District Attorney Bonnie Dumanis
San Diego County District Attorney
Hall of Justice
330 W. Broadway
San Diego, CA 92101

Re: Investigation of ten San Diego judges and justices ignoring evidence of criminal perjury by an author of policy on behalf of the US Chamber of Commerce, while strategically litigating against the first person to publicly expose a deceit in US health policy – adversely impacting injured workers in San Diego county.

District Attorney Dumanis,

This is a formal request for investigation of ten San Diego judges and justices for aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce, by their failure to stop strategic litigation carried out by criminal means; and using the courts to retaliate against a whistleblower of the insurer fraud – errors of their courts. This request for investigation includes Justice Judith McConnell, who is currently running for Presiding Justice of the San Diego Fourth District Division One Court of Appeal.

I have already gone on record with the District Attorney's office over this matter. While I was sincerely hoping this was just an error of the courts as the case went from court to court; an unpublished Appellate Opinion in September followed up by a modification in October, leaves no doubt that this is not an accident. As Mr. Koerber, Deputy District Attorney suggested, I *did* file a complaint with the California Commission on Judicial Performance. However, I am not anticipating any action taken against these judiciaries from that government entity. Justice McConnell Chairs the Commission.

As the elected official in San Diego county, who oversees proper behavior and laws being followed by all elected government officials in San Diego county, please investigate how it has occurred that ten San Diego judges and justices just cannot seem to grasp that it is criminal to use perjury while strategically litigating over a matter of public health.

Attached is my complaint to the CJP along with my Petition for Review to the California Supreme Court; letter to the California State Bar (the second time I have asked them to look into suborning of perjury by a licensed California attorney) – while

strategically litigating to the benefit of insurers and adverse to public health and safety. Also attached is my letter to Governor Schwarzenegger in the capacity as President of the Regents of the University of California. This is because the US Chamber's environmental science carries the UC name while promoting it is scientifically proven claims of illness from mold are only being made because of "*trial lawyers, media, and junk science*". Unfortunately, the Regents of the UC have been profiting off of promoting this via expert defense witness fees of their physicians, when testifying for insurers in numerous litigations. Mr. Koerber already has a copy of my Petition that was denied by the Fourth District Division One.

When finding libel with actual malice has been proven by a standard of clear and convincing evidence; which has aided to discredit *all* my words for the public good and aids to allow a deception in science noted above to continue, the latest Appellate ruling ignores:

1. There is *no evidence* of me even once being impeached as to the subjective belief in the truthfulness of words.
2. I have been providing all courts, since September of 2005, with uncontroverted evidence that the plaintiff and author of policy for the US Chamber of Commerce has been committing perjury to establish false extenuating circumstances for my purported malice for him. Proof of malice is a requirement in libel law.

This Appellate panel actually had the audacity to write that the "sincerity of Kramer's views on the science" are not relevant to this litigation or thought process in support of the belief in my own writing; and while ignoring the evidence that I am responsible for causing a Federal Government Accountability Office audit that negates the validity of the US Chamber's "environmental" science, which I first wrote of, publicly, in the purportedly libelous writing where my views are not deemed relevant. (C'mon! This strategic litigation is not rocket science to understand and for what purpose!).

Something is terribly wrong in Justice McConnell's Fourth District Division One Court of Appeal, when six justices cannot grasp the law, that one cannot use perjury to make up a reason they were supposedly accused of perjury while strategically litigating on behalf of the interests of the insurance industry and the US Chamber of Commerce.

As this litigation has cost my family everything we own to defend the truth of my words for the public good; in the face of unbridled strategic litigating being rewarded in the San Diego county courts; and because of this situation being indicative of the courts having a different set of laws when the interests of the US Chamber of Commerce is involved; please investigate the following ten San Diego judges' and justices' roles in aiding and abetting insurer fraud to continue by their failure to stop a strategic litigation carried out by criminal means:

Justice Judith McConnell	Justice Patricia Benke
Justice Cynthia Aaron	Justice Richard Huffman
Justice Alex MacDonald	Justice Joan Irion
Judge Michael P. Orfield	Judge Lisa C. Schall
Judge Joel Pressman	Judge William S. Dato

A more detailed description may be read in the attached complaints to the CJP and the Ca Supreme Court. Links are provided so the documents may be read online. When you have further questions, please let me know. I am a real estate agent by profession. As such, I document everything.

Below is a video of how the insurer fraud scheme works to stave off insurer liability and has been permitted to infiltrate US policy while the San Diego courts have been *avoiding the evidence for five years*, that even if one is an author of policy for the US Chamber of Commerce, perjury is still criminal.

Watchdog On Science: Corrupt Doctors, the Untold Mold Story:
<http://watchdogonscience.blogspot.com/2009/08/corrupt-doctors-untold-mold-story.html>

Below is a video of the deposition of US Chamber author, Bruce J. Kelman, discussing his attempted coercion of me to endorse the environmental science of the US Chamber of Commerce before he would stop litigating - and after defeating my anti-SLAPP motion, with Justice McConnell ignoring my uncontroverted evidence of Kelman's perjury to establish false extenuating circumstances for my purported personal malice:

Deposition of Bruce Kelman, July 22, 2008:
<http://www.blip.tv/file/2063366/>

Although vast, the problem is very simple to solve. The first California judiciary or district attorney or politician that has the wherewithal and the integrity to put aside their politics and personal interests to stand up to the US Chamber of Commerce and acknowledge the irrefutable evidence of false extenuating circumstances being presented in a libel litigation to silence a whistleblower: ***"I testified the types and amounts of mold in the Kramer house could not have caused the life threatening illnesses she claimed"*** is criminal perjury by the author of the US Chamber of Commerce's and ACOEM's Mold Statements while strategically litigating in CJP & PJ Justice Judith McConnell's courts for five years over an interstate insurance fraud scheme – with ten San Diego judges and justices ignoring the uncontroverted evidence; this person of integrity will shut down the deceit that McConnell and nine of her subordinates have aided and abetted on behalf of the interests of the US Chamber and the insurance industry, with reckless

disregard for public health and safety; and with reckless disregard for democracy and the taxpayers of California and the United States.

Thank you, District Attorney Dumanis, for your prompt attention to this gravely serious matter in our San Diego judicial system that is adversely impacting the citizens of San Diego county and all citizens of the United States.

Sincerely,

Mrs. Sharon Kramer

State Bar of California
Office of the Chief Trial Counsel Intake
James E. Towery, Chief Trial Counsel
1149 South Hill Street
Los Angeles, California 90015-2299

Re: State Bar of California aiding and abetting interstate insurer fraud on behalf of affiliates of US Chamber of Commerce – failure to stop strategic litigation carried out by criminal means – suborning of perjury, attempted coercion into silence of a whistleblower by California licensed attorney, Keith Scheuer. Failure to acknowledge irrefutable evidence that one cannot use criminal perjury to make up a reason they would supposedly be accused of criminal perjury by the word “*altered*”, even if they are an author of policy papers that carry the name “University of California” on behalf of the affiliates of the US Chamber of Commerce.

Dear Mr. Towery,

My name is Sharon Kramer. I am a whistleblower of how it became false US public health policy that it was scientifically proven mold does not harm, involving the US Chamber of Commerce and the American College of Occupational and Environmental Medicine. (“ACOEM”) writes the workers comp guidelines the physicians in California must follow when treating injured workers under Senate Bill 899. In March of 2005, I wrote of how these two medico-legal policy papers, that both carry the name University of California in implied credentialed endorsement of the false science, are used together to propagate bias thought based on scant scientific foundation, while I named the names of those involved. From my March 2005 writing:

Jury Finds "Toxic Mold" Harmed Oregon Family, Builder's Arbitration Clause Not Binding Oregon City, OR - The case is a first in the Northwest to award personal injury damages to a family exposed to toxic mold in a newly built home. This verdict is significant because it holds construction companies responsible when they negligently build sick buildings....

...Dr. Bruce Kelman of GlobalTox, Inc, a Washington based environmental risk management company, testified as an expert witness for the defense, as he does in mold cases throughout the country. Upon viewing documents presented by the Hayne's attorney of Kelman's prior testimony from a case in Arizona, Dr. Kelman altered his under oath statements on the witness stand. He admitted the Manhattan Institute, a

national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure. Although much medical research finds otherwise, the controversial piece claims that it is not plausible the types of illnesses experienced by the Haynes family and reported by thousands from across the US, could be caused by "toxic mold" exposure in homes, schools or office buildings.

In 2003, with the involvement of the US Chamber of Commerce and ex-developer, US Congressman Gary Miller (R-CA), the GlobalTox paper was disseminated to the real estate, mortgage and building industries' associations. A version of the Manhattan Institute commissioned piece may also be found as a position statement on the website of a United States medical policy-writing body, the American College of Occupational and Environmental Medicine.

Kelman and his legal counsel, Keith Scheuer, sued me for libel in May of 2005, claiming the phrase "*altered his under oath statements*" was a maliciously false accusation of perjury. (see attached for case info) In over five years time, Kelman and Scheuer have provided *no evidence* of me even once being impeached as to the subjective belief in the validity and logic of why I used that phrase to describe Kelman's testimony:

"Declaration of Kramer submitted to the courts, July 2005: 'Within the prior sentences, Kelman testified 'We were not paid for that...', not clarifying which version he was discussing. There was no question asked of him at that time. He went on to say GlobalTox was paid for the 'lay translation' of the ACOEM Statement. He then altered to say 'They're two different papers, two different activities.' He then flipped back again by saying, 'We would have never been contacted to do a translation of a document that had already been prepared, if it hadn't already been prepared.' By this statement he verified they were not two different papers, merely two versions of the same paper. And that is what this lawsuit is really all about.

The rambling attempted explanation of the two papers' relationship coupled with the filing of this lawsuit intended to silence me, have merely spotlighted Kelman's strong desire to have the ACOEM Statement and the Manhattan Institute Version [sic US Chamber Mold Statement] portrayed as two separate works by esteemed scientists.

In reality, they are authored by Kelman and Hardin, the principals of a corporation called GlobalTox, Inc. – a corporation that generates much income denouncing the illnesses of families, office workers, teachers and children with the purpose of limiting the financial liability of others. One paper is an edit of the other and both are used together to propagate biased thought based on a scant scientific foundation.

Together, these papers are the core of an elaborate sham that has been perpetrated on our courts, our medical community and the American public. Together, they are the vehicle used to give financial interests of some indecent precedence over the lives of others.'(Appellant Appendix Vol.1

Ex.8:157-158) (Response to Court's Query, pp.10-11)" (Attached hereto as Exh 1, App.Erta.Pet.Rehearing 9/10, pp.8-14) [Pdf. Page 12 -18 <http://freepdfhosting.com/772caaaa70.pdf>]

Since September of 2005, I have been providing all courts to oversee this litigation that Kelman and Scheuer were using perjury to make up a reason for my purported malice, an element required to be substantiated in libel law. From the first of approximately 20 times the courts have been informed and evidenced of the perjury, my September 2005 declaration:

Mr. Sheuer has attempted to paint me as a vengeful woman who has an obsession to get back at Kelman for testimony he gave in our case in December, 2003. Sheueer states that my daughter and I claimed we acquired life threatening illnesses as a result of mold when what I really wanted was for my insurance company to pay for my house to be remodeled. He also states I was furious when Kelman testified that the science did not support what I wanted.

I am surprised at Mr Sheuer's lack of verification of facts before making these false and malicious statements, which are oddly not backed up with any support documentation attached. We were not even in litigation in December of 2003. But given the obvious lack of fact checking, I am not surprised at this answer. This would be a boilerplate scenario for Kelman to step into. Many people have life threatening illnesses after excessive exposure to mold and mycotoxins. It is a complaint that is quite common. In regard to these illnesses, it would be also be a boilerplate response for Kelman to say the science does not support this, based on the ACOEM Statement.

However, the boilerplate family Sheuer and Kelman describe is not our family. I do not know how Kelman could have testified in our case in December of 2003. We settled in October of 2003. Although very sick, I never claimed I had a life threatening illness. My daughter has always had the life threatening illness of CF. We ultimately received a fairly sizable settlement from all three defendants in the case. If we had chosen to correct the cross contamination that occurred during the remediation process, we received enough money to do so.

Ten San Diego judges and justices that have overseen this case at various times, have each and every one ignored the irrefutable evidence that the following is criminal perjury and suborning of criminal perjury to establish false extenuating circumstances for my purported personal malice. Specifically, Kelman presented the following false declaration statements before the San Diego courts no less than three times, 2005, 2006, 2008, while under penalty of perjury:

“She [Kramer] apparently felt that the remediation work had been inadequately done, and that she and her daughter had suffered life-threatening diseases as a result. I testified that the type and amount of mold in the Kramer house could not have caused the life-threatening illnesses that she claimed.”

Scheuer then used the above false declaration statement of Kelman’s to mislead the courts that I would have reason to harbor malice for Kelman and his company, based on a testimony Kelman is clearly evidenced to have never even given. Specifically within his briefs, Scheuer wrote:

“Dr. Kelman testified in a deposition that the type and amount of mold in the Kramer house could not have caused the life threatening illnesses that Kramer claimed. Apparently furious that the science conflicted with her dreams of a remodeled house, Kramer launched an obsessive campaign to destroy the reputation of Dr. Kelman and GlobalTox.”

In a libel litigation over a matter impacting public health, a defendant who has *never been impeached* as to the subjective belief in their words and who has provided all courts with *uncontroverted evidence* that the plaintiff, who just happens to be a policy paper author for the US Chamber and ACOEM, and his legal counsel have been using *perjury to establish false reason for the defendant’s malice*; the defendant has none the less been deemed the malicious liar of the case for the words “*altered his under oath statements*” – with the outcome being favorable to the interests of the affiliates of the US Chamber of Commerce. This is because if you deem one a liar for the word “*altered*”, you deem one a liar for all words – exposing the deception in US public health policy. Primarily, this deception would be used to benefit workers comp insurers in the state of California and other states, along with property casualty insurers who have benefited from the multitude of odd judicial errors of this strategic litigation.

In February through May of 2009, I provided the irrefutable evidence to the California State Bar that the above is perjury by the plaintiff Kelman and suborning of perjury by a California licensed attorney, Scheuer, in the form of timelines of the perjury, supporting legal documents and even a video of Kelman discussing his above perjury in deposition of July 2008 with Scheuer present.

Deposition of Bruce Kelman, July 22, 2008:

<http://www.blip.tv/file/2063366/>

The California State Bar, in May of 2009, declined to take action to stop a strategic litigation carried out by criminal means by one of their licensees over a matter adversely impacting public health in a manner favorable to the affiliates of the US Chamber of Commerce. On April 28, 2010, I sent a letter to Mr. Howard Miller, President of the State Bar and to Mr. Russell Weiner, Interim Chief of Trial Intake – along with numerous other decision makers. Explained in the letter and attached to the letter; I detailed how the scientific fraud of the US Chamber of Commerce and ACOEM over the mold issue

(promotes the concept that claims of illness from mold are only being made because of “*trial lawyers, media and junk science*” – with this US Chamber catch phrase specifically written for “*judges*”) was ruining many people’s lives while the University of California profits from promoting this deceit in its teaching facilities with federal funding and when its employees serve as professional defense witnesses for insurers in mold litigation, interstate and intrastate.

Below is a link to the letters I sent to the State Bar in 2010 along with my 2009 complaint to the State Bar to take action to stop one of their licensees from strategically litigating by criminal means to silence a whistleblower:

**Inquiry To State Bar # 09-2006 & Letter To President and Chief Trial
Intake, State Bar 2010**

<http://freepdfhosting.com/9e0993aed4.pdf>

**TRUTH OUT document that was an attachment to the 2010 letters to the
State Bar President & Chief of Trial Intake**

<http://katysexposure.wordpress.com/2010/04/30/truth-out-sharon-kramer-letter-to-andrew-saxon-mold-issue/>

Plainly stated, it does not take a legal scholar to understand that a plaintiff and his attorney cannot use perjury in one legal proceeding to make up a reason of why the plaintiff would be falsely accused of perjury in another legal proceeding. Yet, the State Bar of California has not been able to comprehend this simple fact of law and logic; and neither have ten San Diego judges and justices – including Justice Judith McConnell, Chair of the California Commission on Judicial Performance and Presiding Justice of the Fourth District Division One Court of Appeal.

Below is a link to a request to Justice McConnell to take action to stop bias in her courts under Local Rule 1.2.1 Bias in the Courts, September 17, 2010 – with a copy going to San Diego District Attorney, Bonnie Dumanis:

**Letter to McConnell, September 17, 2010 Local Rule 1.2.1, Bias in the
Courts**

<http://freepdfhosting.com/5857e4b797.pdf>

The below are statements made in Justice McConnell’s November 2006 unpublished anti-SLAPP Opinion (that her subordinate justices relied upon for their 2010 unpublished opinion) derogatorily deeming me a “crusading” liar for explaining and evidencing for her, how the deception works and who was involved; while she egregiously violated my first amendment rights to freely speak and evidence a fraud in health policy adversely impacting the lives of many. She twisted my explaining a deception in the “positions” of many organizations into evidence of malice personally for Kelman – even though there is not one piece of evidence in this litigation of me even uttering a harsh personal word of Kelman before I wrote of the deceit in March 2005:

“Further, in determining whether there was a prima facie showing of malice, the trial court also relied on the general tone of Kramer’s declarations. These declarations reflect a person, who motivated by personally having suffered by mold problems, is crusading against toxic mold and against those individuals and organizations who, in her opinion, unjustifiably minimized the dangers of indoor mold. Although this case involves only the issue of whether the statement “Kelman altered his under oath statements on the witness stand” was false and made with malice, Kramer’s declarations are full of language deriding the positions of Kelman, GlobalTox, ACOEM and the Manhattan Institute. [sic, McConnell neglected to mention the US Chamber of Commerce and US Congressman Gary Miller (R-Ca)] For example, Kramer states that people “were physically damaged by the ACOEM Statement itself” and that the ACOEM Statement is a document of scant scientific foundation; authored by expert defense witnesses; legitimized by the inner circle of an influential medical association, whose members often times evaluate mold victims o[n] behalf of insurers and employers; and promoted by stakeholder industries for the purpose of financial gain at the expense of the lives of others.” (Appellant Appendix Vol.1 Ex.12:256, 257)”

As such, State Bar, please take action *this time* to acknowledge the irrefutable evidence and discipline Keith Scheuer for his willfull suborning of perjury and attempted coercion into silence of a whistleblower when strategically litigating; while adversely impacting the health and safety of the California and US public in a manner favorable to the financial interests of the affiliates of the US Chamber of Commerce. It is obvious the courts are not going to do it on their own – too much politics and embarrassment of prior erred dispositions in prior election years. Mr. Scheuer has no less than a 28 year history of litigating in such a deceptive manner in the state of California.

“Defendants, in their zeal to present a portrait of plaintiff Roston...that would enhance their position, made reference to a multitude of cases which were inappropriate for consideration by the trial court... The presentation of such matter, if designedly done, is certainly to be discouraged. One might mistake it for an attempt to inflame the court against a party to the action.” Roston v. Edwards (1982) 127 Cal.App.3d 842 [179 Cal.Rptr. 830] Defense attorney, Keith Scheuer.

If no action is taken by a.) the California State Bar, b.) the California Commission on Judicial Performance, c.) the San Diego District Attorney’s Office and/or d.) the California Supreme Court to acknowledge the irrefutable evidence the following is criminal perjury to establish false reason for malice by an author of policy papers for the US Chamber and ACOEM that carry the name “University of California” while strategically litigating, ***“I testified the types and amounts of mold in the Kramer house could not have caused the life threatening illnesses she claimed”*** and the following is willful suborning of criminal perjury, ***Dr. Kelman testified in a deposition that the type and amount of mold in the Kramer house could not have caused the life threatening illnesses that Kramer claimed. Apparently furious that the science conflicted with her***

dreams of a remodeled house, Kramer launched an obsessive campaign to destroy the reputation of Dr. Kelman and GlobalTox. ; then one would have to assume there is a failure to train California government agencies and legal reviewing/disciplining bodies, that, legally, one cannot use criminal perjury while strategically litigating, even if one is an author of policy for the US Chamber of Commerce – of which the University of California profits while it aids to shift cost of injured workers and others off of insurers and onto taxpayers via state and federal disability funds. One would have to assume that the State of California is not concerned that criminal perjury has been successfully used in a strategic litigation to silence, punish, demean and financially cripple a California citizen, who is a whistleblower of a deceit in health policy that is ruining the lives of many.

To view a video of how the insurer fraud scheme works and has been permitted to infiltrate California and US public health policy, go to:

Watchdog On Science: Corrupt Doctors, the Untold Mold Story:
<http://watchdogonscience.blogspot.com/2009/08/corrupt-doctors-untold-mold-story.html>

Should the California State Bar require further documentation as you work to set integrity within the California judicial system and legal practices for the benefit of public interest by disciplining rouge California attorney, please do not hesitate to ask. I am a real estate agent by profession. As such, I document everything. Thank you in advance for your attention to this gravely serious matter.

Sincerely,

Mrs. Sharon Kramer

Governor Arnold Schwarzenegger
President of Regents UC
300 South Spring Street, Suite 167
Los Angeles, California 90013

Mary MacDonald
General Counsel, Regents of the UC
University of California
1111 Franklin Street, 7th Floor
Oakland, California 94607-5200

Re: University of California name being misused to instill bias in the courts, favorable to the interest of the affiliates of the US Chamber of Commerce, while shifting the cost of mold induced work related illness off of workers comp insures onto the taxpayers of California; and while the Regents of UC profit from promoting a fraud in health policy that claims of illness are a result of *“trial lawyers, media and junk science”* adverse to the public interest.

Honorable Governor Schwarzenegger and Ms. MacDonald,

In various communications in the spring of 2010, you were provided information and documentation of how the UC's good name is aiding and abetting to promote insurer fraud in mold litigation by lending false credibility to the environmental science of the US Chamber of Commerce. Specifically, the Regents of the UC were asked that their name be removed from “A Scientific View of the Health Effects of Mold”, US Chamber of Commerce, as it was being used in a legal proceeding in Arizona by a political action committee amicus to promote that the UC finds that science holds claims of death of infants in a moldy apartment complex were only being made because of *“trial lawyers, media and Junk Science”*. This request came to you from an organization made up of physicians, researchers, air quality professionals and advocates for the sick, injured and deceased - who are concerned of how the UC name is being misused to bias the courts favorable to the interests of the affiliates of the US Chamber of Commerce – and adverse to public health and safety. Specifically:

ACHEMMIC Letter To Regents of UC, May 15, 2010
<http://freepdfhosting.com/e88548fd20.pdf>

No action was taken by the UC to remove their name from the political and sectarian US Chamber publication. The bias in other courts continues on. Governor Schwarzenegger, you were informed in detail via notarized and registered letter on April 28, 2010, of how this fraudulent situation is adversely impacting the lives of many; by its ability to bias the courts against the sick, injured and their legal, medical and advocate proponents,.

TRUTH OUT, Sharon Kramer

<http://katysexposure.wordpress.com/2010/04/30/truth-out-sharon-kramer-letter-to-andrew-saxon-mold-issue/>

Registered Letter To Governor Schwarzenegger

<http://freepdfhosting.com/98ce8f8bb8.pdf>

I was eight years old when John F. Kennedy was assassinated. I remember saying to myself that day, "When I grow up, I am going to ask what I can do for my country; not what my country can do for me." Yet, today I write to you to ask what my country could do for me in exchange of what I have done for it. I am writing you today, to ask you a favor.

Before you say "Hasta la vista, Baby" to being the Governor of California and the President of the Regents of the University of California, could you please let the State Bar of California, the California Commission on Judicial Performance, the California Supreme Court and the San Diego District Attorney's office know that it is not okay in the state of California to violate the first amendment rights of its citizens by judicial decision makers ignoring criminal perjury on the issue of malice when strategically litigating - by authors of the mold policy papers for the US Chamber and ACOEM that carry the University of California name? I could really use you to step up to the plate and help our great state to stop promoting the false concept that mold does not harm – and that anyone who says it does; should be silenced, demeaned and financially crippled for exposing how the deceit works to bias the courts against the sick, injured and their proponents. This situation, if left unaddressed, is a serious threat to democracy, itself. An overview of the scheme, how it became policy in California and the US, and the adverse impact on injured workers and others:

Watchdog On Science: Corrupt Doctors, the Untold Mold Story:

<http://watchdogonscience.blogspot.com/2009/08/corrupt-doctors-untold-mold-story.html>

See attached relevant information to the Ca Supreme Court, the State Bar, the California Commission on Judicial Performance and the San Diego District Attorney's office. From prior communication with Ms. MacDonald, I feel certain she is able to comprehend and can explain for you the impact of what happens when the University of California name is misused to bias the courts in a manner favorable to the interests of the affiliates of the US Chamber and adverse to the interests of average California citizens.

Thank you for your prompt attention to this matter and enjoy your retirement. May you have a happy, rewarding life from here on out.

Sincerely,

Sharon Kramer

Attachment:

1. Petition for Review to CA Supreme Court
2. Complaint to the CA Commission on Judicial Performance against the Chair of the Commission on Judicial Performance – failure to stop criminal perjury in a strategic litigation, favorable to the interests of the US Chamber of Commerce.
3. Request to investigate to San Diego DA, Bonnie Dumanis, for ten San Diego judges and justices ignoring evidence of criminal perjury by the author of the US Chamber's and ACOEM's Mold Statements – that carry the UC name.
4. Request (second one) to the State Bar of California to discipline a CA licensed attorney for suborning of perjury and attempted coercion of a whistleblowing California citizen, while aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce.

This Complaint to the California Commission On Judicial Performance Against Justice Judith McConnell and nine of her subordinate San Diego Judges and Justices for aiding and abetting interstate insurer fraud - by failing to stop a strategic litigation carried out by criminal means by an author of environmental policy on behalf of the US Chamber of Commerce may be read online at: <http://freepdfhosting.com/11c9940a52.pdf>

Re: This complaint is against Justice Judith McConnell, Chair of the California Commission on Judicial Performance and Presiding Justice (“PJ”) of the Fourth District Division One Court of Appeal, along with nine of her subordinate San Diego judges and justices. This complaint for aiding and abetting a multi-billion dollar interstate insurer fraud scheme to defraud the public on behalf of the affiliates of the US Chamber of Commerce. This has occurred by McConnell and nine of her subordinates willfully refusing to acknowledge the undisputed evidence of a plaintiff’s criminal perjury while strategically litigating and used to establish false extenuating circumstances for a whistleblowing defendant’s purported malice. The plaintiff is an author of “environmental” policy for the US Chamber of Commerce. The defendant is the first to publicly expose how a scientific deception within the US Chamber’s policy has been used to set US policy, adverse to public health and favorable to the insurance industry. This complaint is for misusing the courts for political favor of US Chamber et al; and to silence and retaliate against a whistleblower of the Chamber’s influence of a deception US health policy; of which the University of California has played an intricate role; and to retaliate for exposing Justice McConnell’s role in aiding and abetting with reckless disregard for public health and safety.

Honorable California Commissioners on Judicial Performance,

**The First California Legal Decision Maker Who Acknowledges The
Irrefutable Evidence of A US Chamber Policy Author’s Criminal
Perjury On The Issue of Malice While Strategically Litigating, Will
Stop A Deception In Policy On Behalf Of The Insurance Industry & US
Chamber Of Commerce That Adverse To Public Health and Safety**

Plainly stated, the first politician, judge or justice who acknowledges the irrefutable evidence that the following sentence is criminal perjury, used in a strategic libel litigation for five years in the San Diego courts by US Chamber policy author, Bruce (“Kelman”), to establish false extenuating circumstances for Sharon (“Kramer’s”) purported personal malice while strategically litigating:

“I testified the types and amounts of mold in the Kramer house could not have caused the life threatening illnesses she claimed”; and

the first politician, judge or justice who acknowledges the irrefutable evidence that the following sentence is willful suborning of the US Chamber author’s criminal perjury by Ca licensed attorney, Keith (“Scheuer”) and used to establish false extenuating circumstances for personal malice in a strategic libel litigation base on a testimony of long ago that Kelman never even gave:

“Dr. Kelman testified in a deposition that the type and amount of mold in the Kramer house could not have caused the life threatening illnesses that Kramer claimed. Apparently furious that the science conflicted with her dreams of a remodeled house, Kramer launched an obsessive campaign to destroy the reputation of Dr. Kelman and GlobalTox.”and

the first politician, judge or justice who acknowledges the irrefutable evidence that Kelman has *provided no evidence* within over five years of strategically litigating, of Kramer even once being impeached as to the subjective belief in the truthfulness of her purportedly libelous words *“altered his under oath statements on the witness stand”* when writing of Kelman’s February 2005 expert testimony in a trial in Oregon, March of 2005:

“Declaration of Kramer submitted to the courts, July 2005: ‘Within the prior sentences, Kelman testified ‘We were not paid for that...’, not clarifying which version he was discussing. There was no question asked of him at that time. He went on to say GlobalTox was paid for the ‘lay translation’ of the ACOEM Statement. He then altered to say ‘They’re two different papers, two different activities.’ He then flipped back again by saying, ‘We would have never been contacted to do a translation of a document that had already been prepared, if it hadn’t already been prepared.’ By this statement he verified they were not two different papers, merely two versions of the same paper. And that is what this lawsuit is really all about.

The rambling attempted explanation of the two papers’ relationship coupled with the filing of this lawsuit intended to silence me, have merely spotlighted Kelman’s strong desire to have the ACOEM Statement and the Manhattan Institute Version [sic US Chamber Mold Statement] portrayed as two separate works by esteemed scientists. In reality, they are authored by Kelman and Hardin, the principals of a corporation called GlobalTox, Inc. – a corporation that generates much income denouncing the illnesses of families, office workers, teachers and children with the purpose of limiting the financial liability of others. One paper is an edit of the other and both are used together to propagate biased thought based on a scant scientific foundation.

Together, these papers are the core of an elaborate sham that has been perpetrated on our courts, our medical community and the American public. Together, they are the vehicle used to give financial interests of some indecent precedence over the lives of others.’(Appellant Appendix Vol.1 Ex.8:157-158) (Response to Court’s Query, pp.10-11)” (Attached hereto as Exh 1, App.Erta.Pet.Rehearing 9/10, pp.8-14) [Pdf. Page 12 -18 <http://freepdfhosting.com>: and

the first politician, judge or justice who acknowledges the irrefutable evidence that Kramer’s March 2005 writing was the first to publicly expose how it became false US public health policy involving the US Chamber of Commerce, that mold does not harm for the purpose of biasing the courts to deny financial liability for insurers while Kramer named the names of those involved in the scheme:

Published March 9, 2005 by Sharon Kramer – “Jury Finds ‘Toxic Mold’ Harmed Oregon Family, Builder's Arbitration Clause Not Binding”
“Oregon City, OR - The case is a first in the Northwest to award personal injury damages to a family exposed to toxic mold in a newly built home. This verdict is significant because it holds construction companies responsible when they negligently build sick buildings.....the Manhattan Institute, a national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure. Although much medical research finds otherwise, the controversial piece claims that it is not plausible the types of illnesses experienced by the Haynes family and reported by thousands from across the US, could be caused by "toxic mold" exposure in homes, schools or office buildings. In 2003, with the involvement of the US Chamber of Commerce and ex-developer, US Congressman Gary Miller (R-CA), the GlobalTox paper was disseminated to the real estate, mortgage and building industries' associations. A version of the Manhattan Institute commissioned piece may also be found as a position statement on the website of a United States medical policy-writing body, the American College of Occupational and Environmental Medicine. [http://www.moldwarriors.com/SK/PressReleaseComplaint.pdf], and

the first politician, judge or justice who acknowledges the irrefutable evidence that in McConnell’s courts, a plaintiff, who is an author of policy papers for the US Chamber of Commerce in is above the law and can therefore use criminal perjury while strategically litigating to silence a whistleblower of a multibillion dollar fraud in the US policy by the US Chamber et al,....

Wins the Prize!!!! of being recognized as the first California legal decision maker who actually cares more about the health, safety and welfare of California and United States citizens; democracy; freedom of speech for the public good without fear of retribution; and integrity within our judicial system - than they do of the interests of the affiliates of US Chamber of Commerce and politics. This currently unknown entity will

be removing the scientific fraud that marketed its way into health policy by the US Chamber and affiliates that it has been scientifically proven claims of illness from mold and its toxins are only being made because of “*trial lawyers, media and Junk Science*” when they acknowledge the undeniable evidence of US Chamber author, Kelman’s, perjury going ignored in the San Diego court system for five years. They will be stopping Justice Judith McConnell and her subordinate justices from covering up and retaliating against a whistleblower who has exposed the deceit of the US Chamber and Justice McConnell’s abuse of elected and appointed office while aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber. This is because:

“When this Reviewing Court acknowledges what legally cannot be denied: Kramer’s overwhelming, uncontroverted and irrefutable evidence that seven judges and justices [sic, now ten] ignored Kramer’s overwhelming, uncontroverted and irrefutable evidence of Kelman’s perjury on the issue of malice and ignored Kramer’s vast evidence of Scheuer’s willful suborning of Kelman’s criminal perjury; then seven years worth of scientific fraud perpetrated on US Courts over the mold issue by the US Chamber of Commerce et al. will immediately cease by the acknowledgment that their author of their scientific fraud has no qualms about lying under oath to the courts and strategically litigating; and while their other author (sic, Bryan “Hardin”) does not disclose he is a party to the strategic litigation.” (App.Reply.To.Court.Query, pp.43-45).”
(Appellant’s Petition for Rehearing, p. 22)

Aiding and Abetting Insurers To Shift Cost Of Illness To Taxpayers

This complaint is for writing unpublished opinions that stealthily aid and abet insurers to shift the cost of illness from water damaged building (“WDB”) exposures off of workers comp and property casualty insurers onto California and US taxpayers via social disability programs; while using the courts to retaliate and chill speech of a whistleblower.

To watch a ten minute video of how this scheme works and who has been involved in promoting it and profiting from it go to: Watchdog On Science: Corrupt Doctors, the Untold Mold Story

<http://watchdogonscience.blogspot.com/2009/08/corrupt-doctors-untold-mold-story.html>

To watch a video of how the US Chamber paper came to be and the fraud in science behind it, go to:

<http://www.blip.tv/file/2756814/>

To watch a video of Kelman using this litigation to attempt to coerce Kramer to endorse his science after McConnell ignored the evidence of Kelman's perjury when denying an anti-SLAPP motion, used to establish false reason for Kramer's purported malice within the same writing Kramer was the first to expose a deceit in science and health policy for the public good, go to:

<http://www.blip.tv/file/2063366/>

Judiciaries Involved & Parties To The Litigation

This matter involves the libel litigation that began in May 2005, of Kelman and GlobalTox v. Kramer, ("Kelman v Kramer") D047758 Fourth District Division One, November 16 ("2006 unpublished anti-SLAPP Opinion") written by Justice Judith ("McConnell") and affirmed by Justices Cynthia ("Aaron") and Alex ("MacDonald"); GIN044539 North San Diego County Superior Court overseen by Judges Michael P. ("Orfield"), Lisa C. ("Schall"), Joel ("Pressman") and William S. ("Dato") respectively from 2005 to 2009; and D054496 September 14 ("2010 unpublished Opinion") written by Justice Patricia ("Benke") and affirmed by Justices Richard ("Huffman") and Joan ("Irion"); along with a ("Defendant's Petition for Rehearing") denied October 13, 2010, by Benke. The sole claim of the libel action is that the defendant's use of the phrase in an Internet ("March 2005 writing") "*altered his under oath statements on the witness stand*" was a maliciously false accusation of perjury on the part of the plaintiff while giving an expert defense witness ("February 2005 testimony") in Oregon.

The lead plaintiff in the libel litigation is, Bruce Kelman. He is a co-the author of "A Scientific View of the Health Effects of Mold" for the US Chamber in 2003. (US Chamber Mold Statement") He is also a co-author of "Adverse Human Health Effects of Molds in the Indoor Environment" for the American College of Occupational and Environmental Medicine in 2002. ("ACOEM Mold Statement"). He and ex-CDC/NIOSH employee/undisclosed party to this litigation, Bryan ("Hardin"), are two of the six owners of the corporation, ("VeriTox" Inc) – formerly known as GlobalTox, Inc. Kelman and Hardin are Phd toxicologists and prolific expert witnesses for the defense in mold litigation with no research backgrounds in study of health effects of mold. Hardin co-authored the US Chamber's and ACOEM's Mold Statements along with Kelman.

The defendant in the litigation, Sharon Kramer was instrumental in causing a 2008 Federal Government Accountability Office (GAO) audit and report "Indoor Mold: Better Coordination of Research on Health Effects and More Consistent Guidance Would Improve Federal Efforts" (GAO Report). Although this GAO audit specifically deleted looking into who had conflicts of interest when establishing policy over the mold issue; this report negates the scientific validity of Kelman's and Hardin's writings on behalf of the US Chamber and ACOEM; (which promote the false concept that it is scientifically proven claims of severe illness from mold and toxin exposure are based on "junk science", media hype and unscrupulous trial lawyers). The GAO Report establishes

federal acknowledgment that science holds these serious illnesses are biologically plausible to be occurring from exposure to mold and toxins found in WDB. The report calls for more consistent message to improve research and public health advisories. To hear a 2008 interview Kramer gave for IAQ Radio in which it is known within the issue Kramer is responsible for causing the GAO Report, [<http://www.talkshoe.com/talkshoe/web/audioPop.jsp?episodeId=77328&cmd=apop>]

This 2008 Federal GAO Report, that was ordered by late Senator Edward Kennedy in 2006 at Kramer's urging, most likely never would have come to be had Kramer been intimidated or coerced into silence by this strategic litigation that began its journey through the San Diego court system in May of 2005. (App. Errata Petition For Rehearing pp.20 regarding Kelman's attempted coercion of Kramer to endorse his science before he would stop litigating after defeating the anti-SLAPP motion through the use of perjury – Kramer refused and suffered hundreds of thousands of dollars in litigation expense instead) (Attached hereto as Exh.1, App Errata Petition for Rehearing, pp.20) [Pdf. Page 24 <http://freepdfhosting.com/772caeea70.pdf>]

The deceptive concept for the insurer friendly campaign by the US Chamber, ACOEM et al, - which the GAO Report negates - is founded on a solo and flawed modeling theory by Hardin and Kelman that was legitimized by ACOEM (which is not a college – it is a trade association of workers comp physicians) that was then mass marketed into US policy and the courts by ACOEM, the Manhattan Institute think-tank and the US Chamber of Commerce.

Kramer holds a BBA in marketing and is a real estate agent by profession. She is published in the Journal of Allergy and Clinical Immunology in 2006; and the International Journal of Occupational and Environmental Health in 2007. These publications that were not permitted to be discussed in the August 2008 trial are “Nondisclosure of Conflicts of Interest is Perilous to the Advancement of Science” and “ACOEM A Professional Organization in Service to Industry”. They are regarding the conflicts of interest behind ACOEM and the US Chamber when mass marketing a deception of science into health policy used to sell doubt of workers comp and property casualty insurer liability for causation of illness from WDB. The conflict driven concept is used to lend false credence to expert witnesses for the defense in mold litigation, such as Kelman and Hardin, that these illnesses “Could not be” caused by WDB. As evidenced for the courts many times over and never impeached, Kramer is of the opinion Kelman “altered his under oath statements on the witness stand” in an effort to hide the true close ties of the political and sectarian US Chamber Mold Statement from that of the purportedly unbiased science of ACOEM.

Latest Unpublished Opinion Evidences That Aiding The Interests Of The US Chamber Has Been No Accident in McConnell's Court.

While there have been many odd errors in this litigation over the past five years; Kramer evidenced and stated many times over of how Kelman's perjury went ignored by all San Diego judges and justices. When the courts are provided detailed and uncontroverted evidence, yet still choose to ignore – there can be no question it was never the intention of the courts to follow the law that governs proof of libel with actual malice. Kramer filed a Petition for Review to the California Supreme Court on October 22, 2010, that denotes many of the US Chamber favorable errors of McConnell's courts. It is attached to this request that the California Commission on Judicial Performance investigate how it is even remotely possible that ten San Diego judges and justices are unable to grasp that a plaintiff cannot use criminal perjury to establish false reason of why a defendant would want to accuse them of criminal perjury. It, and many of the links to other documents from this case, may be read online at:

October 22, 2010 Petition For Review By California Supreme Court

Relevant Canons of Judicial Ethics Violated in Kelman v. Kramer

The following Canons of Judicial Ethics have been violated in the litigation of Kelman v. Kramer by McConnell and nine of her subordinates, adverse to the public's interest and greatly harming to Kramer, who dared to write the truth of the US Chamber and ACOEM aiding to promote interstate insurer fraud in policy, claims handling practices and litigation with reckless disregard for public health and safety.

“Deference to the judgments and rulings of courts depends upon public confidence in the integrity and independence of judges. The integrity and independence of judges depend in turn upon their acting without fear or favor. Although judges should be independent, they must comply with the law* and the provisions of this Code. Public confidence in the impartiality of the judiciary is maintained by the adherence of each judge to this responsibility. Conversely, violations of this Code diminish public confidence in the judiciary and thereby do injury to the system of government under law.”

California Commission on Judicial Performance

Canon 2 A. Promoting Public Confidence

A judge shall respect and comply with the law* and shall act at all times in a manner that promotes public confidence in the integrity and impartiality of the judiciary.

Canon 2 B. Use of the Prestige of Judicial Office

(1) A judge shall not allow family, social, political, or other relationships to influence the judge's judicial conduct or judgment, nor shall a judge convey or permit others to convey the impression that any individual is in a special position to influence the judge.

Canon 3 B. Adjudicative Responsibilities

(2) A judge shall be faithful to the law* regardless of partisan interests, public clamor, or fear of criticism, and shall maintain professional competence in the law.

(5) A judge shall perform judicial duties without bias or prejudice. A judge shall not, in the performance of judicial duties, engage in speech, gestures, or other conduct that would reasonably be perceived as (1) bias or prejudice, including but not limited to bias or prejudice based upon...disability....[sic, bias against a class of people - those disabled by molds; bias of deeming one of their staunchest advocates a malicious liar for publicly stating they are disabled by mold and exposing that the US Chamber & ACOEM are stopping them from receiving treatment; bias against taxpayers aiding to shift the cost of mold disabled onto them and off of insurers; bias favorable to the financial interests of the affiliates of the US Chamber of Commerce]

(8) A judge shall dispose of all judicial matters fairly, promptly, and efficiently. A judge shall manage the courtroom in a manner that provides all litigants the opportunity to have their matters fairly adjudicated in accordance with the law.

Canon 3 C. Administrative Responsibilities

(1) A judge shall diligently discharge the judge's administrative responsibilities impartially, on the basis of merit, without bias or prejudice, free of conflict of interest, and in a manner that promotes public confidence in the integrity of the judiciary. [sic, prejudice that one person can make a difference. Automatically deeming Kramer a malicious liar for saying the US Chamber and ACOEM was harming people while ignoring the evidence corroborating they were. Once deemed a liar for speaking the truth for public good – deemed a liar for all else she said, wrote and evidence. Prejudice favorable to the financial interests of the affiliates of US Chamber of Commerce]

Canon 3 D. Disciplinary Responsibilities

(1) Whenever a judge has reliable information that another judge has violated any provision of the Code of Judicial Ethics, the judge shall take or initiate appropriate corrective action, which may include reporting the violation to the appropriate authority.

(2) Whenever a judge has personal knowledge that a lawyer has violated any provision of the Rules of Professional Conduct, [sic, a defendant's uncontroverted evidence of willful and repeated suborning of perjury by the plaintiff's attorney to create false extenuating circumstances, false theme of personal malice to inflame the courts for 5 years in the San Diego Court system] the judge shall take appropriate corrective action.

Instances Of Judiciaries Actions That Have Aided And Abetted Insurer Fraud On Behalf Of US Chamber Affiliates

In November 2006, McConnell issued the unpublished anti-SLAPP Opinion within days after she was re-elected as an appellate court justice and while ignoring Kramer's evidence of US Chamber author, Kelman's, perjury on the issue of malice; and ignoring Kramer's evidence that his business partner, Hardin, who is a retired NIOSH employee, was missing from the Certificate of Interested Parties. This was occurring approximately at the same time that US Federal Attorney, Carol Lam from San Diego, was improperly removed from office under the Bush Administration.

What was also occurring at this time, was that under former Attorney General Alberto Gonzales, the US Department of Justice was using Kelman and his company of VeriTox, Inc, to defeat claims of illness in sick military families – while McConnell was unable to grasp that Kelman, author policy for the US Chamber and ACOEM, cannot legally use criminal perjury while strategically litigating against one who speaks against a deception in science and US public health policy. To view a video of Kelman discussing being hired by the US DOJ as an expert defense witness in mold litigation involving military housing in 2006, go to:

<http://www.blip.tv/file/1179698/>

To date, six San Diego Appellate Court justices have written unpublished opinions in which they do not even mention Kramer's uncontroverted evidence of US Chamber/ACOEM author/VeriTox owner, Hardin, being improperly missing from the named parties to this litigation on Certificate of Interested Parties submitted to the Fourth District Division One Appellate Court in 2006 and 2009; while simultaneously not mentioning Kramer's uncontroverted evidence of Hardin's business partner, Kelman, committing perjury in his declarations to establish false reason for Kramer's purported personal malice. McConnell, MacDonald and Aaron ignored this evidence in 2006. Upon review of the case, Benke, Huffman and Irion also ignored in 2010.

These matters were discussed in Oral Argument of June 17, 2010 before the Benke Panel with six witnesses in the room and with the audio transcript of Oral Argument available from the Fourth District, Division One and attached to this complaint. The six witnesses are: Judy O'Reilly, Michael Kramer, Helen Noonan, Debbie Funderburk, and William Brown, Esq., all from San Diego county; along with Connie Bailey from Atlanta, GA. The Panel was directed to the undisputed evidence of Kelman's perjury in

Kramer's Appendix, with Justice Irion taking notes and writing it down. Yet, not one of the three justices even asked Kelman's attorney, Scheuer, a single question regarding Kelman's perjury on the issue of malice. The Benke Panel violated Canons of Judicial Ethics, **2.A.,2.B.(1)(2)(5)(8),3.C.(1),3.D.(1)(8)**

On September 17, 2010, McConnell in the capacity as PJ and under San Diego Rules of the Court 1.2.1 Policy Against Judicial Bias, was asked by Kramer to intercede to stop the bias in her court and the 2010 unpublished Opinion, that is rewarding perjury and strategic litigation by a US Chamber author and is adversely impacting public health; while aiding and abetting interstate insurer fraud in claims handling practices and litigation. No response was received by Kramer from PJ McConnell. This request detailing the bias in McConnell's appellate court adverse to public health and safety and favorable to the interests of the affiliates of the US Chamber may be read at: [<http://freepdfhosting.com/5857e4b797.pdf>] Failure to respond or take action, **McConnell has violated Canons of Judicial Ethics 2.A.,2.B.(1)(2)(5)(8),3.C.(1),3.D.(1)(8).**

Witnesses to this request are the San Diego District Attorney, Bonnie Dumanis, and Deputy DA insurance fraud division, James Koerber; who also received a copy of the request made to McConnell; along with requests from Ca Insurance Commissioner Candidate Dina Padillia to investigate how an ACOEM physician is aiding to shift the cost of workers comp insurers onto taxpayers in San Diego county – a fact of which McConnell is aware and has been noticed. The DA was asked to investigate workers comp insurer fraud at Toyota of Poway and involving the policy established by ACOEM along with an ACOEM physician who was hired by the Toyota of Poway workers comp insurer to evaluate mold injured workers. Witnesses to this are Tim Hack and three other mold injured workers from Toyota of Poway, along with Steve Zelter of California Coalition For Workers Memorial Day

Justice McConnell is currently running for re-election as the PJ of the Fourth District Division One Appellate Court, San Diego county under the platform of "Decide legal disputes according to the constitution, the law and legal precedent; ensure that cases are resolved in an expeditious and appropriate manner; work to improve the court system in California". She is the highest elected official overseeing integrity in the judicial process in the county. The DA office's charge is to oversee integrity of elected officials in San Diego county. Justice McConnell is fully aware of the risk to democracy when the US Chamber of Commerce interests are given precedence in the courts.

"American democracy 'may well be at risk' as judicial campaigns turn into special-interest funded political contests in which candidates are pressured into taking political stances, Fourth District Court of Appeal Presiding Justice Judith McConnell told a community forum....'Judicial independence does not mean judges are unaccountable or allowed to follow their whims, it means they are independent of the other branches of government,' she explained..... 'Judges', she said, 'should not be accountable to politicians...or the clamor of the moment.'" MetNews, May

24, 2010, “*Judicial Campaigns May Put Democracy at Risk, CJP Chair Says*” [<http://www.metnews.com/articles/2010/foru052410.htm>]

In 2010, while using circular logic to justify ignoring evidence of perjury in a strategic litigation by a US Chamber author; the Benke Panel’s 2010 unpublished Opinion is that if the McConnell Panel ignored Kramer’s uncontroverted evidence of US Chamber/ACOEM author fraud in their 2006 unpublished opinion; and ignored Kramer’s uncontroverted evidence that an ex-federal NIOSH employee’s name was improperly missing from a Certificate of Interested Parties; and ignored the fact that there was *no evidence* of Kramer ever being impeached as to the subjective belief in the truth of her words; then as a reviewing court of the matter in 2010, the Benke Panel should again ignore Kramer’s irrefutable evidence of Kelman’s fraud adversely impacting public health, while deeming Kramer’s “views” irrelevant as to why she wrote what she wrote. This, they argue, is to keep consistency in decision making of the San Diego Appellate Court. They self justify skirting what is required when courts are faced with irrefutable evidence of fraud by stating only “nominal damages” were awarded, ignoring the evidence of the hundreds of thousands of dollars in litigation it has cost Kramer to defend the truth of her words. And ignoring that this stance is aiding to discredit the validity of all of Kramer’s words by falsely deeming her a malicious liar, while the public is harmed in the process by her chilled speech. Accurately stated in the 2010 unpublished Opinion, all lower courts *did* follow McConnell’s lead. They too, each and every one, ignored Kramer’s uncontroverted evidence of Kelman’s perjury on the issue of malice used to strategically litigate to the advantage of affiliates of the US Chamber. The Benke Panel stated:

“...any disagreement we might entertain with respect to our prior disposition would be no more than that: a disagreement. Given that circumstance and the fact that only nominal damages were awarded against Kramer, the value of promoting stability in decision making far outweighs the value of any reevaluation of the merits of our prior disposition. (See *People v. Shuey*, *supra* 13 Cal.3d at p. 846.) Accordingly, on appeal Kramer is bound by our prior determinations of law. Application of the law of the case doctrine disposes of Kramer’s initial argument on appeal that the trial court erred in relying on our prior opinion in framing the issues tried on remand. The trial court was bound by our determinations of law and thus did not err in relying on those determinations in framing the issues for trial. (*People v. Shuey*, *supra*, 13 Cal.3d at p. 846.)” (2010 unpublished Opinion, pp. 12)

Well established fact of law, that a plaintiff cannot legally use perjury to establish a false reason for a defendant’s malice and zero evidence of a defendant ever being impeached as to their belief of their words, govern what does not constitute clear and convincing proof of libel with actual malice, but do indicate there is something terribly amiss in McConnell’s court. As the courts have been repeatedly evidenced since July of 2005, everyday this strategic litigation carried out by criminal means is allowed to

continue in the California court system aided by the Chair of the California Commission on Judicial Performance/Presiding Justice of Fourth District Division One; democracy itself is being threatened, lives are being ruined and costs of illness from WDB are being shifted off of the insurance industry and onto the good citizens of California and the United States.

TIMELINE & CANON VIOLATIONS OF THE MCCONNELL COURTS IGNORING THE LAW FAVORABLY TO THE INTERESTS OF THE US CHAMBER

Judiciary #1. Michael P. Orfield, October 2005 ignored Kelman's perjury when denying Kramer's anti-SLAPP motion.

Bias. Failure to stop a plaintiff's criminal activity to establish false extenuating circumstances for a defendant's purported personal malice in a strategic litigation, thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce. **Canon violations 2A,3B(2),3B(5)(8),3C(1).**

Kelman declaration September 2005: *"I testified the types and amounts of molds found in the Kramer house could not have caused the life threatening illnesses she claimed"*.

Scheuer brief reciting the above false declaration statement of Kelman's while attributing the fraud as reason for Kramer to harbor personal malice for Kelman: *"Dr. Kelman testified in a deposition that the type and amount of mold in the Kramer house could not have caused the life threatening illnesses that Kramer claimed. Apparently furious that the science conflicted with her dreams of a remodeled house, Kramer launched an obsessive campaign to destroy the reputation of Dr. Kelman and GlobalTox."*

Along with overseeing the lower court when denying Kramer's anti-SLAPP motion in 2005; and motion for summary judgment in 2008; Judge Orfield also oversaw Kramer's litigation with her insurer in 2002/2003. He signed the three settlement agreements in which Kramer and her family received approximately one half of one million dollars. Kramer had no reason to be furious with Kelman or anyone that *"the science conflicted with her dreams of a remodeled home"*, because it did not. Kelman had actually testified that the Kramer home posed an increased risk for the Kramer daughter, who is genetically disabled by Cystic Fibrosis and that a physician with detailed knowledge must be consulted regarding the safety of the Kramer home. These facts were brought to Orfield's attention in Kramer's declaration submitted to him in July and September of 2005, along with the following statement evidencing Kelman was committing perjury to establish the prior case Orfield oversaw was a reason for Kramer to harbor malice:

“Mr. Sheuer has attempted to paint me as a vengeful woman who has an obsession to get back at Kelman for testimony he gave in our case in December, 2003. Sheuer states that my daughter and I claimed we acquired life threatening illnesses as a result of mold when what I really wanted was for my insurance company to pay for my house to be remodeled. He also states I was furious when Kelman testified that the science did not support what I wanted.

I am surprised at Mr Sheuer’s lack of verification of facts before making these false and malicious statements, which are oddly not backed up with any support documentation attached. We were not even in litigation in December of 2003. But given the obvious lack of fact checking, I am not surprised at this answer. This would be a boilerplate scenario for Kelman to step into. Many people have life threatening illnesses after excessive exposure to mold and mycotoxins. It is a complaint that is quite common. In regard to these illnesses, it would be also be a boilerplate response for Kelman to say the science does not support this, based on the ACOEM Statement.”

However, the boilerplate family Sheuer and Kelman describe is not our family. I do not know how Kelman could have testified in our case in December of 2003. We settled in October of 2003. Although very sick, I never claimed I had a life threatening illness. My daughter has always had the life threatening illness of CF. We ultimately received a fairly sizable settlement from all three defendants in the case. If we had chosen to correct the cross contamination that occurred during the remediation process, we received enough money to do so.

Judiciaries # 2, 3, 4 Justices Judith McConnell, Cynthia Aaron & Alex MacDonald, November 16, 2006 when affirming the denial of Kramer’s anti-SLAPP motion

Bias. Failure to stop a plaintiff’s criminal activity in a strategic litigation thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce. Denying a defendant’s anti-SLAPP motion while ignoring evidence of the plaintiff’s criminal perjury and his attorney’s suborning of it to establish false extenuating circumstances for the defendant’s purported personal malice. Refusing to take judicial notice of the evidence that a retired high level Federal CDC/NIOSH employee was missing from the Certificate of Interested Parties. Without verifying the validity or lack there of, twisting Kramer’s truthful and well evidenced speech for the public good describing flawed positions of several organizations into evidence of personal malice for Kelman - based solely on the fact that they did not like Kramer’s tone...days after McConnell and Aaron being re-elected as Fourth District Division One Appellate Justices. **Canon violations 2A,2B,3B(2)(5)(8),3C(1),3D(1)(2)** From the McConnell Panel 2006 unpublished anti-SLAPP Opinion:

2006 Appellate Opinion: “Further, in determining whether there was a prima facie showing of malice, the trial court also relied on the general tone of Kramer’s declarations. These declarations reflect a person, who motivated by personally having suffered by mold problems, is crusading

against toxic mold and against those individuals and organizations who, in her opinion, unjustifiably minimized the dangers of indoor mold. Although this case involves only the issue of whether the statement “Kelman altered his under oath statements on the witness stand” was false and made with malice, Kramer’s declarations are full of language deriding the positions of Kelman, GlobalTox, ACOEM and the Manhattan Institute. [sic, the Appellate Court neglected to mention the US Chamber of Commerce] For example, Kramer states that people “were physically damaged by the ACOEM Statement itself” and that the ACOEM Statement is a document of scant scientific foundation; authored by expert defense witnesses; legitimized by the inner circle of an influential medical association, whose members often times evaluate mold victims o[n] behalf of insurers and employers; and promoted by stakeholder industries for the purpose of financial gain at the expense of the lives of others.” (Appellant Appendix Vol.1 Ex.12:256, 257)”

2009 Kramer’s Opening Brief: “In addition, within Brown’s brief to the Appellate Court of April 7, 2005[6], Brown [Kramer’s attorney] wrote: “Kelman states in his declaration at page 5, paragraph 8, lines7-10 (Appendix 358) that Mrs. Kramer and her daughter were claiming life threatening illness from exposure to mold in the underlying litigation, when in fact, in Mrs. Kramer’s declaration in reply, she showed that she never claimed a life threatening illness in that suit, and that her daughter, a cystic fibrosis sufferer (a life threatening illness) had also be inflicted with ABPA (an invariably fatal illness to cystic fibrosis sufferers) since 1998, before the improper mold remediation occurred.” (Vol.I App.208) The claimed Mercury testimony given by Respondent was in reality, never given. But the false theme was off and running with the Appellate Court denial of November of 2006, that Appellant was a vindictive, know nothing, litigant out to get a great science expert stemming from Mercury. (Vol.I App.244-263)”

2006 Appellate Opinion: “While the Kramer family eventually settled and recovered damages from the insurance company, a reasonable jury could infer that Kramer harbored some animosity toward Kelman for providing expert services to the insurance company and not supporting her position.’ (Vol.I app.255)”

.....
“Kramer asked us to take judicial notice of additional documents, including the complaint and an excerpt from Kelman's deposition in her lawsuit against her insurance company. We decline to do so as it does not appear these items were presented to the trial court.’(Vol.I App.250)”

.....
“Initially, we note this lawsuit is not about a conspiracy. This lawsuit was filed by Kelman and GlobalTox alleging one statement in a press release was libelous. Thus, conspiracy issues are not relevant.’(Vol.I App.262)”

This bias illustrated in detail by the McConnell Panel's 2006 unpublished anti-SLAPP opinion - that Kramer was deemed a liar for saying Kelman was making up reason for her malice – even in the face of irrefutable evidence that she was not; and deemed a malicious liar for stating that the US Chamber and ACOEM were aiding insurer fraud; has caused the San Diego Fourth District to also aid and abet interstate insurance fraud by its failure to stop a strategic litigation carried out by criminal means on behalf of the financial interest of the affiliates of the US Chamber of Commerce to silence a whistleblower.

Judiciary #1 again. Michael P. Orfield, June 2008 when denying Kramer's motion for summary judgment while ignoring the evidence of Kelman's perjury for a second time.

Bias. Evidenced again of Kelman's perjury on the issue of malice that was again submitted in his declaration, March 2008. Failure to stop a plaintiff's criminal activity in a strategic litigation thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber. Denying a defendant's motion while ignoring the fact that in three years time since Orfield denied the anti-SLAPP there was zero evidence obtained through discovery of Kramer ever being impeached as to her subjective belief in the validity of her words, thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce. **Canon violations 2A,3B(2),3B(5)(8),3C(1)**

Kelman again submitted the perjury in his declarations. Orfield was again told and evidenced it was perjury. Orfield again ignored the evidence. After three years of litigation by this point in time, Orfield ignored that there was no evidence presented of Kramer ever being impeached as to her subjective belief in the validity of her word. A source witness who was in the court room submitted affidavits that Kramer's writing was accurate.

Judiciary # 5. Lisa C. Schall, August 2008 trial judge; December 2008 post trial motion judge.

Bias. As accurately stated in the 2010 unpublished Opinion, Schall framed the scope of the trial on the 2006 unpublished anti-SLAPP Opinion which caused Kramer not be able to provide expert and testimony of the deception of Kelman, Hardin, ACOEM and the US Chamber's fraudulent science. Kramer was not permitted to discuss the science of mold in her defense in trial. Failure to stop a plaintiff's criminal activity in a strategic litigation thereby aiding and abetting interstate insurance fraud on behalf of the affiliates of the US Chamber of Commerce. Ignoring that in trial, there was zero evidence of Kramer ever being impeached as to her subjective belief in the validity of her words, thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce. **Violation of Canons of Judicial Ethics 2.A, 3.B.(5)(8),3C(1),3.D(1)(2).**

When framing the scope of the trial, Schall could not believe that it was Kelman, not Kramer, who was asked to be put through a psychological examination. Kramer, who had

never been on a witness stand before, was apparently too close to the microphone. Judge Schall derogatorily stated in front of the jury “Only rock stars swallow microphones” inferring that Kramer had an inflated ego as she truthfully detailed the work she has done to help change public policy. Schall in oral argument, when asked by Kramer to ask Scheuer of the criminal perjury on the issue of malice stated:

“I can’t be drawn into that kind of petty behavior, demanding Mr. Scheuer to explain himself on things.” Judge Lisa C. Schall, December 12, 2008

When Kramer brought it to Schall’s attention that she was relying on a source who said Kramer’s writing was correct as the evidence Kramer’s writing was incorrect, Schall stated, “*You know what Mrs. Kramer, now you are just arguing with me.*” She then proceeded to lecture Kramer not to go spreading rumors of what occurred in oral argument; while simultaneously refusing to hear Kramer’s oral argument on the issue of malice. She awarded costs to Kelman that were incurred by VeriTox and issued a judgment that did not acknowledge Kramer prevailed over VeriTox in trial. Kramer had to make three additional motions just to be recognized as a prevailing party and still does not have a judgment to this effect to this very day.

Judiciary # 6 Joel Pressman, Presiding Judge North County, January 2009, denying Kramer’s Motion for Reconsideration.

Bias. Failure to stop criminal activity in a strategic litigation. Based solely on a purported date of entry of judgment December 18, 2008, Pressman denied to review Kramer’s motion for reconsideration of Schall’s post trial rulings and evidence of Kelman’s perjury on the issue of malice. There is no evidence of any such judgment entry in the court record on December 18, 2008; and no evidence of any mailing of this purported judgment. Refusal to hear a motion for reconsideration based on a date of entry of judgment not in the court record, aided and abetted interstate insurer fraud favorable to the interests of the affiliates of the US Chamber of Commerce to continue and forced Kramer to have to file Appellate motions sans attorney, since she can no longer afford one. **Canon Violations 2.A, 2.B(1),3.B(8),3.D.(1)(2).**

Judiciary # 7 William Dato, April 2009, Failure to enter a judgment reflective of his ruling awarding Pro Per Kramer’s costs.

Evidenced of Kelman’s perjury on the issue of malice and evidenced that Kelman had submitted and been awarded costs incurred by VeriTox, Judge Dato stated he could do nothing about criminal activity in the litigation or judgments entered in the court he took over in 2009 after Judge Schall was moved to family court, Department 31. Failure to stop a plaintiff’s criminal activity in a strategic litigation, even when directly evidenced of such and evidenced of the extreme litigation costs incurred by Kramer from the situation; and evidenced that costs incurred by a party Kramer prevailed over in trial, VeriTox, were submitted and awarded to Kelman. Although Dato issued a ruling stating Kramer prevailed and awarded her costs in the ruling, no judgment was ever entered by the courts overseeing a prevailing Pro Per to reflect this; thereby aiding and abetting

interstate insurer fraud by failing to stop criminal perjury in a strategic litigation and assisting to financially punish a whistleblower of the deceit of the US Chamber of Commerce.

**Violation of Canon of Judicial Ethics 2.A,3.B(2)(8),3.D.(1)(2)
Judiciaries # 8, 9, 10 Justices Benke, Huffman, Irion. Appellate denial while
covering up for McConnell's errors of ignoring the evidence of USChamber author
and plaintiff fraud in her 2006 anti-SLAPP Opinion.**

Unpublished opinion and denial of petition for rehearing while ignoring evidence of Kelman's perjury on the issue of malice going unchecked by all courts they were to be reviewing. Stealthily aiding and abetting interstate insurer fraud favorable to the interests of the affiliates of the US Chamber and with reckless disregard for public health and safety. Attempting to cover up for the Chair of the CJP's errors of 2006, when ignoring a plaintiff's perjury; that also aided the US Chamber four years earlier. Abusing their judicial position to retaliate against a whistleblower of the fraud of the US Chamber and insurance industry friendly errors by the Chair of the CJP. **Violation of Canons of Judicial Ethics 2.A.,2.B(1),3.B(2)(5)(8),3.C(1), 3.D.(1)(2).**

As merely one example of just how biased the 2010 unpublished Opinion is when determining Kramer libeled Kelman with actual malice and while relying on the 2006 unpublished anti-SLAPP Opinion by McConnell as a valid opinion not to be disturbed; not mentioned in their 2010 unpublished Opinion:

“The irrefutable evidence is, Kramer's writing accurately states there were two papers and payment was for the Manhattan Institute version itself, not ACOEM's. Her March 2005 writing states, “He admitted the Manhattan Institute, a national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure.....A version of the Manhattan Institute commissioned piece may also be found as a position statement on the website of a United States medical policy-writing body, the American College of Occupational and Environmental Medicine.” (App.Opn.Brf.Erta,pp 32)

The 2006 Opinion this Opinion is relying upon when deeming Kramer's writing false with reckless disregard for the truth, wrote the same thing Kramer did in its 2006 Opinion. This court found while determining Kramer's writing false: “This testimony supports a conclusion Kelman did not deny he had been paid by the Manhattan Institute to write a paper, but only denied being paid by the Manhattan Institute to make revisions in the paper issued by ACOEM. He admitted being paid by the Manhattan Institute to write a lay translation.” (App.Opn.Brf.Erta, pp.32)”

The Benke Panel actually had the audacity to write in the 2010 unpublished Opinion that the views of a defendant in a libel litigation are not relevant to proving if the defendant believed the subjective truth of their words. After five years worth of litigation costing the Kramer family everything they own; in 2010, the Benke Panel cannot even state or cite evidence of what it is Kramer supposedly accused Kelman of perjuring himself of by the use of the word “altered”; just like the McConnell Panel could not in 2006. Yet the Fourth has found Kramer libeled Kelman with actual malice for the second time; thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce for the second time by aiding and abetting with strategic litigation to silence, punish and discredit a whistleblower in violation of laws that govern proof of libel with actual malice.

Judiciary # 8, Patricia Benke, October 13, 2010, using the courts to retaliate and discredit a whistleblower by putting known false information forever on the Fourth District Division One website in a modification to a already greatly flawed unpublished Opinion favorable to the interests of the US Chamber.

On October 13, 2010, Benke made the following modification to the 2010 unpublished Opinion. She wrote:

“We also recognize that the trial court gave “Plaintiff’s Special Jury Instructions – Proof of Actual Malice,” which stated: “Actual malice may be proved by circumstantial evidence. Although personal ill will by itself is not sufficient to prove actual malice, a combination of Kramer’s anger, hostility toward the Plaintiffs, failure to investigate or subsequent conduct may all constitute circumstantial evidence that actual malice existed. Evidence alone of Kramer’s animosity, hatred, spite or ill will toward Kelman or GlobalTox does not establish actual malice.”!(AA 1213)! Contrary to Kramer’s argument on appeal, this instruction did not require that the jury find that she acted with malice. (Kramer’s argument was that the jury was directed she failed to investigate – which means they were directed Kramer’s writing was false)

“Finally we reject Kramer’s contention that reversible error occurred because exhibit 53, which *she* offered into evidence, included e-mails from a third party accusing her of cyberstalking and the jury had access to the e-mails. The record is clear that before the exhibits were admitted into evidence and provided to the jury, the parties and their counsel had met with respect to them and agreed that exhibit 53 would be admitted. The trial court was entitled to rely on the agreement of the parties with respect to the propriety of the exhibits.”

Kramer did not even argue the exhibit 53 errors in her Appellate briefs because (if it were not a kangaroo court) she did not need to under laws that govern proof of libel by a standard of clear and convincing evidence. There was no evidence ever presented that Kramer was ever impeached as to her subjective belief in her words. She provided the

trial judge (and the Appellate court) with no less than 23 exhibits proving Kelman used perjury to establish malice.

What Benke failed to mention in her October 13, 2010 modification is that Kramer's attorney, Lincoln Bandlow, submitted an affidavit stating he *had not seen* the prejudicial emails that went to the jury in error in exhibit 53; and that juror No 5, Shelby Stuntz, submitted an affidavit saying this prejudicial and false hearsay accusing Kramer of being a cyberstalker for something she never even said; caused two jurors to change their vote giving Kelman the nine votes required. Not mentioned in the opinion or the modification, Jury foreman, Roy Lutzenberg, also submitted an affidavit that late in the afternoon on the second day of a two day deliberation, the jurors asked Schall that if they followed the Special Jury Instructions Proof of Malice which they were told the must; did they have to find libel with actual malice, to which Schall replied "yes".

This omission of facts in Benke's modification to the 2010 unpublished Opinion indicates that she is not concerned if libel with actual malice was ever proven by a standard of clear and convincing evidence when writing unpublished opinions that adversely impact the interests of the US public. Her argument in the modification, if clearly stated with all evidence considered regarding exhibit 53, would be an acknowledgement that the jury found libel with actual malice based on false hearsay that accidentally went to the jury. As the writing in question was the first to expose the connection of the US Chamber to ACOEM, and the courts have been more than evidenced how this relationship has adversely impacted public health policy; the modification by Benke while telling half the story, indicates she is more concerned with covering up the McConnell Panel errors in the 2006 unpublished anti-SLAPP Opinion – favorable to the interests of the US Chamber; than she is with fulfilling her charge as a reviewing justice to determine if libel with actual malice was ever proven by a standard of clear and convincing proof.

What is most relevant about this odd modification by Justice Benke, is its use as retaliation against Kramer not based on facts in evidence of the case. Forever on the Fourth District Division One's website, is the following known misrepresentation of fact and a direct slur against Kramer:

"..included e-mails from a third party accusing her of cyberstalking and the jury had access to the e-mails. The record is clear that before the exhibits were admitted into evidence and provided to the jury, the parties and their counsel had met with respect to them and agreed that exhibit 53 would be admitted."

By being in a modification to an unpublished Opinion, this false information inferring that Kramer's own attorney found her to be a "cyberstalker" went to the California Supreme Court, where Kramer now has a Petition to Review the work of both the Benke Panel in 2010 and the McConnell Panel in 2006. The most logical explanation for such an odd modification would be to bias the CA Supreme Court to thwart the exposure of six San Diego Appellate Court justices avoiding the evidence of criminal perjury by a

plaintiff and author of the the US Chamber of Commerce, used to establish false extenuating circumstances for a defendant and whistleblower's purported malice.

Violation of Canon of Judicial Ethics 2A,2B,3B(2)(5)(8),3C(1),3D(1)(2) – Covering up for McConnell's 2006 errors when denying an anti-SLAPP motion while ignoring the US Chamber author and plaintiff's perjury on the issue of malice, writing known false slurs of the defendant in unpublished modifications; thereby aiding and abetting interstate insurer fraud on behalf of the affiliates of the US Chamber of Commerce in claims handling practices, policy and litigation.

McConnell's Role As Chair of the California Commission On Judicial Performance

Via certified and notarized letters, April 28, 2010 and May 17, 2010; CJP Commissioners Katherine Feinstein and Anthony Capozzi, along with CJP Chair McConnell were provided the following evidence of the deceit in policy and the deceit in the strategic litigation; and the evidence that McConnell's errors in her 2006 unpublished anti-SLAPP Opinion have aided and abetted interstate insurer fraud. Judge Enright, presiding judge of the San Diego courts is a witness who also received the information via certified mail. At that point, Kramer asked the CJP not to intercede as she felt it would slow down the judicial process; and that *surely* the Fourth District Division One Appellate court understood the law that one cannot use criminal perjury to prove they were falsely accused of criminal perjury – even if one is an author of policy papers for the US Chamber of Commerce and medical policy writing body, ACOEM.

The following are links to direct communication with CJP Chair, Justice McConnell, from Kramer sent by certified mail with Kramer signing affidavits as to the validity of her well evidenced words.

April 28, 2010 [<http://freepdfhosting.com/2ea637d61d.pdf>]

May 17, 2010 [<http://freepdfhosting.com/8755538621.pdf>].

In addition, McConnell was mailed the following detailing her role, the University of California's role and the state of California's role in aiding and abetting insurer unfair advantage over those injured by contaminants in water damaged buildings; while the Regents of the UC profit from promoting the interests of the affiliates of the US Chamber of Commerce in their medical teaching facilities and in the courts; and while aiding to shift the costs of illness from WDB off of insurers, largely workers comp, onto California and US taxpayers. The links to many of the documents from the litigation of *Kelman v.*

Kramer evidencing the unbridled strategic litigation, how the US Chamber paper came to be, and how the Regents of the UC contribute and profit from the fraud of the US Chamber and ACOEM on the backs of the injured and taxpayers, may be found in the following:

Truth Out Sharon Kramer

[<http://katysexposure.wordpress.com/2010/04/30/truth-out-sharon-kramer-letter-to-andrew-saxon-mold-issue/>]

Below is a link to a video of under oath statements of Kelman, that was provided to Justice McConnell of how the US Chamber paper came to be; and how Kelman has been using perjury on the issue of malice while he attempted to coerce Kramer to endorse his science before he would stop with the strategic litigation - after McConnell ignored the evidence of his criminal perjury when denying Kramer's anti-SLAPP motion in November 2006. [<http://www.blip.tv/file/2878576/>]. This was also provided to the California State Bar in 2009, who refused to take action to discipline one of their licensed attorneys for willful suborning of criminal perjury; and with a history of presenting improper documents to inflame the courts against another party to a litigation. *Roston v. Edwards* (1982) 127 Cal.App.3d 842 [179 Cal.Rptr. 830, The inflaming attorney in Roston was Keith Scheuer.

Conclusion

Although vast, the problem is very simple to solve. The first California judiciary or district attorney or politician that has the wherewithal and the integrity to put aside their politics and personal interests to stand up to the US Chamber of Commerce and acknowledge the irrefutable evidence ***"I testified the types and amounts of mold in the Kramer house could not have caused the life threatening illnesses she claimed"*** is criminal perjury by the author of the US Chamber of Commerce's and ACOEM's Mold Statements while strategically litigating in CJP & PJ Justice Judith McConnell's courts for five years to silence a whistleblower of an interstate insurance fraud scheme – with ***ten*** San Diego judges and justices ignoring the uncontroverted evidence; will shut down the deceit that McConnell and nine of her subordinates have aided and abetted on behalf of the interests of the US Chamber and the insurance industry, with reckless disregard for public health and safety; and with reckless disregard for democracy and the taxpayers of California and the United States.

I declare under penalty of perjury the foregoing is true and correct and submitted by me to the California Commission on Judicial Performance, on this day, October 25, 2010.

SUPREME COURT OF THE STATE OF CALIFORNIA

SHARON KRAMER

Petitioner & Defendant

vs.

BRUCE KELMAN &
GLOBALTOX, INC.

Plaintiffs

**PETITION FOR REHEARING AND MODIFICATION OF
OPINIONS**

Petitioner seeks rehearing and modification of the “2010 unpublished Opinion” entered on September 14, 2010; the modification made to it on October 13, 2010; and a reversal of an appellate “2006 unpublished anti-SLAPP Opinion” entered on November 16, 2006. Specifically, Petitioner Kramer has been providing all courts to oversee this litigation since May of 2005, with uncontroverted evidence that they are relying on Plaintiff Kelman’s perjury used to establish false extenuating circumstances for Petitioner’s purported malice in a strategic litigation impacting US public health policy. Kelman has written policy for the US Chamber of Commerce in 2002. Kramer is responsible for a Federal Government Accountability Office Report in 2008 that negates the scientific validity of the US Chamber’s environmental science over the mold issue. Ten San Diego judges and justices have ignored Kramer’s uncontroverted evidence of Kelman’s perjury on the issue of malice. Ten San Diego judges and justices have ignored the fact that Kelman has never provided any evidence of Kramer even once being impeached as to the subjective belief in the truthfulness and validity of her purportedly libelous words, “*altered his under oath statements*”. These judicial errors of deeming the wrong party a malicious liar are aiding to deter needed consistency in messaging in California and US public health policy by aiding to confuse who is telling the truth about mold induced illnesses – Kramer and the Federal government or Kelman and the US Chamber of Commerce.

I.

INTRODUCTION

Although the California Supreme Court rarely grants Petitions for Rehearing of unpublished Opinions, it should grant this one (Attached hereto as Exh.1, Appellant Errata Petition for Rehearing 9/10) [Pdf Pages 1-33, <http://freepdfhosting.com/772caeea70.pdf>]. This is because the (“2010 unpublished Opinion” 9/10) (Attached hereto as Exh.2) [Pdf Pages 34-49, <http://freepdfhosting.com/772caeea70.pdf>] by the Fourth District Division One Court of Appeal, Justice Patricia Benke, (“Benke Panel”) is stealthily and adversely impacting public health policy while aiding and abetting intrastate and interstate insurer unfair advantage in claims handling practices, health policy and litigation favorable to the interests of the affiliates of the (“US Chamber”) of Commerce; and adverse to the health and safety of California and US workers and citizens who find themselves environmentally injured from exposure to contaminants in water damaged buildings (“WDB”). (Attached hereto as Exh.1, Appellant Errata Petition for Rehearing 9/10, pp. 1-3,7, 22) [Pdf Pages 5-7, 11, 26 <http://freepdfhosting.com/772caeea70.pdf>]

The Benke Panel 2010 unpublished Opinion is causing a false scientific concept to linger in public health policy and medical teaching facilities that it has been scientifically proven by the US Chamber¹ and the American College of Occupational and Environmental Medicine (“ACOEM”)² that claims of serious

¹ US Chamber Mold Statement “A Scientific View Of The Health Effects Of Mold” concludes “*Thus the notion that toxic mold is an insidious secret killer as so many trial lawyers and media would claim, is Junk Science unsupported by actual scientific study*”. Listed authors of Bruce Kelman, Bryan Hardin Coreen Robbins of VeriTox & Andrew Saxon, UCLA [http://www.uschamber.com/sites/default/files/reports/ilr_mold.pdf]

illness from WDB exposure are only being made because of “*trial lawyers, media and junk science*”; while aiding to stymie, convolute and deter the implementation of the 2008 directive of the Federal Government Accountability Office (“GAO”). The GAO Report, which negates the environmental science of the US Chamber, federally verifies that science holds serious illness from exposure to mold and toxins found in WDB are biologically plausible to be occurring; while stipulating “Indoor Mold: Better Coordination of Research on Health Effects and More Consistent Guidance Would Improve Federal Efforts”³.

ACOEM writes the workers comp guidelines California physicians must follow when treating injured workers under Senate Bill 899. The Benke Panel 2010 unpublished Opinion is aiding insurers, primarily workers comp and property casualty, to be able to shift the cost of illness from WDB exposure off of insurers and onto California and US taxpayers via state and federal social disability programs that fund environmentally disabled workers and citizens when insurers are able to deny financial responsibility.

² ACOEM Mold Statement “Adverse Human Health Effects Of Molds In The Indoor Environment” concludes “*Except for persons with severely impaired immune systems, indoor mold is not a source of fungal infections. Current scientific evidence does not support the proposition that human health has been adversely affected by inhaled mycotoxins in home, school, or office environments*” Authors Kelman, Hardin, Saxon. [<http://www.acoem.org/guidelines.aspx?id=850>]

³ GAO Report, September 2008 “Indoor Mold: Better Coordination of Research on Health Effects and More Consistent Guidance Would Improve Federal Efforts” states among many findings “*review—the American Academy of Pediatrics 2006 report—said that although a causal relationship has not been firmly established, a variety of studies have provided some evidence that such a relationship is plausible. The fourth review said that the association between acute idiopathic pulmonary hemorrhage in infants and children and mold is strong enough to justify removing them from moldy environments or cleaning up these spaces,*¹⁹ *and the fifth review reiterated this recommendation.*” [<http://www.gao.gov/new.items/d08980.pdf>]

This is occurring by the Benke Panel aiding in wrongfully discrediting *all* words of Defendant/Appellant Sharon (“Kramer”) by deeming her a malicious liar for the word “..altered..” in a libel litigation instigated by Plaintiff/Respondent, Bruce (“Kelman”), who is a co-author of both the US Chamber’s and ACOEM’s Mold Statements, along with his business partner, Bryan (“Hardin”) in the corporation of (“VeriTox”, Inc) formerly known as GlobalTox, Inc. (Attached hereto as Exh.1 App. Petition for Rehearing 9/10 pp. 4,5,10, 22) [Pdf. Pages 8, 9,14,26 <http://freepdfhosting.com/772caeea70.pdf>]

II.

IGNORED IRREFUTABLE EVIDENCE OF PLAINTIFF PERJURY, STRATEGIC LTIGATION IN UNPUBLISHED OPINIONS 2006 ANTI-SLAPP & 2010

Not mentioned in the Benke Panel 2010 unpublished Opinion, Hardin, who is a retired high level CDC/NIOSH employee, is evidenced to be improperly missing as a named party to this litigation on the Certificate of Interested Parties submitted to the Appellate court in 2006 and 2009. (Attached hereto as Exh.1 App. Errata Petition for Rehearing 9/10 pp.10, 22) [Pdf. Pages 14, 26 <http://freepdfhosting.com/772caeea70.pdf>]

Also not mentioned in the 2010 unpublished Opinion, Kramer is evidenced to be the first person who was willing and able to effectively articulate how the joint deception of ACOEM and the US Chamber is assisting insurers and other stakeholders of moldy buildings in the denial of insured locations being the

causation of illness, in her purportedly libelous writing of March 2005.⁴

(Attached hereto as Exh.1, App. Errata Petition for Rehearing 9/10 pp.5, 18) [Pdf. Pages 9, 22 <http://freepdfhosting.com/772caeea70.pdf>]

These errors of omission of Kramer's relevant evidence also occurred in the Justice Judith ("McConnell⁵ Panel") ("2006 unpublished anti-SLAPP Opinion") (Attached hereto as Exh.3) [Pdf Pages 50-69, <http://freepdfhosting.com/772caeea70.pdf>] They, too, refused to acknowledge the evidence that Hardin's name was missing from the Certificate of Interested parties; and that his business partner, Kelman, has been strategically litigating against Kramer through the use of perjury to inflame the courts by fabricating false extenuating circumstances, false reason for Kramer to purportedly harbor personal

⁴ Published March 9, 2005 Jury Finds 'Toxic Mold' Harmed Oregon Family, Builder's Arbitration Clause Not Binding *"Oregon City, OR - The case is a first in the Northwest to award personal injury damages to a family exposed to toxic mold in a newly built home. This verdict is significant because it holds construction companies responsible when they negligently build sick buildings.....the Manhattan Institute, a national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure. Although much medical research finds otherwise, the controversial piece claims that it is not plausible the types of illnesses experienced by the Haynes family and reported by thousands from across the US, could be caused by "toxic mold" exposure in homes, schools or office buildings. In 2003, with the involvement of the US Chamber of Commerce and ex-developer, US Congressman Gary Miller (R-CA), the GlobalTox paper was disseminated to the real estate, mortgage and building industries' associations. A version of the Manhattan Institute commissioned piece may also be found as a position statement on the website of a United States medical policy-writing body, the American College of Occupational and Environmental Medicine. [http://www.moldwarriors.com/SK/PressReleaseComplaint.pdf]*

⁵ Justice Judith McConnell is the Chair of the California Commission on Judicial Performance and the Presiding Justice for the Fourth District Division One Court of Appeal. On October 17, 2010, under Local Rules of the Court, 1.2.1 Policy Against Bias, Kramer requested McConnell to review the 2010 unpublished Opinion by the Benke Panel, that ignored the evidence of a US Chamber author's perjury and attempted coercion of a defendant. No response was received. This request to intercede because of bias adversely impacting health policy favorable to the interests of the US Chamber affiliates - of which a copy went to the San Diego District Attorney's office - may be read at: [<http://freepdfhosting.com/6dae4c85a8.pdf>]

malice for Kelman. From the (Attached hereto as Exh.3, 2006 unpublished anti-SLAPP Opinion, pp.7) [Pdf.Page 56, <http://freepdfhosting.com/772caeea70.pdf>]

“3. Kramer asked us to take judicial notice of additional documents, including the complaint and an excerpt from Kelman’s deposition in her lawsuit against her insurance company. We decline to do so as it does not appear these items were presented to the trial court.”(Appellant Appendix Vol.I Ex.12:250)”

As the Benke Panel was informed and evidenced, what the McConnell Panel was requested but refused to take notice of in 2006 was: i.) the evidence Kelman was using perjury to establish false extenuating circumstances for Kramer’s purported malice; ii.) the evidence that retired high level CDC/NIOSH employee and US Chamber author, Hardin, was improperly missing from the Certificate of Interested Parties; and iii.) that a Sacramento judge had found the science that the ACOEM and US Chamber Mold Statements are founded upon to be a “Huge Leap” when determining lack of causation of illness from WDB. Request for judicial notice submitted to the McConnell panel, June 2006 may be read at: [<http://freepdfhosting.com/cd2ffd58bc.pdf>] Kelman’s perjury on the issue of malice was used to inflame the courts and present a false portrait of Kramer by a California licensed attorney who is skilled in this technique of litigating.

Roston v. Edwards (1982) 127 Cal.App.3d 842 [179 Cal.Rptr. 830]⁶ The inflaming attorney in *Roston* was is Kelman’s attorney, Keith Scheuer. (Attached hereto as Exh. 1, App. Errata Petition for Rehearing 9/10, pp.2, 6, 7)[Pdf Pages 6,10, 11, <http://freepdfhosting.com/772caeea70.pdf>]

⁶ “*Defendants, in their zeal to present a portrait of plaintiff Roston...that would enhance their position, made reference to a multitude of cases which were inappropriate for consideration by the trial court... The presentation of such matter, if designedly done, is certainly to be discouraged. One might mistake it for an attempt to inflame the court against a party to the action.*” Roston v. Edwards (1982) 127 Cal.App.3d 842 [179 Cal.Rptr. 830] Defense attorney, Keith Scheuer.

Also ignored in both the 2006 unpublished anti-SLAPP Opinion and the 2010 unpublished Opinion; Kramer has been stating and evidencing for all courts since July of 2005, that Kramer considers Kelman's description of the two medico legal policy papers' relationship of "*lay translation*" going to "*two different papers, two different activities*" and flipping back to "*translation*" when forced to discuss them together on a witness stand in Oregon, February 2005; to be "*altered his under oath statements*". (Attached hereto as Exh.1, App. Errata Petition for Rehearing 9/10, pp.2, 8,10,13) [Pdf Pages 6,12,14,17 <http://freepdfhosting.com/772caeea70.pdf>]

There is *no evidence ever presented* by Kelman of Kramer even once being impeached as to her subjective belief or logic for the truthfulness of these words. (Kelman App.Reply Brief 9/09) [<http://freepdfhosting.com/f0207f8a45.pdf>] Yet, the Benke Panel stated in the 2010 unpublished Opinion that the "*sincerity of Kramer's views*" are not relevant to her thought processes while deeming her a malicious liar for the words "*..altered..*" and while ignoring Kramer's vast and uncontroverted evidence of Kelman's perjury used to establish false reason for Kramer's purported malice. (Attached hereto as Exh. 1, App. Errata Petition for Rehearing 9/10, pp.18, 20 -24) [Pdf Pages 22, 24-28, <http://freepdfhosting.com/772caeea70.pdf>]

In 2007, the California Supreme Court declined to review the 2006 unpublished anti-SLAPP Opinion of the McConnell Panel, while also being informed and evidenced of the US Chamber/ACOEM author's perjury on the issue of malice while strategically litigating; aiding to cause the deception of science by the US Chamber et al, to remain in policy four years longer than it should, by declining to hear a petition of an anti-SLAPP Opinion in which the plaintiff was evidenced to

be committing perjury on the issue of malice. (Kramer Petition for Rehearing to the California Supreme Ct. 12/2006) [<http://freepdfhosting.com/5dd64c64b3.pdf>]

Sadly, both the US Chamber's and ACOEM's Mold Statements carry the name "University of California" ("UC") in implied credible endorsement of the concept that claims of illness from WDB exposure are scientifically proven to only be made because of "*trial lawyers, media and Junk Science*" and in violation of the California Constitution Article IX, Section 9 which holds "*the University shall be free from political and sectarian influences*". As evidenced for the Benke Panel, this implied esteemed university endorsement for the science of the US Chamber by the UC is aiding and abetting with interstate insurance fraud by no less than one political action committee, the National Apartment Association, ("NAA") with a pony (Clydesdale) in the race.

In August of 2009, the NAA submitted a fraudulent amicus while citing to the US Chamber's Mold Statement with misquoted authorship. This was in a legal proceeding in Arizona in which Kelman and fellow VeriTox owner, Coreen ("Robbins") were testifying for the defense in the litigation involving two deceased newborns and an apartment complex documented to harbor an atypical amount of mold. The US Chamber paper, that neither Kelman nor Robbins (nor Hardin nor Saxon) lay claim to authoring on their Curriculum Vitae, was offered to the Arizona Appellate court as a legitimate, science based paper. The Benke Panel refused to take judicial notice of this information of how the deceit carries on by the San Diego Appellate court not stopping this strategic litigation, by ignoring the evidence that it *is* strategic litigation and for what purpose. (Attached hereto as Exh.1, App. Errata. Petition. for. Rehearing 9/10, pp.4) [Pdf. Page 8 <http://freepdfhosting.com/772caeea70.pdf>]

Not mentioned in the Benke Panel 2010 unpublished Opinion, Petitioner/Defendant Kramer is responsible for causing the Federal GAO Report that negates the science of the US Chamber et al. Had Kramer been intimidated or coerced into silence by this unbridled strategic litigation that began in the San Diego court system in 2005, the 2008 Federal GAO Report most likely never would have come to be. (Attached hereto as Exh.1 App.Errata.Petition for .Rehearing 9/10, pp.5,7,19,20) [Pdf. Page 9,11,23,24 <http://freepdfhosting.com/ad67e0cb4f.pdf>] Also not mentioned in the 2010 unpublished Opinion, Kramer has provided the Benke Panel with no less than twenty-three pieces of undisputed evidence of Kelman's perjury used to establish false - and libel law needed - reason for Kramer's malice going ignored by the McConnell Panel in 2006, and ignored by four lower court judges between 2005 and 2009. (Attached hereto as Exh. 1 App.Errata.Petition for .Rehearing 9/10, pp.21-25) [Pdf. Page 25-29 <http://freepdfhosting.com/772caeea70.pdf>]

Using circular logic while justifying avoiding addressing Kramer's irrefutable evidence of Kelman's fraud on the issue of malice used to falsely and illegally deem Kramer a malicious liar; the Benke Panel's stance in their 2010 unpublished Opinion is that if the McConnell Panel ignored the evidence of a US Chamber/ACOEM author's fraud while strategically litigating in 2006 and all lower courts did; in 2010 they should too, to keep stability in the decision process of Fourth District Division One Appellate Court (with reckless disregard for public policy stability in federal health advisories and the First Amendment of the Constitution of the United States). From Kramer's Petition for Rehearing:

“As stated in the unpublished Opinion [<http://freepdfhosting.com/a07c7bf25c.pdf>] ‘...in Kelman v. Kramer I’ [this court's unpublished anti-SLAPP 2006 Opinion [<http://freepdfhosting.com/baf482cac4.pdf>]] ‘we expressly rejected Kramer's argument that such independent review entitled her to judgment. Rather, we found that such review had taken

place in the trial court and, following our own detailed analysis of the evidence of Kramer's hostility towards Kelman, we left the trial court's determination undisturbed.'(Typd.Opn.pp.13) 'Given that circumstance and the fact that only nominal damages were awarded against Kramer, the value of promoting stability in decision making far outweighs the value of any reevaluation of the merits of our prior disposition. (See People v. Shuey, supra 13 Cal.3d)' (Typd.Opn.pp.12)" (Attached hereto as Exh.1, Appellant Errata Petition For. Rehearing 9/10, pp.1,2) [Pdf. Page 5,6 <http://freepdfhosting.com/772caeea70.pdf>]

"Given that circumstance and the fact that the value of promoting stability in decision making in public health policy far outweighs the value of non-reevaluation of this court's prior erred disposition; and the fact that this litigation has cost the Kramer family well over one half of one million dollars in litigation expenses alone to defend Kramer's truthful words for the public good (App.Rply.Brf,pp.21); this court needs to do an independent examination of this case – not reiterate prior errors it made in 2006 as fact in 2010 to conclude that libel with actual malice has been proven by a standard of clear and convincing evidence. (Typd.Opn,pp.2-4,7-15)" (Attached hereto as Exh.1, App.Erta.Pet.Rehearing 9/10,pp.3,4) [Pdf. Page 5-8, <http://freepdfhosting.com/772caeea70.pdf>]

As such, the California Supreme Court should grant Kramer's Petition for Review of the Benke Panel 2010 unpublished Opinion *and* the McConnell Panel 2006 unpublished anti-SLAPP Opinion; as one is an edit of the other and both are stealthily aiding to thwart federal efforts to send consistent messaging regarding adverse health effects from WDB exposure, thereby thwarting an effort to improve public health policy nationwide; and both are aiding to punishing, discredit, demean and financially cripple a whistleblower of the deceit of the US Chamber et al; by their refusal to acknowledge:

a.) Kramer's undisputed evidence of US Chamber/ACOEM author, Kelman's, perjury to establish false extenuating circumstances of Kramer's purported malice - that went ignored by seven San Diego judges and justices whose work the Benke Panel was to be reviewing for error;

i.) Kelman's perjury: "*I testified the types and amounts of molds found in the Kramer house could not have caused the life threatening illnesses she claimed*"; Video of Kelman discussing his perjury on the issue of malice, while in deposition July 2008 may be viewed at: [<http://www.blip.tv/file/2063366/>]

ii.) Kelman's attorney's suborning of the above perjury to inflame the courts with false extenuating circumstances/reason for malice stemming from a testimony Kelman never even gave in Kramer's mold litigation of long ago: "*Dr. Kelman testified in a deposition that the type and amount of mold in the Kramer house could not have caused the life threatening illnesses that Kramer claimed. Apparently furious that the science conflicted with her dreams of a remodeled house, Kramer launched an obsessive campaign to destroy the reputation of Dr. Kelman and GlobalTox.*" (Attached hereto as Exh.1, App.Errata Petition for Rehearing ,pp. 21-25); [Pdf. Page 25-29, <http://freepdfhosting.com/772caeea70.pdf>]; and

b.) the 2010 unpublished Opinion is deeming Kramer a malicious liar for the word "*altered*", thereby discrediting the validity of *all her words* that have helped to reshape public health policy; while the Benke Panel has refused to acknowledge that there is *no evidence* ever presented in this five year old case of Kramer even once being impeached as to the subjective belief in her words and why she used the phrase "*altered his under oath statements*" in March of 2005 to describe Kelman's testimony in Oregon in February of 2005:

"Declaration of Kramer submitted to the courts, July 2005: 'Within the prior sentences, Kelman testified 'We were not paid for that...', not clarifying which version he was discussing. There was no question asked of him at that time. He went on to say GlobalTox was paid for the 'lay translation' of the ACOEM Statement. He then altered to say 'They're two different papers, two different activities.' He then flipped back again by saying, 'We would have never been contacted to do a translation of a document that had already been prepared, if it hadn't already been prepared.' By this statement he verified they were not two

different papers, merely two versions of the same paper. And that is what this lawsuit is really all about.

The rambling attempted explanation of the two papers' relationship coupled with the filing of this lawsuit intended to silence me, have merely spotlighted Kelman's strong desire to have the ACOEM Statement and the Manhattan Institute Version [sic US Chamber Mold Statement] portrayed as two separate works by esteemed scientists.

In reality, they are authored by Kelman and Hardin, the principals of a corporation called GlobalTox, Inc. – a corporation that generates much income denouncing the illnesses of families, office workers, teachers and children with the purpose of limiting the financial liability of others. One paper is an edit of the other and both are used together to propagate biased thought based on a scant scientific foundation.

Together, these papers are the core of an elaborate sham that has been perpetrated on our courts, our medical community and the American public. Together, they are the vehicle used to give financial interests of some indecent precedence over the lives of others.' (Appellant Appendix Vol.1 Ex.8:157-158) (Response to Court's Query, pp.10-11)" (Attached hereto as Exh 1, App.Erta.Pet.Rehearing 9/10, pp.8-14) [Pdf. Page 12 -18 <http://freepdfhosting.com/772caeea70.pdf>]

The California Supreme Court should grant Kramer's Petition for Review because the Benke Panel 2010 unpublished Opinion ignores the law of what constitutes clear and convincing proof of libel with actual malice and what constitutes uncontroverted proof of strategic litigation carried out by criminal means; just like the McConnell Panel 2006 unpublished anti-SLAPP Opinion ignored much of the same evidence when affirming the lower courts denial; with the California Supreme Court refusing to review the prior unpublished Opinion in 2007.

III.

JUDGMENTS STATED ARE NOT IN THE COURT RECORD

A judgment falsely stated as entered in the Benke Panel 2010 unpublished Opinion awarding Kramer costs as the prevailing party over VeriTox, is not, in reality, entered. The judgment that *is* entered awarded costs incurred by trial losing party, Veritox, to Kelman. As a result, Kramer now has a lien on her home for costs incurred by a party she prevailed over in trial; and no judgment entered awarding her costs as the prevailing party. (Attached hereto as Exh 1, App. Petition for Rehearing pp. 25-27) [Pdf Pages 29 -31, <http://freepdfhosting.com/772caeea70.pdf>] As informed in Kramer's Petition for Rehearing, the following is a false statement in the Benke Panel 2010 unpublished Opinion of a document never submitted by Kelman when determining Kramer's costs, and of costs never submitted by Kramer.

“The trial court also permitted Kramer to file a memorandum of costs as against GlobalTox. Thereafter, Kramer filed a motion for costs and GlobalTox filed a motion to tax the costs, in which among other matters GlobalTox argued that Kramer only prevailed against one defendant and her deposition costs of \$3,800 should be reduced by half. The trial court, with a different trial judge presiding, heard Kramer's cost motion on April 3, 2009, and awarded her a total of \$2,545.28. In particular, the trial court agreed with Kelman that Kramer should only be permitted to recover one-half of her deposition costs.” (Attached hereto as Exh. 2, 2010 unpublished Opinion, pp.15)

As the Benke Panel was informed and evidenced by the attachment of GlobalTox/Veritox's Motion to Tax Kramer's costs to Kramer's Errata Petition for Rehearing 9/10 as attachment “C”, (Attached hereto as Exh.4) [Pdf. Pages 70-77 <http://freepdfhosting.com/772caeea70.pdf>] GlobalTox never “*argued that Kramer only prevailed against one defendant and her deposition costs of \$3,800 should be*

reduced by half.” Kramer did not submit deposition costs of \$3800. Kelman submitted this amount in his memorandum of costs. That is how Kramer knew Kelman had submitted and was awarded not only his costs but the costs of the party she prevailed over in trial, GlobalTox/Veritox. Kramer was only deposed once and on video. The total cost for one deposition on video is approximately \$3800. Since Kelman prevailed over Kramer, but VeriTox did not, the costs submitted for prevailing party, Kelman, should have been half of the expenses Scheuer incurred and billed on behalf of his clients. The costs submitted for deposition should have been half of \$3800 or \$1900.

Kramer could do nothing about it. On December 12, 2008, the trial judge refused to even hear Kramer’s arguments for a new trial. (This was Judge Schall’s last ruling on her last day as the presiding judge over Dept. 31, North County Superior Court – she has since moved to Family Court). Kramer did not even have the opportunity to bring up anything new in Oral Argument – such as costs being awarded to a losing party, GlobalTox, to be paid by a prevailing party, Kramer. Scheuer submitted and Kelman was awarded costs incurred by GlobalTox in the amount of \$3,626.33 that has been an interest accruing lien on Kramer’s home for two years. No modification was made regarding judgments improperly entered in the Benke Modification of October 13, 2010. (Attached hereto as Exh.1, App.Errata Petition for Rehearing, pp.26-27) [Pdf. Pages 30-31, 70-77 <http://freepdfhosting.com/772caeea70.pdf>] (Attached hereto as Exh. 5, Modification To Judgment, 10/10) [Pdf. Pages 1, 2 of Modification, Attorney Bandlow, Juror Stuntz, Juror Litzenberg declarations & Trial Exhibit # 53. <http://freepdfhosting.com/1eb60032e5pdf>]

IV.

APPELATE COURT MADE MODIFICATION OF POINT NEVER ARGUED WHILE IGNORING EVIDENCE IT IS FALSE HEARSAY

Justice Benke denied Kramer's Petition for Review and made no modification to judgments improper entered (or not entered at all). Yet she did modify the 2010 unpublished Opinion on October 13, 2010.(Attached hereto as Exh.5) [Pfd. Pages 1,2, <http://freepdfhosting.com/1eb60032e5.pdf>] Within the modification, she misrepresents facts in evidence with the sentence, *"The record is clear that before the exhibits were admitted into evidence and provided to the jury, the parties and their counsel had met with respect to them and agreed that exhibit 53 would be admitted."* In her modification, Benke ignored the October 30, 2008, declaration in evidence of Kramer's trial attorney, Lincoln Bandlow, stating:

3. On numerous occasions throughout the trial of this matter, I attempted to present evidence of Mrs. Kramer's state of mind when she wrote the press release that was the subject of the litigation. In particular, Mrs. Kramer' understanding of (1) the science that formed the basis of plaintiff Bruce Kelman's frequent testimony and writings on the issue of the dangers of mold exposure and (2) the relationship between the ACOEM Paper and the Manhattan Institute Report and the effect of that relationship on the testimony of Bruce Kelman in not only the Haynes case, but any future testimony that Kelman might provide. Her understanding of these two crucial points directly and materially effected her state of mind when she wrote the press release and why she wrote the words "altered his under oath statements" that were the entire basis for plaintiffs' claims in this action. The Court, however, over my strenuous objections, consistently prevented me and Mrs. Kramer from presenting this crucial evidence to the jury.

4. I am now aware that two documents were submitted to the jury in this matter that were never introduced, authenticated or discussed in any manner during the trial and which were highly prejudicial. During the trial, I introduced Exhibit 53 and had it authenticated by Kelman. My understanding of Exhibit 53 as I presented it at trial was that it was a one page letter from Globaltox to the Manhattan

Institute followed by five pages of invoices that evidenced work performed by Globaltox for the Manhattan Institute in connection with the preparation of the Manhattan Institute Report (collectively the “Institute Information”). I introduced the Institute Information during the cross examination of Kelman, who authenticated it and I then moved to have the Institute Information admitted into evidence. There was no objection and the Institute Information was admitted. I later questioned Coreen Robbins about the Institute Information during my cross examination of her.

5. What I did not learn until after the trial was over when I was speaking with juror Shelby Stuntz was that three additional documents were attached to this exhibit (unbeknownst to me) and submitted to the jury, two of which had never been authenticated or discussed. The first attached document was a one page email from Michael Holland to Bruce Kelman (the “Holland Email”). The Holland Email, however, was in fact introduced and admitted into evidence as Exhibit 59 just prior to closing arguments (Kelman’s attorney stipulated to its admission without the need for testimony to authenticate it). The fact that I introduced this document after Exhibit 53 had been entered into evidence underscores how I was not aware that this document was part of Exhibit 53 because, obviously, if I was aware that this document was part of an exhibit already admitted, there would have been no need to separately admit it as Exhibit 59.

6. The second document that went to the jury as part of Exhibit 53 was an email from Daniel Sudakin to Bruce Kelman, which forwarded another email from Daniel Sudakin to Bruce Kelman about “Sharon Kramer and Renata Zilch” (the “Sudakin Email”). The Sudakin Email was never introduced, authenticated, discussed or referenced in any way during the trial, nor was any information about an article written under the name “Renata Zilch” ever remotely discussed in the case. Not only is the Sudakin Email inadmissible hearsay, but it includes highly prejudicial (and false) statements that Mrs. Kramer was engaging in “harassment and cyberstalking” and disseminating “misinformation” and “attacks.”

7. The third document was a letter from James Schaller to Sudakin (which Sudakin had attached to the Sudakin Email) (the “Schaller Letter”). The Schaller Letter was never introduced, authenticated, discussed or referenced in any way during the trial, nor was any

information about Schaller or the matters discussed in his letter ever remotely discussed in the case. The Schaller Letter is inadmissible hearsay and prejudicial.

8. I never intended for the Sudakin Email or the Schaller Letter to be allowed into evidence in this case or go to the jury (in fact, I would have objected to them being introduced in the case on the grounds that they are hearsay, irrelevant and prejudicial). I am not sure how the Sudakin Email and Schaller Letter became part of Exhibit 53, although I am aware that that these documents were at one time all marked together with the Institute Information as a separate deposition exhibit for Kelman's deposition. When it came to trial exhibits, however, my copy of the trial exhibits that I used during the trial did not have the Holland Email as part of Exhibit 53 (as mentioned, it was separately marked as Exhibit 59), the Sudakin Email (which was also separately included in the Exhibit binders as Exhibit 60 but never introduced or admitted at trial) or the Schaller letter (which I do not believe was included as a separate exhibit). Rather, my copy of the exhibits simply showed Exhibit 53 being the Institute Information, which I spent considerable time on during the trial. Thus, when Exhibit 53 was admitted into evidence, I believed that it only included the Institute Information.

9. After the trial was over, I spoke to a juror on the case, Shelby Stuntz. She informed me that numerous jurors were unsure if plaintiffs had met their burden to demonstrate actual malice in the case but that a number of them had then relied on the Sudakin Email and Schaller Letter, particularly the language in the Sudakin Email about "harassment and cyberstalking" to reach the conclusion that actual malice had been shown. Thus, it appears that the Sudakin Email and the Schaller Letter played a substantial, if not determinative, role in the verdict that was rendered against Mrs. Kramer. Moreover, it also demonstrates that the jury misunderstood the concept of actual malice, mistaking it for simple "personal malice" which they improperly concluded existed due to the Sudakin Email."

[Pfd. Pages 3-8, 19-26 <http://freepdfhosting.com/1eb60032e5.pdf>]

Oddly, by including the information of the cyberstalking slur by ex-VeriTox employee, Daniel Sudakin, based on false hearsay of something Kramer never

even said that accidentally went to the jury; Benke is acknowledging that there was never clear and convincing proof of Kramer libeling Kelman with actual malice and the jury relied on false hearsay. Declaration of Juror #5 Shelby Stuntz [Pfd. Pages 7,8 <http://freepdfhosting.com/1eb60032e5.pdf>]

Kramer did not even argue the errors of Exhibit 53 in her Appellate briefs because there was already enough other evidence that established libel with actual malice was never legally proven by a standard of clear and convincing evidence. Kelman did not argue it either. Benke, in her modification to the 2010 unpublished Opinion, has offered new argument not made by either party on Appeal, while putting the false cyberstalking slur of Kramer forever on the Fourth District Division One website for any and all who should wish to review this case. [http://appellatecases.courtinfo.ca.gov/search/case/dockets.cfm?dist=41&doc_id=1385769&doc_no=D054496.]

V.

BRIEF BACKGROUND

Agnotology is the study of culturally induced ignorance or doubt, particularly the publication of inaccurate or misleading scientific data. A prime example of the deliberate production of ignorance is the tobacco industry's conspiracy to manufacture doubt about the cancer risks of tobacco use. Under the banner of science, the industry produced research about everything except tobacco hazards to exploit public uncertainty. Some of the root causes for culturally-induced ignorance are media neglect, corporate or governmental suppression, and myriad forms of inherent or avoidable culturopolitical selectivity, inattention by decision makers and a desire to shift the cost burden for causation of illness onto other individuals or entities.

Agnotology also focuses on how and why diverse forms of knowledge do not come to be, or are ignored or delayed. When misleading scientific data is allowed to be applied to establish health policies for the purpose of instilling bias in the courts to cause more favorable financial outcomes and unfair advantage for insurers, employers and other financial stakeholders of moldy buildings, it then becomes insurance fraud. When judiciaries repeatedly ignore irrefutable evidence that strategic litigation against public participation has been occurring in their courts and has been carried out by criminal means to silence, punish, discredit and financially cripple one who has been willing to speak against the insurer fraud and expose the devastating impact it is having on US citizens with the involvement of the US Chamber of Commerce; it indicates that the courts have either a.) become so serverly biased by the misinformation marketed to them by the US Chamber et al, that they cannot look at the facts of a case with clear eyes; or b.) they have succumbed to political pressure and the whims of the monied to the point that justice for average citizens is is no longer attainable in the California judicial system.

This matter involves the libel litigation that began in May 2005, of Kelman and GlobalTox v. Kramer, *Kelman v Kramer* D047758 Fourth District Division One, November 16, 2006 unpublished anti-SLAPP Opinion”, written by Justice Judith McConnell and affirmed by Justices Cynthia Aaron and Alex MacDonald; GIN044539 North San Diego County Superior Court overseen by Judges Michael P. Orfield (retired), Lisa C. Schall, Joel Pressman and William S. Dato respectively from 2005 to 2009; and D054496 September 14, 2010 unpublished Opinion, written by Justice Patricia Benke and affirmed by Justices Richard Huffman and Joan Irion; along with Appellant Errata Petition for Rehearing denied and oddly modified October 13, 2010, by Benke.

The sole claim of the libel action is that the Defendant/Appellant's use of the phrase within an Internet March 2005 writing of a successful mold plaintiff verdict in Oregon, "*altered his under oath statements on the witness stand*" was a maliciously false accusation of perjury by the Defendant/Appellant on the part of the Plaintiff/Respondent while he was giving an expert defense witness February 2005 testimony in the Oregon trial. Plainly stated, it does not take a legal scholar to comprehend that one cannot use perjury in a legal proceeding to prove they were falsely accused of perjury in another legal proceeding.

VI. PARTIES TO THE LITIGATION AND THEIR ROLES IN ESTABLISHING PUBLIC HEALTH POLICY

The lead plaintiff in the libel litigation is, Bruce Kelman. He is a co-the author of "A Scientific View of the Health Effects of Mold" for the US Chamber in 2003. (US Chamber Mold Statement) He is also a co-author of "Adverse Human Health Effects of Molds in the Indoor Environment" for the American College of Occupational and Environmental Medicine in 2002. (ACOEM Mold Statement). He and ex-CDC/NIOSH employee/undisclosed party to this litigation, Bryan Hardin, are two of the six owners of the corporation, VeriTox, Inc – formerly known as GlobalTox, Inc. Kelman and Hardin are Phd toxicologists and prolific expert witnesses for the defense in mold litigation with no research backgrounds in study of health effects of mold. As they are not physicians, they have never examined a mold injured human being. Hardin co-authored the US Chamber's and ACOEM's Mold Statements along with Kelman.

The defendant in the litigation, Sharon Kramer was instrumental in causing a Federal Government Accountability Office (GAO) audit and report "Indoor Mold: Better Coordination of Research on Health Effects and More Consistent Guidance

Would Improve Federal Efforts” in 2008 (GAO Report). This report negates the scientific validity of Kelman’s and Hardin’s writings on behalf of the US Chamber and ACOEM; (which promote the false concept that it is scientifically proven claims of severe illness from mold and toxin exposure are based on “junk science”, media hype and unscrupulous trial lawyers). The GAO Report establishes federal acknowledgment that science holds these serious illnesses are biologically plausible to be occurring from exposure to mold and toxins found in WDB. The report calls for more consistent message to improve research and public health advisories. To hear a 2008 interview Kramer gave for IAQ Radio in which it is known within the issue she is responsible for causing the GAO Report, [<http://www.talkshoe.com/talkshoe/web/audioPop.jsp?episodeId=77328&cmd=apop>]

This 2008 Federal GAO Report, that was ordered by late Senator Edward Kennedy in 2006 at Kramer’s urging, most likely never would have come to be had Kramer been intimidated or coerced into silence by this strategic litigation that began its journey through the San Diego court system in May of 2005. (App. Errata Petition For Rehearing pp.20 regarding Kelman’s attempted coercion of Kramer to endorse his science before he would stop litigating after defeating the anti-SLAPP motion through the use of perjury – Kramer refused and suffered hundreds of thousands of dollars in litigation expense instead:) (Attached hereto as Exh.1, App Errata Petition for Rehearing, pp.20) [Pdf. Page 24 <http://freepdfhosting.com/772caeea70.pdf>]

The deceptive concept for the insurer friendly campaign by the US Chamber, ACOEM et al, - which the GAO Report negates - is founded on a solo and flawed modeling theory by Hardin and Kelman that was legitimized by ACOEM (which is not a college – it is a trade association of workers comp physicians) that was

then mass marketed into US policy and the courts by ACOEM, the Manhattan Institute think-tank and the US Chamber of Commerce. Kramer's March 2005 writing in question, was the first to publicly expose how the US Chamber's and ACOEM's Mold Statements are closely tied and are used together to bias the courts based on the scant scientific foundation, favorable to the interests of the insurance industry and other affiliates of the US Chamber and adverse to the interests of the public.

Kramer holds a BBA in marketing and is a real estate agent by profession. She is published in the Journal of Allergy and Clinical Immunology in 2006; and the International Journal of Occupational and Environmental Health in 2007. These publications that were not permitted to be discussed in the August 2008 trial are *"Nondisclosure of Conflicts of Interest is Perilous to the Advancement of Science"* and *"ACOEM A Professional Organization in Service to Industry"*⁷. They are regarding the conflicts of interest behind ACOEM and the US Chamber when mass marketing a deception of science into health policy used to sell doubt of workers comp and property casualty insurer liability for causation of illness from WDB. The conflict driven concept is used to lend false credence to expert witnesses for the defense in mold litigation, such as Kelman and Hardin, that these illnesses "Could not be" caused by WDB. As evidenced for the courts many times over and never impeached, Kramer is of the opinion Kelman *"altered his under oath statements on the witness stand"* in an effort to hide the true close ties of the political and sectarian US Chamber Mold Statement from that of the purportedly unbiased science of ACOEM – because both of these papers are used

⁷ International Journal of Occupational and Environmental Health "American College of Occupational and Environmental Medicine (ACOEM) A Professional Association in Service to Industry" Joseph LaDou, MD, Daniel Teitelbaum, MD, David Egilman, MD, Arthur Frank, MD, Sharon Kramer, James Huff, PhD.
http://www.moldwarriors.com/SK/IJOEH_Oct07_LaDou.pdf

together to propagate biased thought based on scant scientific foundation, adverse to public health and safety.

VII.

CONCLUSION

The California Supreme Court should grant Kramer's Petition for Rehearing of the 2006 *and* 2010 unpublished Opinions by the McConnell Panel and the Benke Panel respectively, because the first California judicial decision maker who acknowledges....

“Kelman's purported 'role as a defense expert in Kramer's own lawsuit' was perjury in this lawsuit to inflame the courts. As this court was informed of what will happen when they acknowledge the evidence of Kelman's perjury, 'When this Reviewing Court acknowledges what legally cannot be denied: Kramer's overwhelming, uncontroverted and irrefutable evidence that seven judges and justices [sic, now ten] ignored Kramer's overwhelming, uncontroverted and irrefutable evidence of Kelman's perjury on the issue of malice and ignored Kramer's vast evidence of Scheuer's willful suborning of Kelman's criminal perjury; then seven years worth of scientific fraud perpetrated on US Courts over the mold issue by the US Chamber of Commerce et al, will immediately cease by the acknowledgment that their author of their scientific fraud has no qualms about lying under oath to the courts and strategically litigating; and while their other author (sic, Bryan "Hardin") does not disclose he is a party to the strategic litigation.' (App.Reply.To.Court.Query, pp.43-45).” (Attached hereto as Exh.1, App.Petition For Rehearing 9/10, pp.22) [Pdf. Page 26, <http://freepdfhosting.com/ad67e0cb4f.pdf>].....

....will assist to restore public trust and confidence in the California judicial system as caring more for public health, public safety, proper use of public tax dollars, democracy and freedom of speech for the public good without fear of retribution; than they do about politics and the financial interests of the affiliates of the US Chamber of Commerce. By law, "If the remittitur issues by inadvertence or mistake or as a result of fraud or imposition practiced on the appellate court ...its

significant function is to permit the court to set aside an erroneous judgment on appeal obtained by improper means. In practical effect, therefore, the motion or petition to recall the remittitur may operate as a belated petition for rehearing on special grounds, without any time limitations.” (9 *Witkin, Cal. Procedure* (4th ed. 1997) Appeal, § 733, pp. 762-763.)

The California Supreme Court should grant Kramer’s Petition for Rehearing of the Fourth District Division One unpublished Opinions of 2006 *and* 2010; because it is a dangerous threat to democracy itself for the courts to render unpublished opinions that stealthily punish, demean, discredit and financially cripple one who dared to speak the truth for the public good; while the unpublished Opinions are simultaneously furthering the financial interests of the affiliates of the US Chamber of Commerce. And because, what happens in California does not stay in California.^{8,9}

**FOURTH DISTRICT COURT OF APPEALS FOR THE STATE OF
CALIFORNIA, DIVISION ONE**

SHARON KRAMER,

Defendant and Appellant

v.

BRUCE J. KELMAN,

Plaintiff and Respondent

Appellate Court No. D054496

Superior Court No. GIN044539

**Appellate Court No. D047758
(2006 anti-SLAPP Opinion)**

PETITION FOR REHEARING

Defendant and Appellant, Sharon (“Kramer”), petitions this court for rehearing under California Rules of Court, rule 8.536 and in accordance with 9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § 733, pp. 762-763; Kramer petitions to modify its (“Opinion”) under California Rules of Court, rule 8.532(c)(2). Judgments stated are not in the record.

As stated in the unpublished Opinion [<http://freepdfhosting.com/a07c7bf25c.pdf>] “...in Kelman v. Kramer I [this court’s unpublished anti-SLAPP 2006 Opinion <http://freepdfhosting.com/baf482cac4.pdf>] we expressly rejected Kramer's argument that such independent review entitled her to judgment. Rather, we found that such review had

taken place in the trial court and, following our own detailed analysis of the evidence of Kramer's hostility towards Kelman, we left the trial court's determination undisturbed.” (Typd.Opn.pp.13) “Given that circumstance and the fact that only nominal damages were awarded against Kramer, the value of promoting stability in decision making far outweighs the value of any reevaluation of the merits of our prior disposition. (See *People v. Shuey*, *supra* 13 Cal.3d) (Typd.Opn.pp.12)

“We recognize that with respect to malice ‘courts are required to independently examine the record to determine whether it provides clear and convincing proof thereof.’ (*McCoy v. Hearst Corp. (1991) 227 Cal.App.3d 1657, 1664.*)” (Typd.Opn.pp.13)

This case is (*“Kelman v. Kramer”*) D047758 (anti-SLAPP 2006 Opinion), GIN044539, D054496. As evidenced for this court, every day that this court ignores Defendant and Appellant, Sharon (“Kramer’s”) uncontroverted evidence that the following sentence is perjury, *“I testified the types and amounts of mold in the Kramer house could not have caused the life threatening illnesses she claimed”* as found in Plaintiff and Respondent, Bruce (“Kelman”)s declarations used to establish a fictitious reason for Kramer’s malice in this libel case while strategically litigating to silence Kramer of a deceit in science and policy – just like this court ignored the same evidence in it’s unpublished anti-SLAPP 2006 Opinion (App.Opn.Brf.Erta, pp.7-12,15,16) [<http://freepdfhosting.com/c74e07c42f.pdf>]; and every day that this court ignores that there is no evidence of Kramer even once been impeached as to her subjective belief that the words *“lay translation”* going to *“two different paper, two different activities”*, and flipping back to *“translation”* as spoken by Kelman on February 18, 2005, as evidenced by Kramer that she considers to be *“altered [his] under oath statements on the witness stand”* used by Kelman to obfuscate and to hide from a jury, who all was involved and how it became the false concept in public policy that

science holds mold does not harm – just like this court ignored the same evidence in its 2006 Opinion; (App.Opn.Brf.Erta,pp.17-23,29); is

one more day that someone, somewhere, in the United States of America is having their life devastated by the false concept that it is scientifically proven mold and their toxins do not harm, being allowed to remain in public policy, medical practices, claims handling practices and the courts;(App.Req.To.Notice.Arizona.NAA.Amicus,pp.11)
[<http://freepdfhosting.com/7d201e1198.pdf>]; because

this court chose not do independent examination of the evidence on appeal in 2010, or of the errors of its 2006 Opinion that all courts relied upon while ignoring the evidence found in Kramer’s briefs and exhibits substantiating this litigation is Strategic Litigation Against Public Participation to silence one who has been willing to speak out of the deceit in public policy and in the courts. As such, the finding of this Opinion of libel with actual malice is not supported by evidence on appeal. (App.Repy.To.Court.Query)
[<http://freepdfhosting.com/5b2c34d0b6.pdf>]

Directly stated, this Opinion is aiding interstate insurer unfair advantage over the mold sick and injured in medical treatment denials, claims handling practices and litigation to continue; by its stated choice to not independently examine the evidence of errors in this court’s 2006 Opinion.(App.Opn.Brf.Erta,pp.32,33) While stating no errors of trial were found, this court acknowledges the scope of the trial was predicated on the 2006 Opinion which ignored the same facts in evidence this Opinion now does; primarily on the issues of plaintiff perjury, malice, defendant subjective belief in her words and the impact of this litigation on public health. (App.Opn.Brf.Erta,pp.29,30) (App.RpyToCtQuery,pp.19)

Given that circumstance and the fact that the value of promoting stability in decision making in public health policy far outweighs the value of non-reevaluation of this court’s prior erred disposition; and litigation has cost the Kramer family well over

one half of one million dollars in litigation expenses alone to defend Kramer's truthful words for the public good (App.Rply.Brf,pp.21)
[<http://freepdfhosting.com/7bb2a4b4ae.pdf>]; this court needs to do an independent examination of this case – not reiterate prior errors it made in 2006 as fact in 2010 to conclude that libel with actual malice has been proven by a standard of clear and convincing evidence. (Typd.Opn,pp.2-4,7-15)

This Opinion is predicated on a flawed viewpoint bias that Kramer's well evidenced and sincere views on the science and public health are not relevant to this litigation; are not relevant to Kramer's logic and defense for using phrase "*altered his under oath statements on the witness stand*"; and are not relevant to why ("US Chamber") of Commerce & American College of Occupational and Environmental Medicine ("ACOEM") mold policy author, Kelman, sued Kramer in 2005 in an effort to keep her valid, evidenced views of a deception in health marketing, science and policy from coming to greater public light; thereby causing change in policy to the detriment of the affiliates of the US Chamber. (Typd.Opn.pp.,13,14) (App.Opn.Brf.Erta,pp.35) This flawed viewpoint bias of the motivations and credibility of the parties in this case has pervaded this litigation. It has caused the courts to violate Kramer's first amendment rights by wrongfully attributing her truthful and evidenced statements of a deception, of which Kelman is only one of many involved; as "fulsome" evidence of Kramer having malice for Kelman, personally. (Typd.Opn.pp.9,13)(App.Repy.ToCt.Query,pp.3) (App.Opn.Brf.Erta.pp.46)

Not mentioned in the Opinion, Kramer has evidenced for this court that the US Chamber's policy statement on mold cites false University of California physician authorship and was in realty, only authored by two PhDs, Kelman and undisclosed party to this litigation, Bryan ("Hardin"), who is a retired high level CDC NIOSH employee. (App.RpyToCtQuery,pp.20,21)(App.RspToCt.DenialToNoticeFraudArizonaNAAAmicus)
[<http://freepdfhosting.com/9b90407e75.pdf>]

It is not evidence of malice for Kelman, for Kramer to state and evidence the false concept adversely impacting many lives that was mass marketed into US health policy by ACOEM, the (“Manhattan Institute”) think-tank, and the US Chamber for the purpose of biasing the courts against the mold sick and injured; their medical, legal and scientific proponents; and their “crusading whistleblower” advocates. (Typd.Opn.pp.14) This Opinion is aiding this to continue, just like this court’s 2006 Opinion did. The evidence is, Kramer’s purportedly libelous (“March 2005 writing”) was the first to publicly expose how these entities were involved and connected, not just Kelman, in mass marketing the deception in science and policy over the mold issue. (App.Rpy.Brf,pp.1)

This Opinion ignores evidence that entered the case and events that have occurred since the 2006 Opinion was rendered which further evidences why Kelman was strategically litigating to silence Kramer and with much of this evidence not permitted to be discussed in trial. (App.Opn.Brf.Erta,pp.19).(Typd.Opn.pp.14) The evidence is, Kramer is responsible for “*taking the bull by the horns*” and causing a Federal Government Accountability Office audit of the health effects of mold (“**Federal GAO Report**”). Published shortly after the 2008 trial, it concludes that science finds it is **biologically plausible** that mycotoxins found in water damaged buildings can harm human health. The GAO Report has played a valuable role in aiding to slowly change policies and deeply seeded biases over the mold issue intentionally instilled by the US Chamber et.al, to stave off financial responsibility. (App.Opn.Brf.Erta,pp.43,44)

The GAO Report, that Kramer caused, negates the validity of **professional defense witnesses** testimony, such as Kelman’s, on behalf of the insurance industry that serious illnesses “**Could not be**” from mycotoxins indoors; based on a flawed modeling theory by Hardin and Kelman.(App.Opn.Brf.Erta,pp.18) This flawed theory was legitimized and interjected into health policy by ACOEM, then spun further and mass marketed to the courts by the US Chamber and Manhattan Institute (toxic mold claims are because of “trial

lawyers, media and junk science”) to lend false credence to defense experts’ opinions to be able to sell doubt of liability for mold and mold toxins being the cause of illness. Had Kramer been intimidated into silence by this litigation in 2005, this GAO Report that negates the US Chamber’s science never would have come to be in 2008.
(App.Rply.Brf.pp.2,3)

The Opinion, while stating the sincerity of Kramer’s views of the science and marketing of false science are not of relevance to this case, ignores the evidence that Kelman attempted to coerce Kramer to endorse his science before he would stop litigating and after defeating Kramer’s anti-SLAPP motion by the use of perjury on the issue of malice; with Kramer’s evidence for this court of Kelman’s perjury going ignored in the 2006 Opinion, just like this Opinion. (App.Opn.Brf.Erta.pp.12-17)(Typd.Opn.14).

This Opinion also ignores the evidence that Kramer has been written of in a 2006 news article for her willingness to publicly speak out over the deception in science, while others do not because of fear of retribution. (App.Rply.Brf.pp.14) This Opinion is illustrating why that fear would be valid, thus chilling speech and aiding the environmental science of the US Chamber that mold does not harm to continue to influence policy and the courts, by ignoring the evidence of Kelman’s perjury to make up a strategically needed reason for malice to silence Kramer while intimidating others. (AppReqNoticeArizona.NAA.Amicus)

This Opinion is predicated on assumptions not found or supported by the evidence including but not limited to the judgments on record. (Typd.Opn.pp.1,2,10,14). It is predicated on numerous omissions of Kramer’s evidence that clearly substantiate the required burden of proof of libel with actual malice was never met. The Opinion relies on Kelman’s proven perjury on malice and never corroborated hearsay used in this case and in trial to inflame the courts and the jury with a false portrait of Kramer.
(App.Opn.Brf.Erta,pp.29) “Defendants, in their zeal to present a portrait of plaintiff

Roston...that would enhance their position, made reference to a multitude of cases which were inappropriate for consideration by the trial court... The presentation of such matter, if designedly done, is certainly to be discouraged. One might mistake it for an attempt to inflame the court against a party to the action.” Roston v. Edwards (1982) 127 Cal.App.3d 842 [179 Cal.Rptr. 830], The inflaming attorney in Roston was Keith (“Scheuer”).

This Opinion demeans, discredits and misapplies “crusading whistleblower” Kramer’s directly stated and evidenced views of a deception in policy as spiteful words, evidence of malice for Kelman, while gutting Kramer’s legitimate defense of why she wrote “*altered his under oath statements*”. Kramer could stop “crusading” if this court would stop ignoring her uncontroverted evidence of Kelman’s perjury on the issue of malice; and stop ignoring the fact that Kramer has never been impeached as to her subject belief of the truthfulness of her words. Directly stating the truth for the public good is not malicious. It is called freedom of speech that the gatekeeping courts are to protect from being chilled in the name of public health and safety, and for the sake of democracy.
(App.Rply.To.Ct.Query,pp.1-3)

There is a demonstrated manifest misapplication in the Opinion of not acknowledging the legitimacy of Kramer’s views; and the relevance of science, politics, policy and public health to this litigation in Kramer’s needed defense for her thought process behind writing “*altered his under oath statements on the witness stand*”; while ignoring the evidence of what is at stake for the American public when this court does not acknowledge perjury to make up a libel law required reason for malice by ACOEM/US Chamber author, Kelman, as he litigates to silence Kramer. (App.Res.To.Ct.Query,pp.43-45) This court, via this Opinion, has indicated they concur with their 2006 Opinion and lower courts were correct to follow, while expressly stating this court did not do an independent examination of the case, evidence of malice, personal and actual, Kramer’s and Kelman’s. (Typd.Opn.pp.13)

“Where there are exceptional circumstances, a court which is looking to a just determination of the rights of the parties to the litigation and not merely to rules of practice, may and should decide the case without regard to what has gone before.” (England v. Hospital of the Good Samaritan (1939) 14 Cal.2d 791, 795.)”(Typed Opn, pp. 11)

As such, Defendant and Appellant, Sharon Kramer, petitions this court for rehearing to reverse its Appellate Opinions under California Rules of Court, rule 8.532(c)(2) to adhere to the relevant evidence in record in 2010 and according to the constitution, the law, and legal precedent that govern proof of libel with actual malice; and what the courts are obligated to do when provided irrefutable evidence of criminal perjury & attempted coercion used to strategically litigate while harming the accused and the American public; and to set aside an erroneous judgment on appeal obtained by improper means (9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § 733, pp. 762-763.); additionally, to modify its erred findings of judgments not currently in the record. Kramer petitions for rehearing under California Rules of Court, rule 8.536 based the following five points:

- 1. A). Upon independent examination of evidence, this court would find that there is no evidence of Kramer ever being impeached as to her subjective belief that Kelman’s words of “*lay translation*” to “*two different papers, two different activities*” and flipping back to “*translation*” were obfuscating and altering under oath statements to attempt to hide how it became US policy that mold does not harm. No refuting evidence in: (Respondent’s.Reply.Brief)[<http://freepdfhosting.com/f0207f8a45.pdf>] The Opinion ignores the evidence that Kramer has stated and evidenced why this is what she meant by “*altered his under oath statements*” since July of 2005. (App.Rply.To.CourtQuery,pp.10,11)**

B.) Falsely stated in the Opinion, upon independent examination, this court would find that there is no evidence of Kramer making “hostile statements” of Kelman before March 2005 when she wrote of his February 2005 testimony in Haynes v. Adair Homes, Inc., (No. CCV0211573) (Haynes) in the state of Oregon. (App.Opn.Brf.Erta,pp.48) (Resp.Reply.Brf)

C.) This Opinion ignores the evidence that Plaintiff Special Jury Instructions Proof Of Actual Malice, instructed the jury that it was determined Kramer had failed to investigate; and had hostility and personal malice for Kelman when she wrote “*altered his under oath statements*” in March 2005.(App.Opn.Brf.Erta,pp.31)

D.) This Opinion ignores the evidence that the trial judge, when denying Kramer’s JNOV Motion, while finding libel with actual malice had been proven by clear and convincing evidence, based this conclusion on a source who submitted affidavits stating Kramer’s writing was correct. (App.Opn.Brf.Erta,pp. 27)(App.Rply.Brf,pp.13)

E.) Upon independent examination this court would find libel with actual malice was never proven.

A. No Evidence Of Nonbelief Of Truth

Page 8 and 2 of the Opinion states, “The court [2006 Opinion] stated there was admissible evidence to show Kramer's statement was false; that Kelman was clarifying his testimony under oath, rather than altering it; and to show Kramer acted with actual malice.”(Typd. Opn,pp.8) “In our prior opinion, we found sufficient evidence Kramer's Internet post was false and defamatory as well as sufficient evidence the post was published with constitutional malice.”(Typd.Opn,pp.2)

Not mentioned in this Opinion, nor the 2006 Opinion when determining Kramer's writing was false and malicious is that since July of 2005, Kramer has been stating and evidencing for all courts repeatedly in declarations and briefs that she finds Kelman's statements made on February 18, 2005, of "*lay translation*" going to "*two different papers, two different activities*" and flipping back again to "*translation*" to be obfuscating and "*altered [his] under oath statements*" because of her sincere views on the science; and of the deception in science and marketing that Kelman was trying to hide from the Haynes jury. (App.Opn.Brf.Erta, pp.29,30) There is no evidence Kramer has ever been impeached as to her "*subjective belief as the truthfulness of these alleged false statements*". (Res.Rply.Brf) This fact alone – never impeached by Kelman as to Kramer's belief of the truthfulness of her words, negates the Opinion of proof of writing a known falsehood or having reckless disregard for the truth, published with actual malice. Kramer's "Response To This Court's Query", January 28, 2010 described what she has told and evidenced for the courts since July 2005 of why she wrote "altered":

"Declaration of Kramer submitted to the courts, July 2005: 'Within the prior sentences, Kelman testified 'We were not paid for that...', not clarifying which version he was discussing. There was no question asked of him at that time. He went on to say GlobalTox was paid for the 'lay translation' of the ACOEM Statement. He then altered to say 'They're two different papers, two different activities.' He then flipped back again by saying, 'We would have never been contacted to do a translation of a document that had already been prepared, if it hadn't already been prepared.' By this statement he verified they were not two different papers, merely two versions of the same paper. And that is what this lawsuit is really all about.

The rambling attempted explanation of the two papers' relationship coupled with the filing of this lawsuit intended to silence me, have merely spotlighted Kelman's strong desire to have the ACOEM Statement and the Manhattan Institute Version portrayed as two separate works by esteemed scientists.

In reality, they are authored by Kelman and Hardin, the principals of a corporation called GlobalTox, Inc. – a corporation that generates much income denouncing the illnesses of families, office workers, teachers and children with the

purpose of limiting the financial liability of others. One paper is an edit of the other and both are used together to propagate biased thought based on a scant scientific foundation.

Together, these papers are the core of an elaborate sham that has been perpetrated on our courts, our medical community and the American public. Together, they are the vehicle used to give financial interests of some indecent precedence over the lives of others.’(Appellant Appendix Vol.1 Ex.8:157-158) (Response to Court’s Query, pp.10-11)”

Pages 4 -6 of the Opinion cite Kelman’s testimony in Haynes. There are fourteen lines of the transcript omitted from the middle. (Typd.Opn.pp4)(App.Opn.Brf.Erta,pp.26) These were also omitted from the 2006 Opinion. They corroborate Kramer’s contention that the line of questioning of the US Chamber/Manhattan Institute’s relationship to ACOEM over the mold issue would have been stopped if the plaintiff attorney Calvin (“Vance”) had not had the Arizona Kilian v. Equity Residential Trust (U.S.Dist.Ct., D.Ariz., No. CIV 02-1272-PHX-FJM, (Kilian) transcript in its entirety.

These omitted 14 lines illustrate the defense attempting to invoke the rule of completeness, after Kelman shouted “..ridiculous..” when asked of paid edits, the ACOEM paper and the Manhattan Institute. (Typd Opn, pp.4) Below italicized words as in the Opinion falsely infer Kramer accused Kelman of lying about being paid by the Manhattan Institute to author the ACOEM Mold Statement:

MR. VANCE: And, you participated in those revisions?

BRUCE J. KELMAN: Well, of course, as one of the authors.

MR. VANCE: *All right. And, isn't it true that the Manhattan Institute paid GlobalTox \$40,000 to make revisions in that statement?”*

KELMAN: *That is one of the most ridiculous statements I have ever heard.*

MR. VANCE: *Well, you admitted it in the Killian [sic] deposition, sir.*

BRUCE J. KELMAN: *No. I did not.* (Typd.Opn.pp.4)

(Omitted From Opinion):

MR. VANCE: Your Honor, may I approach. Would you read into the record, please, the highlighted parts of pages 905 and 906 of the trial transcript in that case.

MR. KECLE: Your Honor, I would ask that Dr. Kelman be provided the rest of the transcript under the rule of completeness. He's only been given two pages.

JUDGE VANDYKE: Do you have a copy of the transcript?

MR. KECLE: I do not.

MR. VANCE: Your Honor, I learned about Dr. Kelman just a –

JUDGE VANDYKE: How many pages do you have?

MR. VANCE: I have the entire transcript from pages –

JUDGE VANDYKE: All right. Hand him the transcript.

MR. VANCE: I'd be happy to give it to him, Your Honor.

JUDGE VANDYKE: All right. (App.Opn.Brf.Erta,pp.26)

(Back In The Opinion)

MR. VANCE: Would you read into the record the highlighted portions of that transcript, sir?

MR. KELMAN: "And, that new version that you did for the Manhattan Institute, your company, GlobalTox got paid \$40,000. Correct. Yes, the company was paid \$40,000 for it."...

Kramer never accused Kelman of lying about being paid by the Manhattan Institute to author the ACOEM paper. Kramer did not even mention ACOEM's until the last sentence. She was writing of the Manhattan Institute paper. The irrefutable evidence is, Kramer's writing accurately states there were two papers and payment was for the Manhattan Institute version itself, not ACOEM's. Her March 2005 writing states, "*He admitted the Manhattan Institute, a national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure.....A version of the Manhattan Institute commissioned piece may also be found as a position statement on the website of a United States medical policy-writing body, the American College of Occupational and Environmental Medicine.*" (App.Opn.Brf.Erta,pp 32)

The 2006 Opinion this Opinion is relying upon when deeming Kramer's writing false with reckless disregard for the truth, wrote the same thing Kramer did in its 2006 Opinion. This court found while determining Kramer's writing false: *"This testimony supports a conclusion Kelman did not deny he had been paid by the Manhattan Institute to write a paper, but only denied being paid by the Manhattan Institute to make revisions in the paper issued by ACOEM. He admitted being paid by the Manhattan Institute to write a lay translation."* (App.Opn.Brf.Erta,pp.32)

Given that this Opinion falsely infers Kramer accused Kelman of lying about being paid to author a paper that Kramer was not even writing of just like the 2006 Opinion; this Opinion is greatly flawed in its finding of a false accusation of perjury with actual malice. And given that Kramer has a degree in marketing and is published in peer reviewed medical journals regarding the conflicts of interest in health marketing by ACOEM et al, over the mold issue; and in light of the fact that there is no impeaching evidence otherwise; it is not unreasonable to conclude that Kramer's subjective belief is that Kelman's altering under oath statements of *"lay translation"* to *"two different papers, two different activities"* and back to *"translation"* could reasonably be deemed *"altered his under oath statements"* to obfuscate, after having to admit there was a second paper that was paid for by a think-tank and then having to discuss the two papers together by his Kilian testimony coming into the Haynes trial over objections and a shouting of *"ridiculous"*; that could well have stopped the line of questioning if Vance had not had the Kilian transcript in its entirety.

Given that Kramer understands the adverse impact on health policy because of these two papers being closely connected to mass market misinformation; it is not unreasonable that she would consider Kelman shouting *"ridiculous"* instead of taking the opportunity to clarify there were two papers when asked about paid edits; could reasonably be perceived

as Kelman attempting to obfuscate to shut down the line of questioning so as not to let the jury know the purportedly unbiased ACOEM paper was closely connected to a paid for hire think-tank version on behalf of the US Chamber of Commerce.

The evidence is, Kramer is responsible for Vance having the Kilian transcript via a mutual acquaintance that forced Kelman to have to discuss the two papers together in front of the Haynes jury. (App.Opn.Brf.Erta, pp.19,20). The evidence is, Kramer was told by a source who was in the courtroom that Kelman was attempting to say the two papers were not connected, but had to admit they were (after the Kilian transcript was permitted into the Haynes because Vance had Kilian it in entirety). (App.Opn.Brf.Erta, pp.23) One of Kramer's four sources submitted affidavits after the 2006 Opinion, corroborating altered was an accurate description of Kelman's testimony after Kilian entered Haynes. (App.Opn.Brf.Erta, pp.25,26).

"This conclusion is supported by a variety of other evidence in the record, and Synanon again appears to be merely quibbling with the author's choice of words. Given the importance of permitting a reasonable degree of literary license, the statement in question seems easily supportable and by no means an act in reckless disregard of the truth." Reader's Digest Assn v. Superior Court (1984) 37 Cal.244, 264-265

B. No Evidence Of Hostile Statements Before Kramer Wrote

On page 9, the Opinion states, *"We found that in light of the public record of Kelman's testimony in the Haynes trial, Kelman's role as a defense expert in Kramer's own lawsuit, and hostile statements Kramer made thereafter about Kelman, a jury could conclude Kramer had acted with constitutional malice in publishing the post."*

There is no evidence in the court record of Kramer ever uttering a word of displeasure regarding Kelman's minor involvement in her own lawsuit. The evidence is that Kramer

felt Kelman's testimony in her own lawsuit of stating her home was an increased risk after a botched remediation helped Kramer to receive the sizeable settlement of nearly one half of one million dollars, hardly a malice causing amount based on a supportive testimony. (App.Opn.Brf.Erta,pp.12-14) It is simply untrue that Kramer harbored malice for Kelman and is a key false statement in the Opinion indicative of an inflaming fallacy that has pervaded this case on the issue of extenuating circumstances misused to infer actual malice.

Falsely stated in the Opinion, there is no evidence of Kramer making any "*hostile statements...about Kelman*" before she wrote of his February 2005 Oregon testimony, in March of 2005. The evidence is that Kramer once referred to the corporation of ("GlobalTox") Inc. as an "ilks" in a third party email to a 'contact us" button regarding a webinar. Kelman is not mentioned in the email. There is no evidence of "*hostile statements Kramer made thereafter about Kelman*" before she wrote in March of 2005.(App.Opn.Brf.Erta,pp.48) GlobalTox lost their defamation claim. A statement of them cannot be used as evidence of malice for Kelman. This is indicative of a key inflammatory concept used to establish false extenuating circumstances to infer actual malice.

Upon independent examination, this court would find that the false concept of Kramer's purported personal malice for Kelman is based on three flawed points in the 2006 Opinion. 1.) It ignored evidence Kelman was committing perjury to establish Kramer's lawsuit of long ago as a reason for purported malice. 2.) It attributed that Kramer had once written the word "ilks" when referring to GlobalTox as evidence of malice for Kelman. 3.) It applied Kramer's detailed explanation of why she felt Kelman would have reason to alter and obfuscate, and Kramer's views on "positions" to be bad tone and thus evidence of malice for Kelman, personally.

As evidenced from the 2006 Opinion that this Opinion is relying upon to misattribute Kramer's direct words and views of a mass marketed deceit in science as "fulsome" evidence of personal malice for Kelman: *"Further, in determining whether there was a prima facie showing of malice, the trial court also relied on the general tone of Kramer's declarations...Kramer's declarations are full of language deriding the positions of Kelman, GlobalTox, ACOEM and the Manhattan Institute... (Appellant Appendix Vol.1 Ex.12:256, 257)"*(App. Reply To Court Queary, pp.3) This is false evidence of personal malice for Kelman, but serves as convincing evidence of judicial viewpoint bias gutting and twisting Kramer's needed defense into evidence of malice for Kelman.

On page 12 the Opinion states, *"Application of the law of the case doctrine disposes of Kramer's initial argument on appeal that the trial court erred in relying on our prior opinion in framing the issues tried on remand. The trial court was bound by our determinations of law and thus did not err in relying on those determinations in framing the issues for trial. (People v. Shuey, supra, 13 Cal.3d at p. 846.)* (Typd.Opn.pp12)

As accurately stated, the trial *was* based on the above erred 2006 Opinion with the theme of the case and the framing of the scope of the trial becoming Kramer had malice for Kelman because he was a great expert in her own litigation; everything she said and evidenced of a deception in health policy was to be perceived as evidence of personal malice for Kelman; and that Kramer's word "altered" falsely accused Kelman of having to admit he lied about being paid by the Manhattan Institute for the ACOEM paper because she was out to get him - even though Kramer's writing states there are two papers, with payment being for the Manhattan Institute version, not ACOEM's. (App.Opn.Brf,pp.12-16)

C. Jury Instructions Stated Kramer's Writing Was Wrong And She Had Malice

On page 10, the Opinion states, "...the jury found the statements in the press release were false and clear and convincing evidence Kramer either knew her statements were untrue or had serious doubts about the truth of the statements." (Typd.Opn.pp.10) This Opinion ignores the evidence that the jury was instructed by the Plaintiffs' Special Jury Instructions Proof of Actual Malice, it had been predetermined that Kramer's writing was incorrect because she failed to investigate; and instructed that Kramer had "anger, hostility" for Kelman when she wrote in March 2005. The jury foreman submitted an affidavit stating the jury asked the trial judge, that if they followed these special instructions that they were directed they must, did they have to find libel with actual malice. The trial judge responded, "Yes". Plaintiff Special Jury Instructions Proof of Actual Malice: *"...a combination of Kramer's anger, hostility toward Plaintiffs, failure to investigate or subsequent conduct may all constitute circumstantial evidence that actual malice existed. Evidence alone of Kramer's animosity, hatred, spite or ill will toward Kelman or GlobalTox does not establish actual malice."* (App.Opn.Brf.Erta,pp.36)

D. Trial Judge Deemed A Corroborating Source As Proof Kramer's Writing Was Incorrect and Actual Malice

Page 12 the Opinion states, "...by way of its order denying Kramer's motion for judgment notwithstanding the verdict, that there was sufficient evidence her statement about Kelman was false and that she knew or acted with reckless disregard as to whether the statement was false..." (Typd.Opn.pp 12) This Opinion ignores the evidence, briefs and record of oral argument December 12, 2008, that the trial judge found source witness, Vance, who submitted affidavits stating he was of the opinion "altered" was a correct description of Kelman's testimony, was the smoking gun clear and convincing proof that Kramer had written a known falsehood. A witness who says a writing is correct, is not

evidence of a known falsehood, maliciously published with reckless disregard for the truth. Kramer's JNOV should have been granted. (App.Rpy.Brf.13)

E. No Proof of Libel with Actual Malice

The evidence of the case is that Kramer has never been impeached as to the subject belief in her words. There is no evidence of her making hostile statements of Kelman before she wrote in March of 2005. She did not accuse Kelman of lying about being paid by a think-tank for the ACOEM's paper as this Opinion and the 2006 Opinions infer. Her writing accurately states there were two papers with payment being for the Manhattan Institute one, not ACOEM's. To criticize positions affecting health policy is not evidence of malice. It is speech to be protected under the first amendment. Kramer sincerely believes based upon her view of the science and health policy that Kelman was altering and obfuscating to hide how it became policy that mold does not harm by a prior testimony coming into a trial over objections. A witness who says a writing is true is not evidence a writing is false. Kramer was the first person to publicly write of the deception in science over the mold issue in this same purportedly libelous writing. It is criminal to use perjury to prove you were accused of perjury. Libel with actual malice has not been proven by clear and convincing evidence. This court should reverse its Opinion accordingly.

2. This court should expressly recognize that Kramer's word "statements" is plural, not singular. This error in the Opinion along with presenting Kramer's writing regarding Kelman's testimony partially as text and partially as endnote, leaving out 14 lines of transcript, and not italicizing all the words Kramer has evidenced for this court (and never been impeached) that she considers to be altering words; is causing the Opinion to wrongfully project that Kramer accused Kelman of getting

caught lying about being paid by the Manhattan Institute for the ACOEM's mold statement after viewing his prior testimony from Kilian. As evidenced for this court, this error is being encouraged by inflaming statements in Kelman's brief of falsely portraying Vance's questions to be Kramer's writing.(App. Response To Court's Query, pp. 5)(Typd.Opn. pp.7,14)

At pages 3,7, the Opinion states, *"The libel claim in the present case concerns whether Kelman testified consistently with his Kilian testimony about being paid by the Manhattan Institute during his testimony at the Haynes hearing..." (Typd. Opn, pp.3) "Kramer's claim Kelman had 'altered his under oath statements on the witness stand' focuses on Kelman's testimony about being paid by the Manhattan Institute. She claims the portion of Kelman's testimony in the Haynes hearing that we italicized supports the statement in her press release."*(Typd.Opn,pp.7)

The above are false statements. Kramer's writing did not *"focus on Kelman's testimony about being paid by the Manhattan Institute"* or if his testimony in the two cases were consistent with each other about who paid whom for what paper. This court did in its 2006 Opinion. Misleading in the Opinion by leaving out 14 key lines from the middle of the transcript and by dividing Kramer's two paragraphs about Kelman, it portrays Kramer making a false accusation of Kelman lying about being paid by a think-tank to author the ACOEM paper. (Typd.Opn.6-7) Acknowledging the purportedly libelous *"altered his under oath statements"* means more than one altering is critical to the understanding that Kramer did not maliciously accuse Kelman of perjury or publish with reckless disregard for the truth. Kramer meant, trying to say not connected but having to admit they were - obfuscating - over a matter of great concern to public health. The Federal GAO Report that negates the deception in health marketing, supports why a defense witness would not want

it known how closely tied ACOEM's purportedly unbiased science is to the US Chamber's. (App.Opn.Brf.Erta,pp.19)

3. Judicial Viewpoint Bias. This court should expressly recognize that contrary their statement, *"the sincerity of Kramer's views"* is not of relevance to this libel litigation; proving or disproving the sincerity of her views and logic behind writing *"altered his under oath statements"*, is the entire point of libel litigation. This court should expressly recognize that Kelman attempted to coerce Kramer to endorse his science, against her views which this Opinion deems are not relevant to this litigation.

Opinion states, page 14, "The trial court correctly excluded this evidence as irrelevant. Kelman's libel claim did not put in issue the validity of his scientific conclusions or the sincerity of Kramer's conflicting views.... Thus the trial court did not abuse its discretion in excluding the evidence Kramer offered" (Typd.Opn.pp.14)

By not being able to discuss the science, Kramer was not able to defend the validity and logic for why she wrote *"altered his under oath statements"*. While the Opinion states Kramer's views of the science are not of relevance to the litigation, it ignores that Kramer was being required to sign the following endorsement of Kelman's science in apology for writing *"altered his under oath statements"* before Kelman would stop litigating or suffer hundreds of thousand of dollars in litigation expense to defend the truth of those words and all others of the deception in health marketing over the mold issue. Kramer refused to sign:

"....To my knowledge, their [Kelman, and his colleagues at Veritox, Inc. (formerly known as Globaltox, Inc.)] testimony and advice are based on their expertise and objective understanding of the underlying scientific data. I sincerely regret any harm or damage that my statements may have caused." (App. Reply To Court Query, pp. 23) (Appellant Appendix Vol.IV App.942)

If Kramer's views were important enough to Kelman that Kramer be forced to go against her views and endorse his science before he would stop litigating, then it should be obvious that Kramer needed to be able to discuss these views in trial to defend why she wrote what she did that Kelman wanted silenced. This court should modify the Opinion to acknowledge Kramer was not given the opportunity to defend the truth of her words in trial. This Opinion should take appropriate action to address the criminality of Kelman and Scheuer attempting to coerce Kramer into an endorsement adverse to the health and safety of the American public.

4. This court should recognize that one cannot use criminal perjury to inflame the courts by making up a reason for the other party's malice when strategically litigating to silence a whistleblower; even if one is an author of policy papers for the US Chamber of Commerce and the American College of Occupational and Environmental Medicine. (AppRplyToCtQuery,pp.23-25) This Opinion ignores Kramer's uncontroverted evidence provided since September of 2005; Kelman has been committing perjury of his "*role as a defense expert in Kramer's own lawsuit*". (App.Opn.Brf.Erta,pp.8-22)

Page 9, the Opinion states, "A state of mind, like malice, 'can seldom be proved by direct evidence. It must be inferred from objective or external circumstantial evidence.' [Citation.]..... We found that in light of ...Kelman's role as a defense expert in Kramer's own lawsuit, and hostile statements Kramer made thereafter about Kelman, a jury could conclude Kramer had acted with constitutional malice in publishing the post." (Typd.Opn.pp.9)

Kelman's purported "*role as a defense expert in Kramer's own lawsuit*" was perjury in this lawsuit to inflame the courts. As this court was informed of what will happen when they acknowledge the evidence of Kelman's perjury, "When this Reviewing Court acknowledges what legally cannot be denied: Kramer's overwhelming, uncontroverted and irrefutable evidence that seven judges and justices ignored Kramer's overwhelming, uncontroverted and irrefutable evidence of Kelman's perjury on the issue of malice and ignored Kramer's vast evidence of Scheuer's willful suborning of Kelman's criminal perjury; then seven years worth of scientific fraud perpetrated on US Courts over the mold issue by the US Chamber of Commerce et al, will immediately cease by the acknowledgment that their author of their scientific fraud has no qualms about lying under oath to the courts and strategically litigating; and while their other author (sic, Bryan "Hardin") does not disclose he is a party to the strategic litigation."

(App.Reply.To.Court.Query, pp.43-45).

Not mentioned in the Opinion, the following is perjury by Kelman to establish a false reason for malice: Declarations of Kelman submitted to the courts, 2005, 2006 and 2008: "*I first learned of Defendant Sharon Kramer in mid-2003, when I was retained as an expert in a lawsuit between her, her homeowner's insurer [Mercury Casualty] and other parties regarding alleged mold contamination in her house. She apparently felt that the remediation work had been inadequately done, and that she and her daughter had suffered life-threatening diseases as a result. I testified that the type and amount of mold in the Kramer house could not have caused the life-threatening illnesses that she claimed. I never met Ms. Kramer.*" (App.Opn.Brf.Erta,pp.7)

Not mentioned in the Opinion, the following is suborning of perjury by Scheuer when establishing needed external circumstances of malice to inflame the courts: "*Dr. Kelman testified in a deposition that the type and amount of mold in the Kramer house could not*

have caused the life threatening illnesses that Kramer claimed. Apparently furious that the science conflicted with her dreams of a remodeled house, Kramer launched an obsessive campaign to destroy the reputation of Dr. Kelman and GlobalTox.”

(App.Opn.Brf.Erta,pp.8)

The following are excerpts of Kramer’s Opening Brief Errata evidencing for this court how many times, by how many people and in how many ways, judges and justices were informed, but ignored that Kramer was evidencing US Chamber/ACOEM author, Kelman, was repeatedly committing perjury and Scheuer was repeatedly suborning to inflame the courts and present a false portrait of Kramer’s writing and motivation for writing:

“As directly evidence by its absence in the transcript of Respondent’s actual deposition testimony in Mercury, no such malice causing testimony as claimed of “I testified the types and amounts of mold in the Kramer house could not have caused the life threatening illnesses she claimed” was ever given by Respondent in Appellant’s Mercury case...As evidenced by the declaration of William J. Brown III, (Brown)...the courts have been informed complete with documentation of Respondent’s actual testimony in Mercury since June 30, 2006, but refused to take notice when denying Appellant’s anti-SLAPP motion. As evidenced by the declaration of John Richards, Esq. and submitted to the court ...who took Respondent’s deposition in Mercury, no such malice causing testimony was ever given by Respondent in Mercury, nor has there been any evidence in this case that Appellant has “launched into an obsessive campaign to destroy the reputations” of any of the other approximately seven expert defense witnessesAs is evidence by the declaration of Appellant’s expert witness who was not permitted to testify, Dr. Harriet Ammann, Respondent could not have possibly given the testimony he claimed to have given in Mercury...as evidenced by the deposition of Appellant, taken by Scheuer on January 3, 2008, Respondent and Scheuer knew they were providing false declarations and

knew the impact it was having on perception bias within the courts.taken from the Appellate Court anti-SLAPP ruling of November 19, 2006...‘Kramer asked us to take judicial notice of additional documents, including the complaint and an excerpt from Kelman's deposition in her lawsuit against her insurance company. We decline to do so as it does not appear these items were presented to the trial court.’...“Initially, we note this lawsuit is not about a conspiracy. This lawsuit was filed by Kelman and GlobalTox alleging one statement in a press release was libelous. Thus, conspiracy issues are not relevant.”..letter that Appellant sent to Scheuer on September 18, 2008...requesting he fulfill his duty as a licensed officer of the court and inform the courts of the improvidently entered orders that were founded on perjury.....On October 31, 2008, Respondent submitted a Motion To Strike Costs Or Award Costs To All Prevailing Parties. This time, Appellant even took the exhibit page regarding the perjury and put a caption in big, bold print on the pages. She provided the court with 23 exhibits regarding Respondent’s known perjury on the issue of malice. (Vol.4 App.988-1062)..... Not one piece of evidence was ever submitted in this case that Appellant was even remotely unhappy with Respondent’s involvement in Mercury. On December 12, 2008, when in oral argument, Appellant requested Judge Schall ask Scheuer of the matter, to which she replied, “I’m not going to be drawn into that kind of petty behavior asking Mr. Scheuer to explain himself on things...” (Vol.7 RT.568)” (Appellate Opening Brief Errata, pp.8-17)”

This court should reverse its Opinions by acknowledging Kramer’s uncontroverted evidence of Kelman’s perjury to establish a fictional theme of malice. *"If the remittitur issues by inadvertence or mistake or as a result of fraud or imposition practiced on the appellate court ...its significant function is to permit the court to set aside an erroneous judgment on appeal obtained by improper means. In practical effect, therefore, the motion or petition to recall the remittitur may operate as a belated petition for rehearing on*

special grounds, without any time limitations.” (9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § 733, pp. 762-763.)

5. This court should recognize that judgments stated in the Opinion are not in the court record. There is no judgment entered of Kramer being awarded \$2,545.28 and prevailing over GlobalTox, even though she did. Kelman did not argue to have Kramer’s costs halved in his motion to tax costs. The court did it of its own accord. There is double standard of the courts halving Kramer’s costs, but not Kelman’s. Falsely stated, Kramer did not have an opportunity to dispute costs incurred by GlobalTox being awarded to Kelman.

Pages 1,2,10,14 the Opinion states, “*We find no error in the trial court's award of costs.*” “*...the trial court awarded Kelman \$7,252.65 in costs. The jury found that Kramer did not libel GlobalTox and judgment against GlobalTox was entered. The trial court awarded Kramer \$2,545.28 in costs against GlobalTox.*” “*The court entered judgment in favor of Kelman and awarded him \$7,252.65 in costs. The trial court's judgment awarded GlobalTox no damages and by way of a postjudgment proceeding.*” “*Kelman filed a cost bill of \$7,252.65 on October 14, 2008. On October 31, 2008, Kramer filed a motion to strike Kelman's costs and have costs awarded to her as against GlobalTox. In her motion, she argued that as the prevailing party as against GlobalTox she was entitled to an award of costs. With respect to Kelman's cost bill, the only objection she raised was her contention the verdict in Kelman's favor was defective. In her motion, she did not object to any particular item in Kelman's cost bill... On December 12, 2008, the trial court awarded Kelman the \$7,252.65 in costs he claimed. The trial court also permitted Kramer to file a memorandum of costs as against GlobalTox. Thereafter, Kramer filed a motion for costs and GlobalTox filed a motion to tax the costs, in which among other matters GlobalTox*

argued that Kramer only prevailed against one defendant and her deposition costs of \$3,800 should be reduced by half. The trial court, with a different trial judge presiding, heard Kramer's cost motion on April 3, 2009, and awarded her a total of \$2,545.28. In particular, the trial court agreed with Kelman that Kramer should only be permitted to recover one-half of her deposition costs." "Kramer does not challenge as inadequate the trial court's award to her of costs as against GlobalTox. She does however appear to contend that, just as the deposition costs she claimed were reduced by one-half, Kelman's claimed costs should also be reduced by one-half. On this record we cannot disturb the trial court's award of costs to Kelman. At the time Kelman's costs were litigated, Kramer made no objection to any particular item of costs and did not argue that any or all items Kelman claimed were attributable to GlobalTox. Thus, as Kelman points out, Kramer did not comply with the requirements of rule 3.1700(b)(2), California Rules of Court, that her objection to costs "must refer to each item objected to . . . and must state why the item is objectionable." "Because Kramer made no such objection, Kelman never was given the opportunity to rebut Kramer's contention that half of all the costs Kelman claimed were attributable to GlobalTox and the time for making such an objection has passed. (Rule 3.1700(b)(1), (3).)"(Typd.Opn.pp.1,12,10,14)

There is no judgment entered of Kramer prevailing over GlobalTox and awarded costs of \$2,545.28, only a ruling of this. (App.Opn.Brff.pp.Erta.pp.4) Kramer asked for costs of over \$16,129.00 and attorney fees of \$472,125.00 while evidencing Kelman's perjury for the seventh judge. Falsely stated, Kelman did not argue that Kramer's costs of disposition, \$3800, should be halved in his memorandums to tax costs (Attached Ex.C) The court halved Kramer's costs, while stating nothing could be done of Globaltox's costs being submitted by and awarded to Kelman. (Vol.9, RT)

Kramer did not submit deposition costs of \$3800. Kelman did. That is how Kramer knew Kelman had submitted all costs incurred by Globaltox, because Kramer was only deposed once and on video. \$3800 was the cost incurred, not half. (App.Opn.Brf.Erta,pp.4) Falsely stated in the Opinion, Kramer did not have an opportunity to request Kelman's costs he was awarded that were incurred by GlobalTox be taxed. Kramer filed a motion to strike Kelman's entire cost memorandum based on evidencing for the fifth judiciary to oversee this litigation of Kelman's perjury on issue of malice. Rule 3.1700(b)(2) states *"Form of motion Unless objection is made to the entire cost memorandum, the motion to strike or tax costs must refer to each item objected to..."* Kramer was not to state individual items that were objectionable in her motion to strike.

In oral argument of December 12, 2008, after the trial judge refused to be *"drawn into that kind of petty behavior"* of asking Kelman's attorney, Scheuer, of the perjury, *"The trial judge specifically stated she would not hear Appellant's oral arguments for Motion for New Trial.. (Reporter's Transcript, P.577). Respondent's costs were never even addressed to be able to be denied to be heard."* (App.Rply.Brf,pp.27). Kramer was never given the opportunity to address Kelman's award of costs incurred by GlobalTox – a party she prevailed over in trial. The evidence is, Kramer now has an interest accruing lean on her home for \$3,626.33 of costs submitted by and awarded to Kelman that he did not incur. One trial judge refused to hear motions and the next trial judge claimed he could not nothing about prior erred judgments with a presiding judge refusing to hear a motion for reconsideration in between these two judges based on a purported date of entry of judgment of December 18, 2008 – that is not found in the court record with no mailings of this purported judgment. (App.Opn.Brf.Erta,pp.3,4,52)(App.Rply.Brf,pp.27,30,32,33)

The Opinion must be modified and a judgment entered awarding Kramer \$2,545.28 as the prevailing party over GlobalTox. Kelman should not be awarded costs of \$3,626.33 Kramer had no opportunity to request be taxed and were incurred by a party she prevailed over in trial, GlobalTox. Kramer should be awarded all costs and attorney fees when this court's Opinions modify and reverses to stop aiding insurer unfair advantage by acknowledging the evidence, *"I testified that the amount and types of mold in the Kramer house could not have caused the life threatening illness she claimed"* is perjury by the US Chamber's *"Scientific View of the Health Effects of Mold"* author Kelman, while strategically litigating.

CONCLUSION

Petitioner requests that rehearing be granted and that the court reverse its finding that libel with actual malice has been proven by clear and convincing evidence; that fraud on an appellate court when strategically litigating over a matter of public health and safety is irrelevant; that judgment be reversed accordingly; and judgment modify to accurately reflect rulings.

COURT OF APPEAL, FOURTH APPELLATE DISTRICT

DIVISION ONE

STATE OF CALIFORNIA

BRUCE KELMAN et al.,

Plaintiffs and Respondents.

v.

SHARON KRAMER,

Defendant and Appellant.

D054496

(Super. Ct. No. GIN044539)

APPEAL from a judgment of the Superior Court of San Diego County, Lisa C. Schall, Judge. Affirmed.

In this defamation case, Sharon Kramer appeals from a judgment entered on a jury verdict finding she libeled Bruce Kelman. The jury awarded Kelman nominal damages of one dollar and the trial court awarded Kelman \$7,252.65 in costs. The jury found that Kramer did not libel GlobalTox and judgment against GlobalTox was entered. The trial court awarded Kramer \$2,545.28 in costs against GlobalTox.

In a prior opinion, a previous panel of this court affirmed an order denying Kramer's motion to strike under the anti-SLAPP statute. In doing so, we largely resolved the issues Kramer now raises on appeal. In our prior opinion, we found sufficient evidence Kramer's Internet post was false and defamatory as well as sufficient evidence the post was published with constitutional malice. We also found there was sufficient evidence to defeat Kramer's claim she was protected by the fair reporting privilege provided to journalists by Civil Code section 47, subdivision (d)(1). Under the doctrine of the law case, these determinations are binding on us and compel us to find there is sufficient evidence to support the jury's determination Kramer libeled Kelman and was not entitled to the fair reporting privilege.

We find no error in the trial court's award of costs. Accordingly, we affirm the judgment.

I

FACTUAL BACKGROUND

Our prior unpublished opinion, *Kelman v. Kramer* (Nov. 16, 2006, D047758) (*Kelman v. Kramer I*), fully set forth the factual background of the plaintiff's claims:

"Kelman is a scientist with a Ph.D. in toxicology who has written, consulted, and testified on various topics, including about the toxicology of indoor mold. He is also the president of GlobalTox, which provides research and consulting services, including on toxicology, industrial hygiene, medical toxicology, and risk assessment. Kramer is 'active in mold support and the pressing issue of mold causation of physical injury' after having experienced indoor mold in her own home.

"In June 2004, Kelman gave a deposition in an Arizona case, *Kilian v. Equity Residential Trust* (U.S.Dist.Ct., D.Ariz., No. CIV 02-1272-PHX-FJM). During the deposition, Kelman testified about his involvement with a paper on the health risks of mold that he co-authored with two others for the American College of Occupational and Environmental Medicine (ACOEM). This paper was reviewed by his peers in the scientific community. Later he wrote a nontechnical version of the paper for the Manhattan Institute. During the deposition, Kelman, inter alia, denied including in the Manhattan Institute version argumentative language that had been rejected during the peer review process at ACOEM and testified that if there were any sentences that had been removed from the ACOEM version that appeared in the Manhattan Institute version, they 'certainly weren't very many.' The following exchange then occurred:

" 'Q. And that new version that you did for the Manhattan Institute, your company, GlobalTox, got paid \$40,000, correct?

" 'A. Yes. The company was paid \$40,000 for it.'

"In February 2005, Kelman testified during a hearing in an Oregon State court case, *Haynes v. Adair Homes, Inc.*, (No. CCV0211573) (*Haynes*). The Haynes family sued a builder alleging construction defects in their home resulted in mold growing in the house and causing physical injury to Renee Haynes and the Haynes's two young children. During the hearing, Kelman testified on cross-examination about his work on the ACOEM and Manhattan Institute papers. The libel claim in the present case concerns whether Kelman testified consistently with his *Kilian* testimony about being paid by the Manhattan Institute during his testimony at the *Haynes* hearing:

" 'MR. VANCE: Okay. Now, this revision of the [ACOEM paper] state-

" 'BRUCE J. KELMAN: What revision?

" 'MR. VANCE: The revision -- you said that you were instrumental in writing the statement, and then later on you said you and a couple other colleagues wrote a revision of that statement, isn't that true?

" 'BRUCE J. KELMAN: No, I didn't say that.

" 'MR. VANCE: Well --

" 'BRUCE J. KELMAN: To help you out I said there were revisions of the position statement that went on after we had turned in the first draft.

" 'MR. VANCE: And, you participated in those revisions?

" 'BRUCE J. KELMAN: Well, of course, as one of the authors.

" 'MR. VANCE: *All right. And, isn't it true that the Manhattan Institute paid GlobalTox \$40,000 to make revisions in that statement?*

" 'BRUCE J. KELMAN: *That is one of the most ridiculous statements I have ever heard.*

" 'MR. VANCE: *Well, you admitted it in the Killian [sic] deposition, sir.*

" 'BRUCE J. KELMAN: *No. I did not.*

" '.....

" 'MR. VANCE: Would you read into the record the highlighted portions of that transcript, sir?

" 'BRUCE J. KELMAN: "And, that new version that you did for the Manhattan Institute, your company, GlobalTox got paid \$40,000. Correct. Yes, the company was paid \$40,000 for it.["]

" 'MR. VANCE: Thank you. So, you participated in writing the study, your company was paid very handsomely for it, and then you go out and you testify around a country legitimizing the study that you wrote. Isn't that a conflict of interest, sir?

" 'BRUCE J. KELMAN: Sir, that is a complete lie.

" 'MR. VANCE: Well, you['re] vouching for your own self [inaudible]. You write a study and you say, "And, it's an accurate study."

" 'BRUCE J. KELMAN: We were not paid for that. In fact, the sequence was in February of 2002, Dr. Brian Harden, and [inaudible] surgeon general that works with me, was asked by American College of Occupational and Environmental Medicine to draft a position statement for consideration by the college. He contacted Dr. Andrew Saxton, who is the head of immunology at UC -- clinical immunology at UCLA and myself, because he felt he couldn't do that by himself. The position statement was published on the web in October of 2002. In April of 2003 I was contacted by the Manhattan Institute and asked to write a lay version of what we had said in the ACOEM paper -- I'm sorry, the American College of Occupational and Environmental Medicine position statement. When I was initially contacted I said, "No." For the amount of effort it takes to write a paper I can do another scientific publication. They then came back a few weeks later and said, "If we compensate you for your time, will you write the paper?" And, at that point I said, "Yes, as a group." The published version, not the web version, but the published

version of the ACOEM paper came out in the Journal of Environmental and Occupational Medicine in May. And, then sometime after that, I think it was in July, this lay translation came out. They're two different papers, two different activities. The -- we would have never been contacted to do a translation of a document that had already been prepared, if it hadn't already been prepared.

" 'MR. VANCE: Well, your testimony just a second ago that you read into the records, you stated in that other case, you said, "Yes. GlobalTox was paid \$40,000 by the Manhattan Institute to write a new version of the ACOEM paper." Isn't that true, sir?

. . . .

" 'BRUCE J. KELMAN: I just said, we were asked to do a lay translation, cuz the ACOEM paper is meant for physicians, and it was not accessible to the general public.

" 'MR. VANCE: I have no further questions.'

" 'In June 2005, Kramer wrote a press release about the Haynes case and posted it on PRWeb, an Internet site. This press release was later also posted on another Internet site, ArriveNet. [The bulk of the press release was devoted to an accurate report of the outcome at trial of the Haynes case. The press release reported that the plaintiffs in the Haynes case had prevailed on their claim that toxic mold had injured them and further that the jury had awarded them damages. The last two paragraphs of the press release were devoted to Kelman's testimony and his work for the ACOEM and the Manhattan Institute. The first paragraph of the press release devoted to Kelman's testimony stated]:

" 'Dr. Bruce Kelman of GlobalTox, Inc., a Washington based environmental risk management company, testified as an expert witness for the defense, as he does in mold

cases throughout the country. Upon viewing documents presented by the Hayne[s'] attorney of Kelman's prior testimony from a case in Arizona, *Dr. Kelman altered his under oath statements on the witness stand*. He admitted the Manhattan Institute, a national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure. Although much medical research finds otherwise, the controversial piece claims that it is not plausible the types of illnesses experienced by the Haynes family and reported by thousands from across the U.S. could be caused by 'toxic mold' exposure in homes, schools or office buildings. . . .¹

"Kramer's claim Kelman had 'altered his under oath statements on the witness stand' focuses on Kelman's testimony about being paid by the Manhattan Institute. She claims the portion of Kelman's testimony in the *Haynes* hearing that we italicized supports the statement in her press release.

"Kelman and GlobalTox sued Kramer for libel based on the statement in the press release that 'Kelman altered his under oath statements on the witness stand.'

"Kramer brought a section 425.16 motion to strike the complaint. The court denied the motion, concluding that although Kramer had sustained her burden of showing the complaint fell within the scope of section 425.16, subdivision (e)(3) and (4), Kelman

¹ The second paragraph devoted to Kelman and the disputed paper stated: "In 2003, with the involvement of the US Chamber of Commerce and ex-developer, US Congressman Gary Miller (R-CA), the GlobalTox paper was disseminated to the real estate, mortgage and building industries' associations. A version of the Manhattan Institute commissioned piece may also be found as a position statement on the website of a United States medical policy-writing body, the American College of [Occupational and Environmental Medicine]."

and GlobalTox had sustained their burden of showing a probability they would prevail on their libel claim. The court stated the gist of the press release statement was that Kelman committed perjury in the *Haynes* case, lied about a subject related to his profession, or 'accepted a bribe from a political organization to falsify a peer-reviewed scientific research position statement.' The court stated there was admissible evidence to show Kramer's statement was false; that Kelman was clarifying his testimony under oath, rather than altering it; and to show Kramer acted with actual malice." (*Kelman v. Kramer I*, *supra*, D047758, fn. omitted.)

In our opinion in *Kelman v. Kramer I*, we affirmed the trial court's order denying Kramer's motion to strike. We agreed with Kramer that her press release fell within the scope of the anti-SLAPP statute, Code of Civil Procedure section 425.16, subdivision (e)(3) and (4), in that it was a statement made in a public forum concerning an issue of public interest and was published in furtherance of Kramer's constitutional right to free speech in connection with a public issue. However, we found that Kelman had established a prima facie case of libel.

Importantly, with respect to whether Kramer's characterization of Kelman's testimony was false, we found that looking at Kelman's testimony as a whole a jury might find Kramer's press release falsely portrayed Kelman's explanation of his prior deposition testimony.

"Kramer contends 'to a lay person (and anyone else who looks at the statement without an agenda) it clearly appears that Plaintiff Bruce Kelman altered his testimony under oath.' She asserts the statement was true, as a matter of law. We disagree.

Whether the statement was true or false raises a question of fact." (Kelman V. Kramer I, *supra*, D047758, fn. omitted, italics added.)

We also found sufficient evidence Kramer either knew the statement about Kelman was false or published it with reckless disregard for whether it was false. We stated: "The existence of actual malice turns on the defendant's subjective belief as to the truthfulness of the allegedly false statement. [Citation.] A state of mind, like malice, 'can seldom be proved by direct evidence. It must be inferred from objective or external circumstantial evidence.' [Citation.] Relevant evidence may include the defendant's anger or hostility toward the plaintiff, a failure to investigate, and subsequent conduct by the plaintiff. [Citations.]" We found that in light of the public record of Kelman's testimony in the Haynes trial, Kelman's role as a defense expert in Kramer's own lawsuit, and hostile statements Kramer made thereafter about Kelman, a jury could conclude Kramer had acted with constitutional malice in publishing the post.

In rejecting Kramer's claim her statement was protected by the privilege set forth in Civil Code section 47, subdivision (d)(1), we stated: "Kramer contends her press release was privileged under Civil Code section 47, subdivision (d)(1), which provides a privilege for 'a fair and true report in, or a communication to, a public journal, of . . . a judicial, . . . or . . . of anything said in the course thereof' *As we explained above, Kelman and GlobalTox presented admissible evidence showing Kramer's statement in the press release was neither a fair nor true report of Kelman's testimony during the Haynes hearing. Therefore, this privilege does not support granting her anti-SLAPP motion.*" (Kelman v. Kramer I, *supra*, D047758, italics added.)

As we indicated at the outset, on remand following our judgment affirming the order denying the motion to strike, the jury found Kramer libeled Kelman. In particular, the jury found the statements in the press release were false and clear and convincing evidence Kramer either knew her statements were untrue or had serious doubts about the truth of the statements. The jury awarded Kelman the one dollar in nominal damages he had requested. However, the jury found Kramer's defamatory statement was not made to anyone who understood it as referring to GlobalTox. The court entered judgment in favor of Kelman and awarded him \$7,252.65 in costs. The trial court's judgment awarded GlobalTox no damages and by way of a postjudgment proceeding the trial court awarded Kramer \$2,545.28 in costs.

DISCUSSION

I

Law of the Case

Because, as we stated, for the most part Kramer's appeal raises issues which we considered in *Kelman v. Kramer I*, we must first address the impact that opinion has on the issues she raises here. "[T]he decision of an appellate court, stating a rule of law necessary to the decision of the case, conclusively establishes that rule and makes it determinative of the rights of the same parties in any subsequent retrial or appeal in the same case." (*Yu v. Signet Bank/Virginia* (2002) 103 Cal.App.4th 298, 309; see also *Bergman v. Drum* (2005) 129 Cal.App.4th 11, 18-19.)

There are of course exceptions to the law of the case doctrine. "The doctrine of the law of the case is recognized as a harsh one (2 Cal. Jur. 947) and the modern view is

that it should not be adhered to when the application of it results in a manifestly unjust decision. [Citation.] However, it is generally followed in this state. But a court is not absolutely precluded by the law of the case from reconsidering questions decided upon a former appeal. Procedure and not jurisdiction is involved. Where there are exceptional circumstances, a court which is looking to a just determination of the rights of the parties to the litigation and not merely to rules of practice, may and should decide the case without regard to what has gone before." (*England v. Hospital of the Good Samaritan* (1939) 14 Cal.2d 791, 795.)

"The principal ground for making an exception to the doctrine of law of the case is an intervening or contemporaneous change in the law." (*Clemente v. State of California* (1985) 40 Cal.3d 202, 212.) The doctrine can also be disregarded to avoid an unjust decision. However, "[I]f the rule is to be other than an empty formalism more must be shown than that a court on a subsequent appeal disagrees with a prior appellate determination. Otherwise the doctrine would lose all vitality . . . since an unsuccessful petitioner for pretrial writ review could always maintain on subsequent appeal that the prior adjudication resulted in an 'unjust decision.' [¶] We do not propose to catalogue or to attempt to conjure up all possible circumstances under which the 'unjust decision' exception might validly operate, but judicial order demands there must at least be demonstrated a manifest misapplication of existing principles resulting in substantial injustice before an appellate court is free to disregard the legal determination made in a prior appellate proceeding." (*People v. Shuey* (1975) 13 Cal.3d 835, 846; see also *Yu v. Signet Bank/Virginia, supra*, 103 Cal.App.4th at p. 309.)

The record here will not support an exception to application of the law of the case doctrine. There has been no intervening change in the law of defamation in general or with respect to the fair reporting privilege in particular. Our review of our prior opinion does not show our analysis of the evidence of falsity and malice or our application of the fair reporting privilege were in any sense manifestly incorrect or radically deviated from any well-established principle of law. Thus any disagreement we might entertain with respect to our prior disposition would be no more than that: a disagreement. Given that circumstance and the fact that only nominal damages were awarded against Kramer, the value of promoting stability in decision making far outweighs the value of any reevaluation of the merits of our prior disposition. (See *People v. Shuey*, *supra* 13 Cal.3d at p. 846.) Accordingly, on appeal Kramer is bound by our prior determinations of law.

Application of the law of the case doctrine disposes of Kramer's initial argument on appeal that the trial court erred in relying on our prior opinion in framing the issues tried on remand. The trial court was bound by our determinations of law and thus did not err in relying on those determinations in framing the issues for trial. (*People v. Shuey*, *supra*, 13 Cal.3d at p. 846.)

The law of the case doctrine also precludes Kramer's arguments that the trial court erred in determining, by way of its order denying Kramer's motion for judgment notwithstanding the verdict, that there was sufficient evidence her statement about Kelman was false and that she knew or acted with reckless disregard as to whether the statement was false. In *Kelman v. Kramer I* we determined the record presented at that point was sufficient to sustain findings of falsity and actual malice. Because there was no

material difference in the evidence presented at trial, under law of the case the trial court was bound, as are we, by our prior determination that there was sufficient evidence of falsity and malice.

We recognize that with respect to malice "courts are required to independently examine the record to determine whether it provides clear and convincing proof thereof." (*McCoy v. Hearst Corp.* (1991) 227 Cal.App.3d 1657, 1664.) However, in *Kelman v. Kramer I* we expressly rejected Kramer's argument that such independent review entitled her to judgment. Rather, we found that such review had taken place in the trial court and, following our own detailed analysis of the evidence of Kramer's hostility towards Kelman, we left the trial court's determination undisturbed. Given that disposition, we can only conclude that panel which decided *Kelman v. Kramer I* conducted the required independent review of the record and agreed with the trial court that, as the record stood at that point, there was clear and convincing evidence of malice. Because, as we have indicated the record of malice presented at trial was just as fulsome as the one considered in *Kelman v. Kramer I*, we cannot depart from our prior decision without also departing from the doctrine of law of the case.

Finally, because we found in *Kelman v. Kramer I* that evidence of the falsity of Kramer's statement was sufficient to defeat the fair reporting privilege, the trial court, confronted with largely the same evidence, was bound by jury's falsity determination to find that the privilege did not apply. We too are bound by that determination.

II

Excluded Evidence

In addition to the issues which were determined in *Kelman v. Kramer I*, on appeal Kramer also argues the trial court erred in excluding evidence which she contends would have shown that Kelman's scientific conclusions have been severely criticized by other, more credible members of the scientific community and that Kramer has been widely recognized as a crusading whistleblower with respect to toxic mold. The trial court correctly excluded this evidence as irrelevant. Kelman's libel claim did not put in issue the validity of his scientific conclusions or the sincerity of Kramer's conflicting views. Kelman's claim was based on his far narrower contention that in reporting his testimony in the Haynes trial, Kramer falsely implied that he had committed perjury and that Kramer knew the implication was false or was reckless in creating it. Neither the validity of Kelman's scientific conclusions nor the sincerity of Kramer's views was relevant to determination of those narrower issues. Thus the trial court did not abuse its discretion in excluding the evidence Kramer offered.

III

Costs

Kelman filed a cost bill of \$7,252.65 on October 14, 2008. On October 31, 2008, Kramer filed a motion to strike Kelman's costs and have costs awarded to her as against GlobalTox. In her motion, she argued that as the prevailing party as against GlobalTox she was entitled to an award of costs. With respect to Kelman's cost bill, the only

objection she raised was her contention the verdict in Kelman's favor was defective. In her motion, she did not object to any particular item in Kelman's cost bill.

On December 12, 2008, the trial court awarded Kelman the \$7,252.65 in costs he claimed. The trial court also permitted Kramer to file a memorandum of costs as against GlobalTox.

Thereafter, Kramer filed a motion for costs and GlobalTox filed a motion to tax the costs, in which among other matters GlobalTox argued that Kramer only prevailed against one defendant and her deposition costs of \$3,800 should be reduced by half. The trial court, with a different trial judge presiding, heard Kramer's cost motion on April 3, 2009, and awarded her a total of \$2,545.28. In particular, the trial court agreed with Kelman that Kramer should only be permitted to recover one-half of her deposition costs.

Kramer does not challenge as inadequate the trial court's award to her of costs as against GlobalTox. She does however appear to contend that, just as the deposition costs she claimed were reduced by one-half, Kelman's claimed costs should also be reduced by one-half.

On this record we cannot disturb the trial court's award of costs to Kelman. At the time Kelman's costs were litigated, Kramer made no objection to any particular item of costs and did not argue that any or all items Kelman claimed were attributable to GlobalTox. Thus, as Kelman points out, Kramer did not comply with the requirements of rule 3.1700(b)(2), California Rules of Court, that her objection to costs "*must* refer to each item objected to . . . and *must* state why the item is objectionable." (Italics added.) Because Kramer made no such objection, Kelman never was given the opportunity to

rebut Kramer's contention that half of all the costs Kelman claimed were attributable to GlobalTox and the time for making such an objection has passed. (Rule 3.1700(b)(1), (3).)

Judgment affirmed. Respondents to recover their costs of appeal.

COURT OF APPEAL, FOURTH APPELLATE DISTRICT

DIVISION ONE

STATE OF CALIFORNIA

BRUCE J. KELMAN et al.,

Plaintiffs and Respondents,

v.

SHARON KRAMER,

Defendant and Appellant.

D047758

(Super. Ct. No. GIN044539)

APPEAL from an order of the Superior Court of San Diego County, Michael B. Orfield, Judge. Affirmed.

Sharon Kramer appeals an order denying her anti-SLAPP (strategic lawsuit against public participation) motion (Code Civ. Proc.,¹ § 425.16) to strike a complaint for libel

¹ All statutory references are to the Code of Civil Procedure unless otherwise indicated.

by Bruce J. Kelman and GlobalTox, Inc. (GlobalTox).² She contends the trial court erred in finding Kelman and GlobalTox were likely to prevail on their libel claim. She claims she made a true statement, she acted without malice, the court applied the wrong standard, and her statement was privileged. She also contends the court erred by broadening the scope of the complaint and excluding evidence. We affirm the order.

FACTUAL AND PROCEDURAL BACKGROUND

Kelman is a scientist with a Ph.D. in toxicology who has written, consulted, and testified on various topics, including about the toxicology of indoor mold. He is also the president of GlobalTox, which provides research and consulting services, including on toxicology, industrial hygiene, medical toxicology, and risk assessment. Kramer is "active in mold support and the pressing issue of mold causation of physical injury" after having experienced indoor mold in her own home.

In June 2004, Kelman gave a deposition in an Arizona case, *Kilian v. Equity Residential Trust* (U.S. Dist. Ct., D. Ariz., No. CIV 02-1272-PHX-FJM). During the deposition, Kelman testified about his involvement with a paper on the health risks of mold that he co-authored with two others for the American College of Occupational and Environmental Medicine (ACOEM). This paper was reviewed by his peers in the scientific community. Later he wrote a nontechnical version of the paper for the Manhattan Institute. During the deposition, Kelman, inter alia, denied including in the

² GlobalTox recently changed its name to VeriTox, but since GlobalTox was the name used below, we shall continue to refer to the company by that name.

Manhattan Institute version argumentative language that had been rejected during the peer review process at ACOEM and testified that if there were any sentences that had been removed from the ACOEM version that appeared in the Manhattan Institute version, they "certainly weren't very many." The following exchange then occurred:

"Q. And that new version that you did for the Manhattan Institute, your company, GlobalTox, got paid \$40,000, correct?

"A. Yes. The company was paid \$40,000 for it."

In February 2005, Kelman testified during a hearing in an Oregon State court case, *Haynes v. Adair Homes, Inc.*, (No. CCV0211573) (*Haynes*). The Haynes family sued a builder alleging construction defects in their home resulted in mold growing in the house and causing physical injury to Renee Haynes and the Haynes's two young children. During the hearing, Kelman testified on cross-examination about his work on the ACOEM and Manhattan Institute papers. The libel claim in the present case concerns whether Kelman testified consistently with his *Kilian* testimony about being paid by the Manhattan Institute during his testimony at the *Haynes* hearing:

"MR. VANCE: Okay. Now, this revision of the [ACOEM paper] state --

"BRUCE J. KELMAN: What revision?

"MR. VANCE: The revision -- you said that you were instrumental in writing the statement, and then later on you said you and a couple other colleagues wrote a revision of that statement, isn't that true?

"BRUCE J. KELMAN: No, I didn't say that.

"MR. VANCE: Well --

"BRUCE J. KELMAN: To help you out I said there were revisions of the position statement that went on after we had turned in the first draft.

"MR. VANCE: And, you participated in those revisions?

"BRUCE J. KELMAN: Well, of course, as one of the authors.

"MR. VANCE: All right. And, isn't it true that the Manhattan Institute paid GlobalTox \$40,000 to make revisions in that statement?

"BRUCE J. KELMAN: That is one of the most ridiculous statements I have ever heard.

"MR. VANCE: Well, you admitted it in the Killian [sic] deposition, sir.

"BRUCE J. KELMAN: No. I did not.

".....

"MR. VANCE: Would you read into the record the highlighted portions of that transcript, sir?

"BRUCE J. KELMAN: "And, that new version that you did for the Manhattan Institute, your company, GlobalTox got paid \$40,000. Correct. Yes, the company was paid \$40,000 for it.

"MR. VANCE: Thank you. So, you participated in writing the study, your company was paid very handsomely for it, and then you go out and you testify around a country legitimizing the study that you wrote. Isn't that a conflict of interest, sir?

"BRUCE J. KELMAN: Sir, that is a complete lie.

"MR. VANCE: Well, you[re] vouching for your own self [inaudible]. You write a study and you say, 'And, it's an accurate study.'

"BRUCE J. KELMAN: We were not paid for that. In fact, the sequence was in February of 2002, Dr. Brian Harden, and [inaudible] surgeon general that works with me, was asked by

American College of Occupational and Environmental Medicine to draft a position statement for consideration by the college. He contacted Dr. Andrew Saxton, who is the head of immunology at UC -- clinical immunology at UCLA and myself, because he felt he couldn't do that by himself. The position statement was published on the web in October of 2002. In April of 2003 I was contacted by the Manhattan Institute and asked to write a lay version of what we had said in the ACOEM paper -- I'm sorry, the American College of Occupational and Environmental Medicine position statement. When I was initially contacted I said, 'No.' For the amount of effort it takes to write a paper I can do another scientific publication. They then came back a few weeks later and said, "If we compensate you for your time, will you write the paper?" And, at that point I said, 'Yes, as a group.' The published version, not the web version, but the published version of the ACOEM paper came out in the Journal of Environmental and Occupational Medicine in May. And, then sometime after that, I think it was in July, this lay translation came out. They're two different papers, two different activities. The -- we would have never been contacted to do a translation of a document that had already been prepared, if it hadn't already been prepared.

"MR. VANCE: Well, your testimony just a second ago that you read into the records, you stated in that other case, you said, "Yes. GlobalTox was paid \$40,000 by the Manhattan Institute to write a new version of the ACOEM paper." Isn't that true, sir? (86/57)

"BRUCE J. KELMAN: I just said, we were asked to do a lay translation, cuz the ACOEM paper is meant for physicians, and it was not accessible to the general public.

"MR. VANCE: I have no further questions." (*Italics added.*)

In June 2005, Kramer wrote a press release about the *Haynes* case and posted it on PRWeb, an Internet site. This press release was later also posted on another Internet site, ArriveNet. One paragraph of the press release was devoted to Kelman's testimony:

"Dr. Bruce Kelman of GlobalTox, Inc., a Washington based environmental risk management company, testified as an expert witness for the defense, as he does in mold cases throughout the country. Upon viewing documents presented by the Hayne's attorney of Kelman's prior testimony from a case in Arizona, Dr.

Kelman *altered his under oath statements on the witness stand*. He admitted the Manhattan Institute, a national political think-tank, paid GlobalTox \$40,000 to write a position paper regarding the potential health risks of toxic mold exposure. Although much medical research finds otherwise, the controversial piece claims that it is not plausible the types of illnesses experienced by the Haynes family and reported by thousands from across the U.S. could be caused by 'toxic mold' exposure in homes, schools or office buildings." (Italics added.)

Kramer's claim Kelman had "altered his under oath statements on the witness stand" focuses on Kelman's testimony about being paid by the Manhattan Institute. She claims the portion of Kelman's testimony in the *Haynes* hearing that we italicized supports the statement in her press release.

Kelman and GlobalTox sued Kramer for libel based on the statement in the press release that "Kelman altered his under oath statements on the witness stand."

Kramer brought a section 425.16 motion to strike the complaint. The court denied the motion, concluding that although Kramer had sustained her burden of showing the complaint fell within the scope of section 425.16, subdivision (e)(3) and (4), Kelman and GlobalTox had sustained their burden of showing a probability they would prevail on their libel claim. The court stated the gist of the press release statement was that Kelman committed perjury in the *Haynes* case, lied about a subject related to his profession, or "accepted a bribe from a political organization to falsify a peer-reviewed scientific research position statement." The court stated there was admissible evidence to show

Kramer's statement was false; that Kelman was clarifying his testimony under oath, rather than altering it; and to show Kramer acted with actual malice.³

DISCUSSION

I

Anti-Slapp Law

"Section 425.16, known as the anti-SLAPP statute, permits a court to dismiss certain types of nonmeritorious claims early in the litigation." (*Chavez v. Mendoza* (2001) 94 Cal.App.4th 1083, 1087.)

In determining whether a motion to strike should be granted under the anti-SLAPP statute, "[f]irst, the court decides whether the defendant has made a threshold showing that the challenged cause of action is one arising from protected activity. (§ 425.16, subd. (b)(1).) 'A defendant meets this burden by demonstrating that the act underlying the plaintiff's cause fits one of the categories spelled out in section 425.16, subdivision (e).' " (*Navellier v. Sletten* (2002) 29 Cal.4th 82, 88.) Among the categories spelled out in section 425.16, subdivision (e) are: "any written or oral statement or writing made in a place open to the public or a public forum in connection with an issue of public interest" (§ 425.16, subd. (e)(3)) and an " 'act in furtherance of a person's right of petition or free

³ Kramer asked us to take judicial notice of additional documents, including the complaint and an excerpt from Kelman's deposition in her lawsuit against her insurance company. We decline to do so as it does not appear these items were presented to the trial court.

speech under the United States or California Constitution in connection with a public issue.' " (§ 425.16, subd. (e).)

If the court finds that the defendant has made a showing that the complaint or cause of action is within the scope of the anti-SLAPP statute, the burden shifts "and the plaintiff must show a probability of prevailing on the claim." (*Nagel v. Twin Laboratories, Inc.* (2003) 109 Cal.App.4th 39, 45.)

"Only a cause of action that satisfies both prongs of the anti-SLAPP statute — i.e., that arises from protected speech or petitioning and lacks even minimal merit — is a SLAPP, subject to being stricken under the statute." (*Navellier v. Sletten, supra*, 29 Cal.4th 82, 89, italics omitted.) On appeal we apply a de novo standard of review. (*Padres, L.P. v. Henderson* (2003) 114 Cal.App.4th 495, 509; *Governor Gray Davis Com. v. American Taxpayers Alliance* (2002) 102 Cal.App.4th 449, 456.)

II

Protected Activity

Here the trial court found and the parties do not dispute that Kelman's complaint fell within the scope of the anti-SLAPP statute. The statement at issue was made in the context of a press release, posted on a public Internet forum and concerned litigation about a public issue, that is, the possible health risks associated with toxic indoor mold. Kramer's statement fell within the scope of section 425.16, subdivision (e)(3) and (4): It was made in a public forum concerning an issue of public interest and was an act in furtherance of her constitutional right to free speech in connection with a public issue. Thus, Kramer met the first prong of the anti-SLAPP statute. The burden of proof then

shifted to Kelman to establish a probability of prevailing on his claim that Kramer's speech was not protected speech because it was libelous.

III

Falsity of Statement

Kramer contends "to a lay person (and anyone else who looks at the statement without an agenda) it clearly appears that Plaintiff Bruce Kelman altered his testimony under oath."⁴ She asserts the statement was true, as a matter of law. We disagree. Whether the statement was true or false raises a question of fact.

To prove a cause of action for libel, an intentional tort, the plaintiff must show: a publication, in writing, that is false, defamatory and unprivileged and has a natural tendency to injure or that causes special damage to a person. (5 Witkin, Summary of Cal. Law (10th ed. 2005) Torts, §§ 529-530, pp. 782-783; Civ. Code, §§ 45, 46.) Truth is a complete defense to liability for defamation. (*Philadelphia Newspapers, Inc. v. Hepps* (1986) 475 U.S. 767, 768-769; *Gantry Constr. Co. v. American Pipe & Constr. Co.* (1975) 49 Cal.App.3d 186, 191-192.) The truth defense requires only a showing that the substance, gist or sting of the communication or statements is true. (*Gantry Constr. Co. v. American Pipe & Constr. Co.*, at p. 194.)

The record in the *Haynes* case indicates that prior to being asked whether "the

⁴ Kramer also contends GlobalTox has no standing to sue for libel because it was not defamed. We disagree. The statement at issue identified Kelman with GlobalTox and therefore, if false, the statement injured the reputations of both Kelman and GlobalTox.

Manhattan Institute paid GlobalTox \$40,000 to make revisions in that statement," Kelman was being cross-examined about revisions to the ACOEM paper and stated he had participated in making revisions after turning in the first draft. In context, the question about being paid to "make revisions in that statement" was ambiguous and a reasonable jury could conclude Kelman interpreted the question as asking whether he had been paid \$40,000 by the Manhattan Institute to make revisions in the ACOEM paper itself, a suggestion Kelman found offensive. A short while later, Kelman explained how the Manhattan Institute paper was an entirely separate project — the writing of a lay translation of the ACOEM paper — and he readily admitted he was paid by the Manhattan Institute to write the lay translation.

This testimony supports a conclusion Kelman did not deny he had been paid by the Manhattan Institute to write a paper, but only denied being paid by the Manhattan Institute to make revisions in the paper issued by ACOEM. He admitted being paid by the Manhattan Institute to write a lay translation. The fact that Kelman did not clarify that he received payment from the Manhattan Institute until after being confronted with the *Kilian* deposition testimony could be viewed by a reasonable jury as resulting from the poor phrasing of the question rather than from an attempt to deny payment.

In sum, Kelman and GlobalTox presented sufficient evidence to satisfy a prima facie showing the statement in the press release was false.

IV

Malice

Kramer contends the court erred in finding Kelman made a prima facie showing sufficient to support a finding by clear and convincing evidence that she acted with malice.

As Kelman concedes, he was a limited public figure⁵ and therefore it was necessary for him to show not only that the statement was false but also to show by clear and convincing evidence that Kramer acted with malice. (*Colt v. Freedom Communications, Inc.*, *supra*, 109 Cal.App.4th 1551, 1557; *Khawar v. Globe Internat., Inc.* (1998) 19 Cal.4th 254, 279.) Malice exists when an individual publishes a falsehood knowing it was false or with reckless disregard for whether it was true or not. (*Sipple v. Foundation For Nat. Progress* (1999) 71 Cal.App.4th 226, 247.) The existence of actual malice turns on the defendant's subjective belief as to the truthfulness of the allegedly false statement. (*Reader's Digest Assn. v. Superior Court* (1984) 37 Cal.3d 244, 257.) A state of mind, like malice, "can seldom be proved by direct evidence. It must be inferred from objective or external circumstantial evidence." (*Drum v. Bleau, Fox & Associates* (2003) 107 Cal.App.4th 1009, 1021, disapproved on other grounds in *Rusheen v. Cohen* (2006) 37 Cal.4th 1048, 1065.) Relevant evidence may include the defendant's anger or

⁵ "The limited purpose public figure is an individual who voluntarily injects him or herself or is drawn into a specific public controversy, thereby becoming a public figure on a limited range of issues." (*Ampex Corp. v. Cargle* (2005) 128 Cal.App.4th 1569, 1577.)

hostility toward the plaintiff, a failure to investigate, and subsequent conduct by the plaintiff. (*Reader's Digest Assn. v. Superior Court*, at p. 257; *Tranchina v. Arcinas* (1947) 78 Cal.App.2d 522, 524.)

Here, Kelman's statements were made during a recorded court hearing and thus, Kramer could or did view the statements in context. A reasonable jury could conclude a simple investigation of Kelman's testimony in context would have revealed the gist of Kelman's testimony did not involve any alteration of testimony given under oath or conduct amounting to perjury.

Additionally, there was other evidence presented which could support a finding Kramer had a certain animosity against Kelman. Kelman gave an expert opinion in Kramer's lawsuit against her insurance company seeking damages caused by the presence of mold in her home. Kelman stated there did not appear to be a greatly increased level of risk of mold inside the home compared to the levels in the air outside the home. While the Kramer family eventually settled and recovered damages from the insurance company, a reasonable jury could infer that Kramer harbored some animosity toward Kelman for providing expert services to the insurance company and not supporting her position.

A jury could also infer animosity against Kelman by Kramer's conduct two months before the press release was issued. In January 2005, after learning the American Industrial Hygiene Association (AIHA) had invited GlobalTox to participate in a teleweb conference, Kramer sent two e-mails to AIHA, one asking, "What could possibly be your

justification for affiliating with the ilks [sic] of GlobalTox," the other containing the following paragraph:⁶

"Why is a company that is known to provide expert insurance defense litigation being allowed to hold an online seminar for Industrial Hygienists? Is the goal of the AIHA to promote the safety of mankind as your code of ethics states? Or is the goal of the AIHA to limit financial liability for those who support your organization? Do children of industrial hygienists [sic] attend elementary schools? Shame on you for perpetuating this perverse situation. *May your children rot in hell*, along with all the other innocent children you are hurting." (Italics added.)

Further, in determining whether there was a prima facie showing of malice, the trial court also relied on the general tone of Kramer's declarations. These declarations reflect a person who, motivated by personally having suffered from mold problems, is crusading against toxic mold and against those individuals and organizations who, in her opinion, unjustifiably minimize the dangers of indoor mold. Although this case involves only the issue of whether the statement "Kelman altered his under oath statements on the witness stand" was false and made with malice, Kramer's declarations are full of language deriding the positions of Kelman, GlobalTox, ACOEM and the Manhattan Institute. For example, Kramer states people were "physically damaged by the ACOEM Statement itself" that the ACOEM statement "is a document of scant scientific

⁶ On appeal, Kramer contends these e-mails constituted "hearsay" and therefore were not admissible evidence. Since she did not object on this basis below, she is precluded from raising this issue on appeal. (Evid. Code, § 353, subd. (a); *Coit Drapery Cleaners, Inc. v. Sequoia Ins. Co.* (1993) 14 Cal.App.4th 1595, 1611.) In any event, the evidence was not offered to prove the truth of the matter stated so it was not subject to exclusion as hearsay.

foundation; authored by expert defense witnesses; legitimized by the inner circle of an influential medical association, whose members often times evaluate mold victims o[n] behalf of insurers and employers; and promoted by stakeholder industries for the purpose of financial gain at the expense of the lives of others."

Kramer also contends the trial court applied the wrong standard in determining whether Kelman had met his burden of making a prima facie showing of malice, pointing out that Kelman was required to make a prima facie showing that there existed *clear and convincing* evidence to support a finding of malice but the court in its tentative decision referred to the defendants having "sustained their burden of proof to establish a '*probability*' that they will prevail on their sole cause of action for Libel (per Se)" and in making its ruling at the hearing stated "there is a reasonable *probability* that the plaintiffs will prevail on their libel cause of action." (Italics added.) We find no error here. The court's application of a "probability" or "reasonable probability" standard properly reflects the standard stated in section 425.16, subdivision (b)(1). Section 425.16, subdivision (b)(1) states, that an anti-SLAPP motion should not be granted if "the court determines that the plaintiff has established that there is a *probability* that the plaintiff will prevail on the claim." (Italics added.) Encompassed within this standard in the context of this case is that there was a probability Kelman would prevail in establishing by clear and convincing evidence Kramer acted with malice.

Privileges

(A) Civil Code Section 47, Subdivision (c)

Kramer contends her statement was privileged under Civil Code section 47, subdivision (c), which states:

"A privileged publication or broadcast is one made:

".....

"(c) In a communication, without malice, to a person interested therein, (1) by one who is also interested, or (2) by one who stands in such a relation to the person interested as to afford a reasonable ground for supposing the motive for the communication to be innocent, or (3) who is requested by the person interested to give the information. This subdivision applies to and includes a communication concerning the job performance or qualifications of an applicant for employment, based upon credible evidence, made without malice, by a current or former employer of the applicant to, and upon request of, one whom the employer reasonably believes is a prospective employer of the applicant. This subdivision authorizes a current or former employer, or the employer's agent, to answer whether or not the employer would rehire a current or former employee. This subdivision shall not apply to a communication concerning the speech or activities of an applicant for employment if the speech or activities are constitutionally protected, or otherwise protected by Section 527.3 of the Code of Civil Procedure or any other provision of law."

To support her argument, Kramer merely quotes from *Kashian v. Harriman* (2002) 98 Cal.App.4th 892, 914, which explains this privilege applies when the parties to the communication have " 'a contractual, business or similar relationship, such as "between partners, corporate officers and members of incorporated associations" or between "union members [and] union officers." ' " She states she meets this privilege

"insofar as her protected audience are those injured victims of toxic mold exposure and advocates for those victims." Kramer, however, did not send out the press release to a select few, she broadly published it on the Internet and made it available to the general public. Thus, this privilege does not apply.

(B) Civil Code Section 47, Subdivision (d)(1)

Kramer contends her press release was privileged under Civil Code section 47, subdivision (d)(1), which provides a privilege for "a fair and true report in, or a communication to, a public journal, of . . . a judicial, . . . or . . . of anything said in the course thereof" As we explained above, Kelman and GlobalTox presented admissible evidence showing Kramer's statement in the press release was neither a fair nor true report of Kelman's testimony during the *Haynes* hearing. Therefore, this privilege does not support granting her anti-SLAPP motion.

VI

Additional Allegation

Kramer contends "[t]he court created an additional aspect of the allegedly libelous statement by holding that it could be read as an allegation of bribery." She contends such a finding is unsupported by the evidence.

The trial court drew an inference that Kramer was intending to imply that the payment for the revisions was a bribe to obtain certain revisions favorable to the defense position in toxic mold litigation. However, the statement in her press release at issue here was limited to stating Kelman had altered his under oath testimony and did not refer to any particular testimony. As published, it was an allegation of perjury, not of bribery.

Nonetheless, this error does not require reversal since the trial court's ruling on the basis of perjury is well supported by the record and justified denial of the anti-SLAPP motion.

VII

Exclusion of Evidence

Kramer contends the trial court erred in sustaining the plaintiffs' objections to her declarations and exhibits on the basis of relevance, hearsay and foundation.

(A) Trial Transcript - Kelman's Testimony in the Haynes Case

Kramer argues she cites to Kelman's testimony in the *Haynes* case "are not hearsay because they constitute admissions against interest and in portions thereof prior inconsistent statements which show alterations of his under oath testimony" She provides only one example: Kelman's "change in testimony regarding the extent of his involvement in the preparation of the ACOEM statement." She neither provides any citations to the record nor further argument.

As appellant, Kramer has the burden of showing error. (See *Howard v. Thrifty Drug & Discount Stores* (1995) 10 Cal.4th 424, 443.) "The reviewing court is not required to make an independent, unassisted study of the record in search of error or grounds to support the judgment. It is entitled to the assistance of counsel." (9 Witkin, Cal. Procedure (4th ed. 1997) Appeal, § 594, p. 627.) We may ignore points that are not argued or supported by citations to authorities or the record. (*Kim v. Sumitomo Bank* (1993) 17 Cal.App.4th 974, 979.)

Kramer has failed to meet her burden of establishing error. She has not provided any description of the testimony she believed was improperly excluded — except for the one example — and no citations to the record or further argument to support her claim of error. We decline to sift through the record for her exhibits to see if any error might have occurred. Indeed, we are uncertain where to find her one example. We note that if the example was intended to refer to Kelman's testimony on pages 53 to 59 of the transcript of the *Haynes* transcript, there was no objection to that testimony; the objection was to Kramer's restatement of the testimony in her declaration.

(B) Prior Inconsistent Statements

Kramer contends the court erroneously excluded Kelman's "prior inconsistent e-mail on that same issue" — presumably, the extent of his involvement in preparing the ACOEM statement — because it was "an admission against interest and directly impeaches his declaration in opposition."

Again, Kramer has failed to meet her burden of showing error. We decline to wade through the record to find this e-mail or the portion of the declaration Kramer claims it somehow impeaches, to see if there was an objection to this e-mail, and to determine if there was error. Moreover, Kramer's cryptic argument fails to explain how the e-mail was material or relevant to the issues at hand, that is, whether Kelman altered his testimony about receiving payment from the Manhattan Institute or whether she acted with malice.

(C) Coconspirator Admissions

Kramer contends the court erred in excluding "[t]he e-mails of various ACOEM board members" because they were "co-conspirator admissions (with regard to the true intention o[r] purpose for its creation, use, and manner of preparation of the ACOEM statement) binding upon Kelman which also act as impeachment of his declaration regarding the true reason for the ACOEM report creation, the limited scope of defense oriented 'peer review,' and the scope of his involvement in the creation of the document." She argues various exceptions to the hearsay rule apply including state of mind (Evid. Code, § 1250), coconspirator statements (*id.*, § 1223), and admissions by a party (*id.*, § 1220).

Initially, we note this lawsuit is not about a conspiracy. This lawsuit was filed by Kelman and GlobalTox alleging one statement in a press release was libelous. Thus, conspiracy issues are not relevant.

Kramer's brief does not clearly refer to any e-mails of various ACOEM board members. Moreover, the "evidence" she details involves collateral matters, such as whether the ACOEM paper was intended to be a defense document for litigation, whether it was "peer-reviewed by 100's of physicians," whether Kelman's interpretation of the ACOEM findings was correct, whether Kelman first heard of Kramer in 2003 or 2002, whether Kramer's e-mail to AIHA was inflammatory, whether she posted the press release to ArriveNet, and whether she had engaged in a campaign against Kelman. We fail to see how exclusion of this evidence would have changed the result, that is,

established that Kramer's statement in the press release, as a matter of law, was true and made without malice.

DISPOSITION

The order is affirmed. Kelman is awarded costs on appeal.

)
SHARON KRAMER, and DOES 1) PLAINTIFF GLOBALTOX, INC.'S
through 20, inclusive,) OPPOSITION TO DEFENDANT'S
) AMENDED MOTION FOR COSTS AND
Defendants.) ATTORNEY'S FEES
)

Trial Date: August 18, 2008

Hearing Date: March 9, 2009

Time: 9:00 a.m.

Department: 31

Defendant Sharon Kramer's "Amended Motion for Costs and Attorney's Fees" is untimely, procedurally improper, and unsupported by either law or admissible evidence.

In fact, Kramer's instant motion is merely another version of her deficient Memorandum of Costs. In response to that Memorandum, GlobalTox filed its Motion to Tax Costs

1 Requested by Defendant Sharon Kramer, which is scheduled for
2 hearing on March 9, 2009.

3 To save space, GlobalTox incorporates herein by
4 reference as though set forth at length the factual and
5 procedural background described in its Motion to Tax Costs.
6 GlobalTox requests that the Court take judicial notice of its
7 files regarding that Motion.
8

9 **I. KRAMER'S ATTEMPT TO CIRCUMVENT THE PROCEDURAL**
10 **REQUIREMENTS REGARDING RECOVERY OF COSTS MUST BE**
11 **REJECTED**

12 California Rule of Court 3.1700(a) provides the
13 exclusive means for requesting pre-trial costs. The claiming
14 party must file a verified memorandum of costs within 15 days
15 after the date of mailing the notice of entry of judgment.
16 There is no alternative to that procedure. Accordingly,
17 Kramer's current motion for costs, filed more than 15 days
18 after notice of entry of judgment was mailed, has no legal
19 basis and is a procedural nullity that must be disregarded.

20 "[T]he procedures for obtaining costs are technical and
21 mandatory." Boonyarit v. Payless Shoesource, Inc. (2006) 145
22 Cal.App.4th 1188.
23

24 Furthermore, even if the mandatory requirements of Rule
25 of Court 3.1700(a) are ignored, Kramer has not substantiated
26

1 her costs. C.C.P. § 1033.5(c) states that to be allowed,
2 costs must be reasonable in amount, and also "reasonably
3 necessary to the conduct of the litigation rather than merely
4 convenient or beneficial to its preparation." (C.C.P. §
5 1033.5(c)(2)(3).)

6 Kramer rides roughshod over this statutory requirement.

7
8 GlobalTox objects to all of her "exhibits" on the
9 grounds that none of them is authenticated, that all lack
10 foundation and that all are inadmissible hearsay.
11 Nevertheless, they starkly illustrate the absurdity of the
12 amounts she seeks. For instance, in Exhibit 21, Kramer claims
13 over \$7,000 in attorney service charges incurred for filing
14 documents with this Court.

15
16 This is but one example of the surreal assertions in her
17 Motion. Once again, GlobalTox incorporates by reference its
18 objections to her costs as set forth in its Motion to Tax
19 Costs, and requests that the Court take judicial notice of
20 its files regarding that Motion.

21 Where the costs sought by a litigant appear unreasonable
22 or unnecessary, the burden of proving otherwise shifts to the
23 party claiming the costs. Stenzor v. Leon (1955) 130
24 Cal.App.2d 729, 735.
25

1 Kramer had provided NO admissible evidence to
2 substantiate any of her costs.

3 **II. KRAMER'S MOTION FOR ATTORNEY'S FEES IS UNTIMELY**

4 California Rules of Court 3.1700(b)(1) and 8.108 mandate
5 that Kramer's motion for attorney's fees had to be filed no
6 later than 30 days after the Court mailed notice of the
7 denial of her motions for new trial and/or judgment
8 notwithstanding the verdict. That notice was mailed by the
9 Court on December 16, 2008.

10
11 Accordingly, her motion for attorney's fees had to be
12 filed no later than January 16, 2009. However, the instant
13 motion was served on February 2, more than two weeks late,
14 and for that reason alone must be denied.

15
16 **III. THERE IS NO LEGAL AUTHORITY FOR AWARDED KRAMER
ATTORNEY'S FEES**

17 C.C.P. § 1033.5(a)(10) allows attorney's fees when
18 authorized by contract, statute or law. There is no such
19 authority here. Kramer does not contend that there was a
20 contract with an attorney's fee provision, or a statute that
21 grants attorney's fees in a defamation action.

22
23 In a nutshell, she demands that GlobalTox pay her fees
24 because Judge Orfield, the Court of Appeal, Judge Schall and
25 the jury were all misled into ruling against her.

1 In promoting that theory, she relies on three statutes,
2 none of which apply.

3 First, she cites C.C.P. § 128.6, but that statute never
4 became effective. It is inoperative. By its terms, § 128.6
5 was to become effective on January 1, 2003, "unless a statute
6 that becomes effective on or before this date extends or
7 deletes the repeal date of Section 128.7." C.C.P. § 128.6(f).
8 "The repeal date of § 128.7 was extended, effective January
9 1, 2003, by Stats. 2002, c. 491 (S.B. 2009), § 1, and
10 subsequently deleted by Stats. 2005, c. 706, § 9." (Thompson
11 West, 2009 California Code of Civil Procedure, § 128.6
12 Notes.)

13
14 Second, she relies on the anti-SLAPP statute, C.C.P. §
15 425.16. But she already tried that route, and lost and lost
16 and lost.

17
18 Kramer brought an anti-SLAPP motion to strike the
19 Complaint shortly after this action was filed. She lost in
20 the trial court before Judge Orfield, appealed to the Court
21 of Appeal, lost again, sought a writ before the California
22 Supreme Court, and lost yet again.
23

1 Her current motion is merely a thinly disguised
2 subterfuge to re-litigate her failed anti-SLAPP motion. The
3 law of the case, and common sense, prevent her from doing so.

4 Similarly, Kramer repeatedly invoked in pre-trial and
5 post-trial briefing the third statute she cites, Business and
6 Professions Code § 6068. She raised the same arguments she
7 raises now, and they were rejected at every step -- pre-
8 trial, during trial and post-trial. Apparently unable to
9 accept the reality that the jury found that she maliciously
10 defamed Dr. Kelman, she blames opposing counsel and asserts
11 that he suborned perjury. She ignores the voluminous evidence
12 at trial that showed that she acted maliciously.

13
14 In sum, there is no contract, statutory or other basis
15 to award Kramer attorney's fees in any amount.

16
17 **IV. THERE IS NO EVIDENCE TO SUPPORT THE AMOUNT OF**
18 **ATTORNEY'S FEES SHE SEEKS, OR ANY AMOUNT**

19 Kramer provides absolutely no admissible evidence to
20 support her claim for \$472,125 in attorney's fees. There is
21 no declaration under penalty of perjury or detail of fees
22 from either of the law firms that represented her.

23 Instead, she only submits (i) a one-sentence letter from
24 William J. Brown, her first attorney in this matter, which
25 merely states without any backup or detail that his office

1 spent exactly 300 hours, at the agreed rate of \$400 per hour,
2 for a total of \$120,000, and (ii) a one-sentence letter from
3 Lincoln Bandlow, her second attorney, in which he states
4 without any backup or detail that in the 14½ months that his
5 firm represented Kramer, "his office" spent 939 hours at the
6 agreed billing rate of \$375 per hour, for a total of
7 \$352,125.
8

9 This averages to more than \$24,000 per month for over a
10 year, a staggering sum considering that this was an
11 extraordinarily simple case involving one cause of action, a
12 total of three days of depositions, no cross-claims and no
13 third-party defendants.
14

15 V. CONCLUSION

16 There is no legal or factual basis for awarding costs or
17 attorney's fees to Kramer, and her motion must be denied.

18 Dated: February 24, 2009

COURT OF APPEAL, FOURTH APPELLATE DISTRICT

DIVISION ONE

STATE OF CALIFORNIA

Court of Appeal Fourth District
FILED
OCT 13 2010
Stephen M. Kelly, Clerk
DEPUTY

BRUCE KELMAN et al.,

D054496

Plaintiffs and Respondents.

v.

(Super. Ct. No. GIN044539)

SHARON KRAMER,

NO CHANGE IN JUDGMENT

Defendant and Appellant.

THE COURT:

The nonpublished opinion filed September 14, 2010, is modified as follows:

At Discussion I, last paragraph beginning with "Finally, because" delete

"Finally,"; begin sentence with "Because" (slip opn., p. 13)

At Discussion I, after last paragraph, last sentence ending with "that
determination." insert two new paragraphs (slip opn., p. 13):

"We also recognize that the trial court gave "Plaintiff's Special Jury Instruction -
Proof of Actual Malice," which stated: "Actual malice may be proved by circumstantial
evidence. Although personal ill will by itself is not sufficient to prove actual malice, a

combination of Kramer's anger, hostility toward the Plaintiffs, failure to investigate or subsequent conduct may all constitute circumstantial evidence that actual malice existed. Evidence alone of Kramer's animosity, hatred, spite or ill will toward Kelman or Globaltox does not establish actual malice." !(AA 1213)! Contrary to Kramer's argument on appeal, this instruction did not require that the jury find that she acted with malice.

"Finally we reject Kramer's contention that reversible error occurred because exhibit 53, which *she* offered into evidence, included e-mails from a third party accusing her of cyberstalking and the jury had access to the e-mails. The record is clear that before the exhibits were admitted into evidence and provided to the jury, the parties and their counsel had met with respect to them and agreed that exhibit 53 would be admitted. The trial court was entitled to rely on the agreement of the parties with respect to the propriety of the exhibits."

There is no change in the judgment.

The petition for rehearing is denied.

A handwritten signature in cursive script, appearing to read "Benke", is written above a horizontal line.

CASE NO. GIN044539

Declaration of Lincoln D. Bandlow

**[Assigned for All Purposes To Hon. Lisa
C. Schall, Department 31]**

Hearing Date: December 12, 2008

Declaration of Lincoln D. Bandlow

I, Lincoln D. Bandlow, hereby declare as follows:

1. I am a partner in the law firm Spillane Shaeffer Aronoff Bandlow LLP and I am licensed to practice law in the State of California. I have personal knowledge of the facts set forth herein and if sworn as a witness I could and would testify competently thereto.

2. In August of 2007, I was retained by Defendant Sharon Kramer to represent her in this action. I represented her from that period until on or about September 12, 2008, when Mrs. Kramer substituted into the case to act on her own behalf. I represented Mrs. Kramer at the trial of this matter which took place from August 18, 2008 through August 26, 2008.

3. On numerous occasions throughout the trial of this matter, I attempted to present evidence of Mrs. Kramer's state of mind when she wrote the press release that was the subject of the litigation. In particular, Mrs. Kramer's understanding of (1) the science that formed the basis of plaintiff Bruce Kelman's frequent testimony and writings on the issue of the dangers of mold exposure and (2) the relationship between the ACOEM Paper and the Manhattan Institute Report and the effect of that relationship on the testimony of Bruce Kelman in not only the *Haynes* case, but any future testimony that Kelman might provide. Her understanding of these two crucial points directly and materially effected her state of mind when she wrote the press release and why she wrote the words "altered his under oath statements" that were the entire basis for plaintiffs' claims in this action. The Court, however, over my strenuous objections, consistently prevented me and Mrs. Kramer from presenting this crucial evidence to the jury.

4. I am now aware that two documents were submitted to the jury in this matter that were never introduced, authenticated or discussed in any manner during the trial and which were highly prejudicial. During the trial, I introduced Exhibit 53 and had it authenticated by Kelman. My understanding of Exhibit 53 as I presented it at trial was that it was a one page letter from Globaltox to the Manhattan Institute followed by five pages of invoices that evidenced work performed by Globaltox for the Manhattan Institute in connection with the preparation of the Manhattan Institute Report (collectively the "Institute Information"). I introduced the Institute

1 Information during the cross examination of Kelman, who authenticated it and I then moved to
2 have the Institute Information admitted into evidence. There was no objection and the Institute
3 Information was admitted. I later questioned Coreen Robbins about the Institute Information
4 during my cross examination of her.

5 5. What I did not learn until after the trial was over when I was speaking with juror
6 Shelby Stuntz was that three additional documents were attached to this exhibit (unbeknownst to
7 me) and submitted to the jury, two of which had never been authenticated or discussed. The first
8 attached document was a one page email from Michael Holland to Bruce Kelman (the “Holland
9 Email”). The Holland Email, however, was in fact introduced and admitted into evidence **as**
10 **Exhibit 59** just prior to closing arguments (Kelman’s attorney stipulated to its admission without
11 the need for testimony to authenticate it). The fact that I introduced this document after Exhibit
12 53 had been entered into evidence underscores how I was not aware that this document was part
13 of Exhibit 53 because, obviously, if I was aware that this document was part of an exhibit
14 already admitted, there would have been no need to separately admit it as Exhibit 59.

15 6. The second document that went to the jury as part of Exhibit 53 was an email
16 from Daniel Sudakin to Bruce Kelman, which forwarded another email from Daniel Sudakin to
17 Bruce Kelman about “Sharon Kramer and Renata Zilch” (the “Sudakin Email”). The Sudakin
18 Email was never introduced, authenticated, discussed or referenced in any way during the trial,
19 nor was any information about an article written under the name “Renata Zilch” ever remotely
20 discussed in the case. Not only is the Sudakin Email inadmissible hearsay, but it includes highly
21 prejudicial (and false) statements that Mrs. Kramer was engaging in “harassment and
22 cyberstalking” and disseminating “misinformation” and “attacks.”

23 7. The third document was a letter from James Schaller to Sudakin (which Sudakin
24 had attached to the Sudakin Email) (the “Schaller Letter”). The Schaller Letter was never
25 introduced, authenticated, discussed or referenced in any way during the trial, nor was any
26 information about Schaller or the matters discussed in his letter ever remotely discussed in the
27 case. The Schaller Letter is inadmissible hearsay and prejudicial.

1 8. I never intended for the Sudakin Email or the Schaller Letter to be allowed into
2 evidence in this case or go to the jury (in fact, I would have objected to them being introduced in
3 the case on the grounds that they are hearsay, irrelevant and prejudicial). I am not sure how the
4 Sudakin Email and Schaller Letter became part of Exhibit 53, although I am aware that that these
5 documents were at one time all marked together with the Institute Information as a separate
6 deposition exhibit for Kelman's deposition. When it came to trial exhibits, however, my copy of
7 the trial exhibits that I used during the trial did not have the Holland Email as part of Exhibit 53
8 (as mentioned, it was separately marked as Exhibit 59), the Sudakin Email (which was also
9 separately included in the Exhibit binders as Exhibit 60 but never introduced or admitted at trial)
10 or the Schaller letter (which I do not believe was included as a separate exhibit). Rather, my
11 copy of the exhibits simply showed Exhibit 53 being the Institute Information, which I spent
12 considerable time on during the trial. Thus, when Exhibit 53 was admitted into evidence, I
13 believed that it only included the Institute Information.

14 9. After the trial was over, I spoke to a juror on the case, Shelby Stuntz. She
15 informed me that numerous jurors were unsure if plaintiffs had met their burden to demonstrate
16 actual malice in the case but that a number of them had then relied on the Sudakin Email and
17 Schaller Letter, particularly the language in the Sudakin Email about "harassment and
18 cyberstalking" to reach the conclusion that actual malice had been shown. Thus, it appears that
19 the Sudakin Email and the Schaller Letter played a substantial, if not determinative, role in the
20 verdict that was rendered against Mrs. Kramer. Moreover, it also demonstrates that the jury
21 misunderstood the concept of actual malice, mistaking it for simple "personal malice" which
22 they improperly concluded existed due to the Sudakin Email.

23 I declare under penalty of perjury of the laws of the State of California that the
24 foregoing is true and correct and that this Declaration was executed by me on this 30th day
25 of October, 2008, in Los Angeles, California.

13 **Defendants.**)

Trial Date: August 18, 2008

14 _____)
15
16 1. My name is Shelby Stuntz. I am an attorney licensed to practice law in the State of
17 California.

18 2. In August 2008, I served as a juror in the defamation case brought by Bruce Kelman and
19 Veritox, Inc. against Sharon Kramer (Case No. GIN044539).

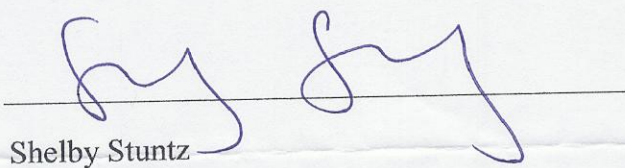

20 3. During deliberations Exhibit #53 was included in the evidence. As I recall, Exhibit #53
21 included the invoices submitted by Dr. Kelman for work on a paper titled "*A Scientific View Of*
22 *The Health Effects of Mold*" that his company was paid to do for the US Chamber of Commerce
23 and the Manhattan Institute.
24

1 4. A number of additional pages were attached to the invoices in Exhibit #53 that appeared
2 to be unrelated to the invoices and as I recall were never discussed in the trial proceedings.

3 5. Those additional pages were not introduced as evidence during the trial. They included
4 emails between a physician, Veritox employees, and Dr. Kelman. I recall one of the
5 communications described Ms. Kramer as a "cyberstalker". These emails were read aloud in the
6 jury room on the second day of deliberations.

7 6. It was not until these emails which described Ms. Kramer as a "cyberstalker" were read
8 aloud that the vote of the jurors changed from 8 to 4 (in favor of Dr. Kelman) to 10 to 2 (in favor
9 of Dr. Kelman). Up until that point, the jury spent a number of hours discussing whether Ms.
10 Kramer acted with malice. After the "cyberstalker" email was read, jurors #11 and #1 changed
11 their votes in favor of Dr. Kelman and Veritox. These two jurors both stated these emails
12 illustrated Ms. Kramer acted with malice.

13
14 I declare under penalty of perjury of the laws of the State of California that the foregoing
15 is true and correct and that this Declaration was executed by me on this 25th day of October,

CASE NO. GIN044539

**Declaration of Jury Foreman, Roy
Litzenberg**

**[Assigned for All Purposes To
Hon. Lisa C. Schall, Department
31]**

Trial Date: August 18, 2008

1. My name is Roy Litzenberg. In August of 2008, I was the Jury Foreman in the trial of Kelman and GlobalTox vs. Kramer.

2. On day two of deliberation, the jury issued a written question to the judge. My recollection of the question is: "If we find that Ms. Kramer acted with actual malice as defined in the Plaintiff's Special Jury Instruction – Proof of Actual Malice (included as Attachment A) is this equivalent to answering "Yes" to Question 5 of the Special Verdict Form? (included as Attachment B)"

3. The response received from the Judge was "Yes".

I declare under penalty of perjury of the laws of the State of California that the foregoing is true and correct and that this Declaration was executed by me on this 20th day of December, 2008, in San Marcos, California.

Declaration of Jury Foreman, Mr. Roy Litzenberg

ATTACHMENT A

**PLAINTIFF'S SPECIAL JURY INSTRUCTION –
PROOF OF ACTUAL MALICE**

PLAINTIFFS' SPECIAL JURY INSTRUCTION

Proof of Actual Malice

Actual malice may be proved by circumstantial evidence. Although personal ill will by itself is not sufficient to prove actual malice, a combination of Kramer's anger, hostility toward the Plaintiffs, failure to investigate or subsequent conduct may all constitute circumstantial evidence that actual malice existed. Evidence alone of Kramer's animosity, hatred, spite or ill will toward Kelman or Globaltox does not establish actual malice.

18 Plaintiff Bruce J. Kelman claims that Defendant Sharon Kramer acted wrongly by
19 making the following statement: "Dr. Kelman altered his under oath statements on the
20 witness stand" while he testified as a witness in an Oregon lawsuit.
21

22
23 1. Did Kramer make the above statement to persons other than Kelman?

24 ☐ Yes ☐ No

25 If the answer to question 1 is yes, then proceed to question 2. If you answered no,
26 stop here, answer no further questions, and have the presiding juror sign and date this
27 form.

28 ///

1 2. Did the persons to whom the statement was made reasonably understand
2 that the statement was about Bruce Kelman?

3 ___ Yes ___ No.

4 If the answer to question 2 is yes, then proceed to question 3. If you answered no,
5 stop here, answer no further questions, and have the presiding juror sign and date this
6 form.

7
8 3. Could persons who read the statement reasonably have understood it to
9 mean that Kelman had committed the crime of perjury or testified falsely while on the
10 witness stand?

11 ___ Yes ___ No.

12 If the answer to question 3 is yes, then proceed to question 4. If you answered no,
13 stop here, answer no further questions, and have the presiding juror sign and date this
14 form.

15
16 4. Was the statement false?

17 ___ Yes ___ No.

18 If the answer to question 4 is yes, then proceed to question 5. If you answered no,
19 stop here, answer no further questions, and have the presiding juror sign and date this
20 form.

21
22 5. Did Kelman prove by clear and convincing evidence that Kramer knew the
23 statement was false, or had serious doubts about the truth of the statement?

24 ___ Yes ___ No.

25 If the answer to question 5 is yes, then proceed to question 6. If you answered no,
26 stop here, answer no further questions, and have the presiding juror sign and date this
27 form.
28

1
2 6. If you checked yes to all of questions 1-5 above, you may award Plaintiff
3 Kelman a monetary sum up to but not exceeding \$1.00 (one dollar and no cents).

4 Sum awarded to Plaintiff Bruce J. Kelman: _____

RE: Manhattan Institute Project

Dear Mr. Howard:

We are pleased to confirm The Manhattan Institute has retained GLOBALTOX, Inc. to investigate the above-referenced matter on an hourly rate-plus-expenses basis, unless otherwise specified. GLOBALTOX's retention on this case is solely with your firm and, as such, all fees and expenses incurred by GLOBALTOX will be the responsibility of The Manhattan Institute.

GLOBALTOX's services are offered only in accordance with our current Terms and Conditions agreement. Our charges will be billed according to our current Schedule of Rates and Charges, with professional fees at our current commercial rates. To ensure that you are apprised of the technical efforts expended on your project, periodic invoices will be provided. Payment of each billing is due upon receipt.

GLOBALTOX's charges for this activity will not exceed \$25,000 without prior approval of The Manhattan Institute.

Please indicate your acceptance and understanding of the contents of this letter by signing and returning the enclosed copy. Copies of our current Terms and Conditions and Schedule of Rates and Charges are enclosed and made a part hereof by reference. If you have any questions regarding any of the above terms, please do not hesitate to contact me.

Thank you again for your interest in GLOBALTOX, Inc. We look forward to working with you.

Sincerely,

GLOBALTOX, INC.

Bruce:

Mystery solved. I Googled the aol address and it came up: Sharon Kramer, a mold advocate/victim from California (no surprise!) She wrote the document and I looked at the properties and author came up "Kramer". See the link:
<http://www.schoolmoldhelp.org/breakingnews.html>
Go to the line Surgeon General's Workshop on Health Indoor Environments scroll down and see where she mentions GlobalTox, and takes a dig at Occupational Physicians, probably why she singled me out to send the email to.
Mike

Subject: Sharon Kramer and Renata Zilch

Sharon Kramer has (in various forums on the internet, as well as her "report" to the Government Accountability Office) communicated that I authored some paper on mold litigation, under a false name (Renata Zilch), on a website called "Skeptics Report." A copy of that article is attached ("Renata Zilch: Panic First, Investigate Later"). Sharon is fond of quoting the last paragraph of that article, and then linking some way to me. I have no idea how she came to the inaccurate conclusion that I wrote this article. I have never written anything under the name Renata Zilch.

I have attached some of Sharon's postings to the Yahoo sickbuildings group discussion board (see highlighted sections), which documents her interest in learning more about who Renata Zilch is. At some point, she came to the conclusion that I am Renata Zilch, and then you can see some additional harassment and cyberstalking of me

Wednesday, July 02, 2008 AOL: Kscheuer

8 of 11

in her subsequent postings.

I have also attached some of Sharon's postings to the Toxlaw website, where she again implies that I am Renata Zilch, and goes on to imply that I am an "anonymous expert" who is somehow responsible for the current allegations against William Rea's medical license in Texas. Again, I have no idea what would make her think this. I have no involvement in that.

She repeatedly alleges (in various forums, as well as her report to the GAO) that I have failed to disclose a contract for technical writing that I previously had with the CDC. That contract had absolutely nothing to do with mold or mycotoxins. It was for my work as a technical writer on the CDC Third Report on Human Exposure to Environmental Chemicals. All of that work was related to pesticides and their toxicology.

The site where all of this was previously assembled (including links to various documents, as well as testimony) was located at a website address that is no longer active (it went offline about a month ago):

<http://www.science4sale.info/cdcoutsourced>

Her dissemination of this misinformation has led to people from across the country contacting me, as they believe that I am somehow trying to do them harm. As an example, I have attached a letter I received from Dr. James Schaller in Florida. Dr. Schaller is the co-author of Ritchie Shoemakers book "Mold Warriors." Dr. Schaller had contacted me because he was under the impression that I was working with the CDC to target physicians who had alternative beliefs about health effects from mold. As you can see from the letter he sent me, he also wants to know about Renata Zilch and the contract I had as a technical writer for the CDC.

If the attorney who will be deposing Sharon Kramer has any questions about any of this, please have them give me a call. I have had enough of the harassment, cyberstalking, and attacks on my Veritox affiliation.

Thanks,

Dan

Dear Dan,

Thank you for your helpful letter of September 21st.

I appreciate the time you took to write and I apologize if I caused any unsettled feelings due to comments that you explained are not true. Thanks for the sacrifice of time.

When I expressed your comments as you requested, the information was appreciated. Yet I was also asked about the purpose of a "CDC contract (2/06)" and someone raised the name of a writer, "Renata Zilch." (I believe these are in the context of the effects of mycotoxins on people beyond the IOM conclusions). I have no knowledge about either issue, but you did mention if some future questions arose from others to pass along.

I know you have a life, but perhaps best to put these other matters to rest, which I personally am utterly clueless about, but I might learn something.

For myself, I wonder if you are aware of any Internet home study toxicology programs ideally at the Masters level.

Sorry to trouble you again.

Have a good week.

James

PROOF OF SERVICE
1013(a) CCP Revised 7/17/07
State of California, California Supreme Court
Appellate Case Nos. D054496 & D047758 (anti-SLAPP)
Superior Court Case No. GIN044539

STATE OF CALIFORNIA)
)
COUNTY OF SAN DIEGO) ss.

I am employed in the County of San Diego, State of California. I am over the age of 18 and not a party to this action; my business address is 2031 Arborwood Place, Escondido, CA 92029 and my mailing address is the same.

On October 22, 2010, I served the following document (s) described as SUPREME COURT OF CALIFORNIA, PETITION FOR REHEARING AND MODIFICATION OF OPINIONS. by placing a true and correct copy thereof enclosed in a sealed envelope addressed as follows:

Keith Scheuer	Fourth District, Division	Superior Court
Scheuer & Gillett	One Court of Appeal	Clerk of the Court,
4640 Admiralty Way #402	Clerk of the Court	Appellate Division
Marina Del Rey, CA 90292	750 B Street, Suite 300	325 S. Melrose Avenue
	San Diego, California 92101	Vista, CA 92083

I placed 13 true and correct copies thereof enclosed in a sealed envelope addressed as follows:

Supreme Court of California
350 McAllister Street
San Francisco, CA 94102-4797
Office of the Clerk

I deposited such envelopes in the mail in Escondido, California in accordance with the established custom and practice wherein the correspondence is deposited with the US Postal Service on that same day in the ordinary course of business by PRIORITY MAIL. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date or postage meter date is more than 1 day after date of deposit for mailing affidavit.

Executed on October 22, 2010, at Escondido, California. I declare under penalty of perjury under the laws of the State of California that the above is true and correct.

Michael Kramer
