Weighted To The U.S. General Adult Population - Propensity

Fielding Period: March 19-21, 2021

- n=1,948 US Public

All data highlighted in **RED** is significantly higher, between subgroups (e.g., between White Americans vs. Black / African Americans or Republicans vs. Democrats), based on statistical significance testing using a Student's t-test at the 95% confidence level. See more information on sample and statistical testing below\*.

**Which of the following best describes your mindset when it comes to getting the COVID-19 vaccine when it becomes available to you?**

Source: Harris Poll March 19-21, 2021  
BASE: GENERAL PUBLIC (n=1948)

Which of the following best describes your mindset when it comes to getting the COVID-19 vaccine when it becomes available to you?

Generally speaking, how strictly do you think most people your age that you know are following COVID-19 precautions?

|                             | US Public | Gen Z (age 18-24) | Millennials (age 25-40) | Gen X (age 41-56) | Boomer+ (age 57+) |
|-----------------------------|-----------|-------------------|-------------------------|-------------------|-------------------|
| Very/Somewhat Strictly      | 69%       | 43%               | 62%                     | 72%               | 82%               |
| Not At All/Not Too Strictly | 31%       | 57%               | 38%                     | 28%               | 18%               |

Generally speaking, how many people do you know that have recently attended an informal gathering of over 20 people?

|            | US Public | Gen Z (age 18-24) | Millennials (age 25-40) | Gen X (age 41-56) | Boomer+ (age 57+) |
|------------|-----------|-------------------|-------------------------|-------------------|-------------------|
| Many       | 15%       | 20%               | 21%                     | 14%               | 10%               |
| Only a few | 44%       | 55%               | 52%                     | 44%               | 33%               |
| None       | 41%       | 25%               | 28%                     | 43%               | 57%               |

**\*Sample and Statistical Testing**

We adhere to rigorous sampling and weighting methods on the front- and back-ends of the data collection process to ensure that our samples are as representative of the target population as possible. For US public surveys, our weight targets are based on US Census data. Per AAPOR guidelines, we don't report on a "margin of error" as online surveys are not based on probability samples. For subgroup differences (e.g., between White Americans vs. Black / African Americans), we conduct statistical significance testing using a Student's t-test at the 95% confidence level.
