finally allowed me to **get a good night's sleep without drugs.** I am now free from drugs with potentially serious side effects like Ambien, which I had used every night for four years or Tylenol PM for the last 6 months. Thank you for providing such a powerfully effective, **easy to use option for dealing with the stress of an overwhelming time in my life and having to work with computers for extended hours on a daily basis.** The Ultimate Comfort Technology Clock has definitely improved my quality of life, and I highly recommend it.

With warm regards,

The Super Comfort Technology Clock Review

Day 30 – September 26, 2008

The Conclusion

I have had the Super Comfort Technology Clock here in the studio at BBS Radio for over a month now. I wanted to give it a fair shake but I could have written this review the first day I plugged it in. It's made our work environment more tranquil. When I plugged it in I noticed that I wasn't any less busy and the station wasn't any less chaotic, but I was able to stay grounded and see through every situation. Everything seemed a whole lot easier. I feel like my brain has been de-fuzzed somehow. Ken, thank you very much for letting me try out the Super Comfort Technology Clock in the studio.

Much Love,

Seth Hendric

July 12, 2008

Dear Kenneth,

I want to let you know that the Comfort Technology Clock has produced results in my life.

The first night I had it plugged in next to the bed, I felt a relief in stress levels. It is hard to describe. Perhaps it is a calming feeling or a numbing of sharp thoughts and worries. I do think I am sleeping better.

I also think resting with less worry, reducing the repetitions of negative thoughts, has promoted my sense of well being even throughout the daytime. I used to worry about finances, rehash events of the previous day, and often do frustrating work in my dreams. Now, it seems that my dreams are much less negative. Instead of waking with this worry on my mind, I seem to wake up thinking about positive ideas and often solutions.

I also tried having the clock next to my computer area while doing web development work. Again, I felt less frustration and had a sense of more calmness and ease in my work.

Now, after having used the Comfort Technology Clock for several months, I think the effects are residual even when I am away from the clock. But directly by better rest, or indirectly by less negativity in my mind, my business and life have an increased sense of direction and prosperity.

Although I don't understand how it works, I can attribute positive results to the use of the Comfort Technology Clock. Thank you for suggesting it to me!

Sincerely,

Allan Ramsay

JENNIFER WAYLAND

To Whom It May Concern:

I have been aware for many years of the dangers and negative effects of EMF radiation, so I was intrigued when I met Kenneth Lesser, CEO of Advanced Living Technology and he spoke to me of the Comfort Technology Clocks.

As a massage therapist I felt it would be an important and beneficial addition to my office space. I can say I noticed a subtle yet noticeable difference in the atmosphere after adding an Ultimate Comfort Technology Clock to my treatment room. I seem to have more clarity and energy at the end of a busy day than I had before, and I think clients are able to relax more deeply into their massage and gain the benefits of the work that much more easily. It feels good to know that I am helping to provide a space neutralized of EMF pollution.

I also purchased one for my home to replace the alarm clock next to our bed. I awake more refreshed than before, and my cat loves to sleep next to the clock as well. After experiencing the healing benefits of these Ultimate Comfort Technology Clocks for a three month period, I have also noticed less physical discomfort with my monthly cycles.

Kenneth has been a pleasure to work with, and I am pleased to recommend the Comfort Technology Clocks to anyone who wants to bring harmony and clarity to their environment.

Thank you

Jennifer Wayland

Dear Kenneth,

The Comfort Technology Clock, it's a tool to keep us centered and grounded. I have also been keeping a Comfort Technology Clock next to my bedside and the energy in the environment is one of balance and peace. When it is time to rest, sleep is very deep and I wake up renewed and energized, which did not use to be the case for me. I believe this to be a great tool to support us in keeping the energy flowing in both our outer and inner environments.

Sincerely,

Candice Bataille Popiel

Dear Ken,

As the head service writer at a busy auto repair facility high pressure is typical. For many years I've been constantly multi-tasking keeping many nervous or fussy customers happy, while being a mentor to my mechanics for all the troubles they might encounter.

These Comfort Technology Clocks really help reduce my stress at work as well as soothe and calm customers at the encounter and in the waiting area. I notice I'm thinking more clearly and am better organized. I feel noticeably better at the end of most days and go home with extra energy for my family, friends and myself.

I was so impressed that such a simple device can make so much difference at work that my wife and I added a second Comfort Technology Clock to our bedroom. We both notice sleeping better and waking more refreshed. I would encourage anyone with stress or who works hard in a busy, demanding place to experience the benefits. Keep up the great work.

Sincerely,

John Cafiero
Service Manager

“We want to help”

Agnes Moscato
2200 SW Sandhurst Way
Palm City, FL 34990

9/5/2002

Dear Advanced Living Technology,

I recently purchased a Comfort Technology Clock per the advice of a friend who is extremely pleased with the results he was receiving from products he purchased. I proceeded to put the clock in the bedroom. I've noticed that since the introduction of the clock into our bedroom, my husband and I are sleeping like babies. I have noticed such a change in my husbands overall disposition. He seems more low key. I want to thank you for that.

I have also noticed that I no longer am plagued by the frequent headaches that I used to get. One thing I'm extremely pleased with is the fact that, while the clock is in the bedroom, it seems to radiate through the wall and into the adjacent TV room. My husband spends a lot of time in there and I can definitely see that the environment in that room is also much improved.

I was so pleased that I decided to purchase another Comfort Technology Clock for my kitchen. I am just so satisfied with the results I have seen from these amazing products I couldn't be happier. I want to thank you again for the amazing Comfort Technology Clock, which has made such a dramatic difference in the attitudes of people in my house.

Sincerely,

Agnes Moscato

“THE COMFORT TECHNOLOGY CLOCK IS A MIRACLE!”

Personal testimony by Stephanie Ann Stevens

September 12, 2007

Kenneth Lesser sent my husband and I two Comfort Technology Clocks last month, and the results were immediate and startling! Within ten minutes of plugging the first Comfort Technology Clock in our bedroom I noticed the air suddenly seemed softer. That night our sleep was much more relaxed with my husband declaring he was sleeping better than he had in many months. This was only one week after using the Comfort Clock. Our stress levels had been at an all time high this past year due to many factors not the least which has been health issues, and the Comfort Technology has so greatly reduced the EMF stress in our house that even if things were out of order in one room or around our computer, I did not feel scattered as I had before. I felt like I could “think” more clearly and so does my husband.

I am involved with spiritual work readings/ healings, and this kind of work requires I be centered as much as possible to be the best for my clients. Thanks to the Comfort Technology Clock I can focus better, and I feel peaceful much more often than before.

It’s like a soothing wave of a current somehow invisibly traveling through your house and your bodily system. You can “feel” it. Even our little kitties, all three of them, are acting less stressed and calmer we have noticed.

The Comfort Technology Clocks have contributed to many small miracles in our lives and they have also reduced the stress in my husband’s work as well as a contractor and subcontractor. In short, these small miracles add up to one LARGE miracle. We are so excited we are going to be giving away a Comfort Technology Clock at our seminar next month.

Every hospital room, clinic, jail, nursery, office, and church, just to name a few, NEEDS this product.

Sincerely,

Stephanie Ann Stevens

March 13, 2008

Dear Kenneth,

I can't thank you enough for my Comfort Technology Clock!

For years I have been struggling with horrible headaches and severe ringing, not in my ears, but in my head. I would wake up groggy and drained of all energy.

I am aware that the EMFs, those nasty electromagnetic fields are systematically breaking down my nervous and immune systems. Nothing seemed to help.

Since using your Comfort Technology Clock for only one week, the headaches are not as noticeable and the ringing has drastically subsided. I wake up feeling rested, a little less stressed as though the volume were turned down on the background noise. I am not in pain or as jittery and anxious as I have been for many years

Thank you, Kenneth for bringing the Comfort Technology Clock into my life.

Sincerely,

Candi A. Worthington
Denver, CO

January 13, 2010

When I heard about the Comfort Clock and looked at some info on the web site, I definitely wanted to try one. I have heard a lot about the damaging effects of electrical power lines, cell phones, microwaves and that sort of thing. When Kenneth offered to let me “try one out” I jumped at the chance, but at the time I was on my way to teach a class. He encouraged me to drop by and get one and use it in the class as well as at home, so I did.

At home I have it in my bedroom. The first night I noticed that I slept deeper than I had in a long time. More soundly, might be a better way of putting it. Saturday was the same. I entertained a friend on Sunday and one of the things he said to me soon after he arrived was “your energy is different this morning.” Yes it was, and *then* I told him I had a new Comfort Clock in my house!

I’ve only used the clock for less than a week ... perhaps not a very good trial period yet, but I feel a difference already. I’m going to keep it plugged in and see if I continue to get good results over a longer period.

I suspect the Comfort Clock does a lot more than just help you sleep, and I’m looking forward to experiencing more benefits. Thank you, Kenneth, for bringing this interesting technology into our technologically crowded world.

April 21, 2006

Dear Kenneth:

My wife and I used to have a serious problem with our 2 young children sleeping through the night. Often they would wake us up several times and take a while before they could go back to sleep. It was very stressful for my whole family.

To our amazement and great delight when we plugged the Comfort Technology Clock into our house the problem with our kids waking up during the night completely disappeared. We are so grateful to find something that is so easy to use and that so quickly made our lives at home so much better. Thank you.

We had learned to avoid living under high-tension electric power lines, but other than that we didn't know about the serious problems that can come from our constant exposure to radiation that now comes from living anywhere in our high-tech electrical world.

My passion for many years is building and racing open wheel modified cars. While it's great fun, it takes a huge effort to do it well and so many details need to be take care of to have any chance of winning. Since the Comfort Technology Clock did such a good job in my home and there's lots of electrical equipment and stress in the shop, I decided to try that technology to see if it could help there too. I'm happy to report that I have seen my racing team and I stay more focused and on task since adding a Comfort Technology Clock. We are also functioning better as a team when things go wrong or when we are under severe time demands.

This stuff works great. If you've got stress or just want to improve things in your life, I highly recommend that you discover how these products can make your live better too.

Sincerely,

Hector Leon,

Dear Kenneth,

Thank you so much for introducing me to the Comfort Technology Clocks, which have added so much value to my life. After using two Comfort Technology Clocks for three months in my home, I can joyfully report that I feel energized every morning, and I feel I am no longer swimming up-stream.

Since I started using the clocks my dreams have been more lucid, and I feel much more connected to my intuitive nature. I have also made a huge amount of progress in my life. Your Comfort Technology Clocks have freed my spirit to the point where I have become inspired to stand strong for myself as a single mother and along with making some career decisions about which I had been stuck for a long time.

I have also seen improvements in the behaviors and moods of some of the people around me. What a wise investment I made by purchasing these Comfort Technology Clocks and what a blessing they are! Thank you.

Sincerely,

Dear Mr. Lesser:

I want to thank you for the marvelous products you have provided to help myself and my family. Since we started using the Comfort Technology Clock in our home I've enjoyed a quieter and more productive life. Our residence is located very close to major power lines and since moving there, I have experienced more depression and lack of motivation to accomplish even simple housekeeping tasks while at home. Until I met you and learned about the negative effects of electromagnetic radiation, I never knew that this might be the cause of my apathy, stress, difficulty sleeping and depression. I am so glad to now know of this important health hazard and to have a quick, simple cure in the Comfort Technology Clock!

Since having the Comfort Technology Clock in my home, I've slept better: straight through the night and I wake refreshed with more energy to meet my day's tasks. My children have all slept through the night as well, which makes a big difference for all of us! Additionally, we have less strife and chaos in the home between myself and the children. We all seem to have more focus to take on our daily tasks and homework now goes very smoothly as well. When difficulty arises, we are more clear headed and can more easily achieve an agreement or resolution to the problem.

I notice a marked difference on school days. The children are very stressed and sometimes report a headache upon returning home from the day. There is a lot of EMF stress at their school, as well as conflicts with other students in the after school program. Within a half hour of coming home, they are calmer, more focused and headache or other illness symptoms have subsided. I believe it is because our home is now protected and free of EMF stress.

As a single mother, with four young children to nurture and raise, I am very thankful for having found the Comfort Technology Clock. I recommend this product to everyone, especially those with children. The Comfort Technology Clock provides my home with vital protection, which no home with children should be without! Thank you again for such a fine, helpful product as the Comfort Technology Clock!

Many Blessings,

Ruth A. Golden

February 23, 2006

Dear Ken,

I cannot thank you enough for the power of your Comfort Technology Clocks! I received 3 of them! The first one I used, I experienced a more peaceful sensation in my body and bedroom. I plugged in the 2nd one and had one of the most restful nights I have experienced in a long time. The next day, I plugged the 3rd one in and found an amazing energy to tackle and complete a project I had just been complaining about not having the energy to complete for months. Wow! What a noticeable tangible difference it has made in my life.

My daughter took a nap in my room and couldn't believe how rested she felt when she woke up. I have experienced that same kind of restful sleep every night as well. I wake up feeling refreshed instead of exhausted and ready to start the day.

There are two draw backs I am experiencing however, I can't keep the kids out of my bedroom anymore, they just want to stay in there to play! I am also finding it feels so good in there I don't want to leave my room either! I have to get EMF relief for the rest of my house and to carry with me now that I have experienced for myself the huge difference it has made in my energy and environment!!

Thank-you, Thank-you Ken for your cutting edge research & products and your dedication to improving the quality of our everyday life.

In Gratitude,

Pamela Dawn
Salt Lake City, Utah

May 1, 2004

To Whom It May Concern:

I am a breast cancer patient who has tried the Bio-Shield and Comfort Technology Clock. They have made a remarkable difference in my energy level. Prior to using them I would be extremely tired after an active day of 8 to 12 hours. While working a temporary job 12 to 15 hours a day with 6 hours of sleep each night, I have been able to function feeling well rested and good and ready for another busy day. I would have found it to be very difficult if not impossible to keep up this schedule for four days without the extra support of these products.

I got the concept of these products before I tried them, but now I am impressed and a true believer in their benefits.

Sincerely,

Dear Ken,

After several months of BioElectric Shield and Comfort Technology Clock protection in my life I'm writing to share a few of the many benefits. Now, I am much more easily able to direct my thoughts in positive, supportive ways.

I professionally do massage and energy healing work. The Shield and Comfort Technology Clock help me to bring forth even more of the energy of my healing intentions as well as protecting me from taking on or being depleted by the negative energies that sometimes get released when I'm working on clients. I find that the Comfort Technology Clock's calming, soothing energies make it easier for my clients to relax. This further opens the way for my clients and I to establish rapport and bond so they get greater benefit from my work, and I have more energy left at the end of a busy day.

I am also a caregiver for an elderly gentleman who is in very poor health and frequently demanding. Since I put the Comfort Technology Clock in his room, I've noticed he is much less argumentative and generally easier to be with.

In summary, the Shield is a beautiful piece of jewelry I'm proud to wear, and the simple plug-in Comfort Technology Clock is powerfully effective. They have dramatically improved my quality of life personally and professionally. I highly recommend them and the great service I get from your company, Advanced Living Technology.

Sincerely,

April Lloyd

May 16, 2003

Dear Ken,

I wanted to write you to thank you for introducing the Bioelectric Shields and the Comfort Technology Clock to my husband and I. Since we started wearing the Shield and using the clock, we have experienced better sleep and surprisingly, we have needed less sleep!

I have noticed very subtly, that I have more presence of mind on a daily basis and can go through the day without having my usual slump in the afternoon, especially when working with computers and telephones all day. I still have energy in the evenings, so I can continue to do other projects. Bottom-line is we have more energy.

I never knew that EMF (electromagnetic fields) drained my energy or increased my irritability and stress levels. Thank you so much for offering these great products and for taking the time to educate me on such important environmental issues.

Sincerely,

Jennie S. Ankney
Owner
J D Investments
Jena22@sbcglobal.net

September 4, 2004

Dear Ken,

I've been wearing my Shield for 3 months and have noticed a significant increase in energy. Wearing the Shield helped when I was stuck with writer's block, and quickly I was able to complete writing numerous songs.

Soon after I got my Shield I got the Comfort Technology Clock, which compliments and enhances the benefits of my Shield. Within a week of having both my Shield and Comfort Technology Clock, I sold 4 of my songs. Powerfully, I feel these products protect me from electronic pollution and stress, which supports me to deepen my spiritual practice, thus helping me to manifest more prosperity.

Thank you again. I do feel great, and think that the Shield and Comfort Technology Clock are helping to contribute to my overall well being and success. God bless you and keep you, and may you prosper in all you do as you continue to bless and prosper others,

Warmly,

Brenda Lee Eagers

Re: Report on the BioElectric Shield and Comfort Technology Clocks

Dear Mr. Lesser:

I wear many hats as the owner of the Body Mind College and at times the demands on me are intense. I was skeptical when I first began testing them 6 months ago, but I am now convinced of their comprehensive effectiveness. The BioElectric Shields provide superb protection from the toxic effects of electromagnetic field (EMF) radiation from computers, cell phones, etc. Additionally, the Shields provide tremendous relief from both internal energy drains when dealing with our own life challenges as well as from the external stress from other people's bad attitudes and negative energies. It is so much easier for me to stay centered, grounded, focused and alert when I'm wearing my Shield.

My brother Daniel is so energy sensitive he would get a headache from using a cell phone for only a few minutes. Since wearing the Shield that problem is completely eliminated.

I am also impressed with the Comfort Technology Clocks I've tested. I find they clear EMF stress and contribute to more soothing, enhanced work and learning environments.

I am particularly delighted with how easy it has been to demonstrate the benefits of these products to others. They have quickly become very popular at the college. This has resulted in both reduced stress and increased productivity for those using them along with increased cash flow for the college.

I strongly encourage others to experience the benefits for themselves personally and professionally. It has been a distinct pleasure doing business with you and your company. Your product knowledge and customer service are excellent and much appreciated. Thank you.

Sincerely,

James Schmachtenberger, Owner
 Body Mind College

SKEPTICAL

Kenneth Lesser NOTES FROM THE CEO: The Comfort Technology uses advanced quantum physics and Unified Field theories. I was skeptical when this was first introduced to me. In fact many of our new customers start off with some skepticism and curiosity about how it works. Now we have a proven track record with 15 years of proven successful field testing. So a growing number of our customers come from referrals from trusted friends. This takes care of most of the skepticism. Either way all of our customers get up to 90-days to make sure the Comfort Technology works.

Patricia Sommers Skeptical at first but found it to be a wise investment

James Schmachtenberger Skeptical at first – tested product for 6 months
